Reliability, Availability, Serviceability; High Quality is the Pro-face Standard

As a company leading the way in human-machine interface (HMI), we have produced a panel computer that integrates a touch panel monitor with a PC body, which is the first in the world. Since the launch of this product, we have retained the top share* in Japan as a manufacturer of panel computers and programmable displays, attaining high reputations in many production fields throughout the world.

The HMI that Pro-face advanced is further enhancing its importance as a key technology in production fields.

* Excerpt from "2006 Fuji Economic Mechatronics Parts"

Quality is Our First Priority

Pro-face products have undergone strict quality evaluation and environmental resistance tests, from the design/development to manufacturing stages.

Cutting Edge Technology

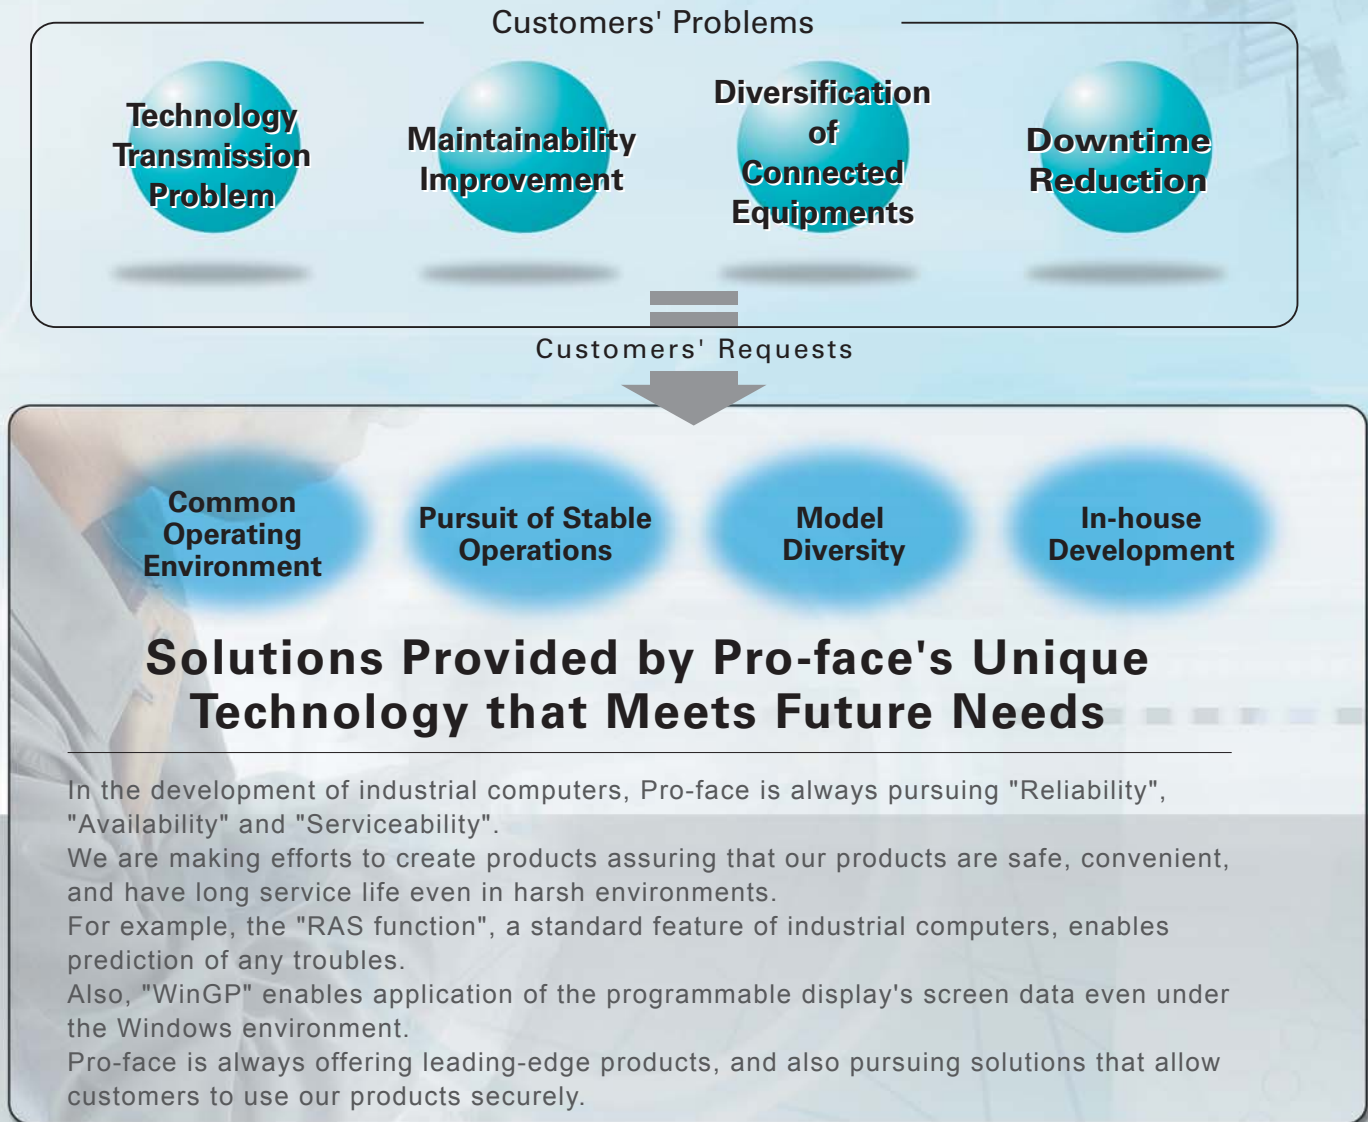

There are various needs and customers' requirements in the field. We will supply the most suitable products for individual products applications, as well as maintaining optimum functions to meet such field needs and requirements.

Thorough Maintenance, Inspection and Support System

For the purpose of replacement of consumables and system version upgrading, ease of parts requirement and maintenance in production fields is essential to stable operations.

Technology to Meet the Customers' Exact Needs

The customers' required level for industrial computers is much higher than that for general-purpose PCs. Therefore, we are requested to offer high reliability that can withstand extremely harsh environments in the field. In terms of environmental resistance directly associated with a production field where the Pro-face industrial computer is installed, there is no room for compromise. Pro-face industrial computers will continue to meet customers' expectations in a wide spectrum of fields, from controllers at the forefront of production to servers for collecting overall plant information.

Pro-face's Policy

The In-house Design from Fundamental Stages

Assuming that our products have any problem during use at a customer's site (incompatibility with connected equipment, or a problem specific to the Windows environment), we internally design our products from the fundamental stages, including motherboard design. Therefore, in case of a failure in the operating environment, we can identify the cause of the problem and flexibly and quickly take actions.

Strict Environmental Resistance Test

Pro-face products have undergone test simulation under harsh environmental conditions on the assumption they will be used in harsh FA environments. We will offer customers only products that have passed strict in-house tests, such as vibration resistance test, as well as a heat resistance tests against heat as the worst enemy to precision equipment.

Compatibility Problem Reduction

BIOS, as a key part of a machine, has undergone internal optimization by the series in order to prevent any possible trouble caused by incompatibility with principle components of the machine.

Reduction in the Number of Steps on the Customers' Side

Installation of drivers for principle components is indispensable in the introductory step. Placing emphasis on availability in the site, we will deliver our products with the drivers pre-installed, so as to minimize the number of steps to be taken.

Broad Product Selection to Meet Customer's Application Needs!

Industrial Computers with the Ultimate in Expandability and Serviceability

APL3000_{SERIES}

Performance suited to enduring high loads

Continues operating without pause, even in emergency situations

Developed as an industrial computer with high specifications. Adopts the Intel® Dual Core CPU and 945GME chipset, as well as incorporating the maximum 4GB memory for enhancing the high speed processing capacity. Equipped with the constant backup function in 2 HDDs using the mirroring software, as well as the security function to achieve 24-hour continuous operation.

Industrial Computers Providing Highest Value

PS3000_{SERIES}

A wide variety of sizes are offered with high usability

Best in class, all-in-one PC for your industrial applications

High evaluation has been achieved through the thin and compact, cost conscious panel computer equipped with more specifications than required. Supporting multi-languages and enriching interfaces Complies with International Safety Standards in addition to a wide range of lineups.

DVI I/F Compatible Flat Panel Display

FP3000_{SERIES}

Built-in DVI Interface to Express Information Vividly as Standard

Built-in USB Interface with High General Versatility

Compliant with the RoHS directive, in addition to having a simple design with high general versatility. Incorporates USB and DVI for interfaces. Furthermore, by connecting with our built-in computer, the display provides vivid images even if installed 10m away from the main unit.

Intuitive HMI Software for Easy Screen Development

GP-Pro_{EX} + WinGP

Flexibility not influenced by hardware

Time saving thanks to easy operation

Easy to create GUI for Windows®

Excellent screen creation software that can be used for direct operation. Additionally, communication drivers by various manufacturers are attached as standard. With easy connection settings, you can precisely get any necessary information. Compatible with all Pro-face's "3000 Series" models. No need to re-create the screen for each hardware unit.

No worry about trouble caused by sudden blackout, or voltage reduction.

Utilize screen data using "GP-Pro EX".

Compatible with XP Pro. Avoid trouble using the CF card.

No worry about sudden trouble or repair. Quick support via telephone or Website.

Constant backup function guarantees safe and secure operation.

Built-in USB I/F on the front panel of the unit. Easy to connect a peripheral device.

Keyboard integrated with the main unit. Easy operation available.

Simple HDD removal results in maintenance time reduction.

IP65f NEMA 4/4x/12 rated excellent environmental resistance protects the product from water, dust, high temperatures, and humidity at sites.

Detect errors in advance with the equipment monitor function.

Features of the APL3000 Series**High Performance Industrial Computer**

For system architecture through high-speed processing of images or large capacity data.

High Performance Built-in CPU

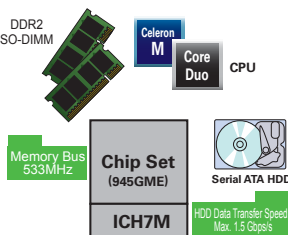

For system architecture through high-speed processing of images or large capacity data, High performance and low energy-consuming built-in Intel® Core™ Duo processor. Higher speed processing is possible thanks to the Dual Core CPU.

Memory Capacity 4GB at Maximum

Can store memory as large as 4GB.
Pursues higher performance with DDR2 standard complying memory.

Serial ATA HDD Applied

A serial ATA HDD which can transfer data as fast as 1.5Gbps is built-in. This makes high speed data processing possible at a large capacity.

**24-hour Continuous Operation**

Data protection function and quick maintenance control recovery time is as little as possible to regain important data lost due to device breakage or momentary stop.

Software Mirror Utility

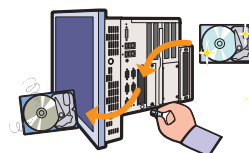

The software mirror function is available for writing the data to 2 HDDs simultaneously, without any load to the CPU, and providing perfect data backup.

**HDD Cartridge**

Can reduce maintenance time with the application of the cartridge disk type, only requiring HDD replacement.

HotSwap

Can replace the HDD unit without stopping the device even with the power turned ON thanks to the HotSwap function.

**External Dimensions/Interfaces**

Features of the APL3000 Series

One-unit that Integrates a Keyboard and a Mouse with a PC Body

Panel computer with keypads available with keyboard key switch (membrane) at the front.

Features

- Special function keys for customization. • Can be operated without a mouse.
- Built-in Front USB as standard.

No Worry About Sudden Blackout with a Battery Unit.

No excess space needed for built-in type in the body.

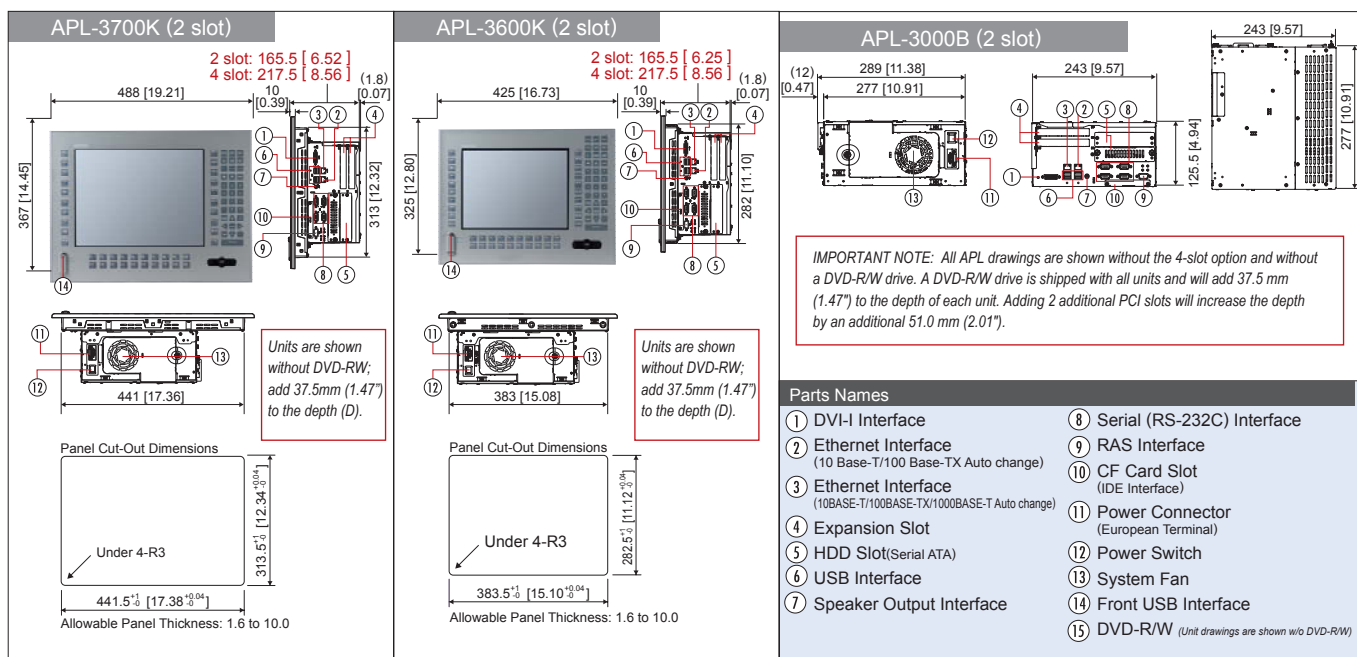

Adopts a common platform to reduce the number of evaluation steps.

The APL3000 Series offers various models including the panel computer, keypad-attached and built-in computer.

When a customer purchases multiple models, we adopt the common hardware platform for the requirement of the minimum number of evaluation steps.

	Ethernet (LAN)	IEEE802.3u, 10 BASE-T / 100 BASE-TX Auto change Connector: Modular Jack (RJ-45) x 2 (Bottom Slot)
	USB	USB2.0 Connector: USB Type A x 4 (Side Slot x 4), USB1.1 Connector: USB Type A x 1 (Front Slot x 1) Power Voltage: 5VDC ±5%, Output Current: 500mA (Max), Maximum Communication Distance: 5m
	RAS	Input (usable as an external reset input): 2 points, Output: 2 points, Rated Voltage: 12VDC, Maximum Rated Current: 100mA Connector: D-Sub 9-pin socket x 1
	Sound	Speaker Output Connector: Mini Pin Jack x 1 (Bottom Slot)
	PCMCIA	PC card slot, Connector compatible with CardBus (*Zoomed Video and Sound functions excluded): Type III x 1

^{*1} Can switch between master and slave according to the settings.

General Specifications

Model	PS3650A-T41	PS3650A-T41-24V
International Safety Standards		
Conforming to Standards	UL508, CSA-C22.2, No.142-M1987, EN60950, EN55011 Class A and EN61000-6-2	
Power Supply	Rated Voltage	AC100 to 240V
	Rated Voltage Range	AC85 to 264V
	Rated Frequency	50 / 60Hz
	Allowable Voltage Drop	Shorter than 1 cycle (Note that pause occurrences must be more than 1 second apart)
	Power Consumption	110VA or less
Voltage Endurance	AC1500V 20mA for 1 minute (between charging and FG terminals)	AC1000V 20mA for 1 minute (between charging and FG terminals)
Insulation Resistance	10MΩ or more at DC500V (between charging and FG terminals)	
Ambient Operating Temperature	<With HDD> 5 to 50°C	<Without HDD> 0 to 50°C
Storage Temperature	-20 to +60°C	
Ambient Humidity	10 to 90%RH (No condensation, Wet-bulb temperature: 39°C or lower, <With HDD> 29°C or lower)	
Storage Humidity	10% to 90%RH (No condensation, Wet-bulb temperature: 39°C or lower)	
Pollution Degree	Pollution Degree 2	
Corrosive Gases	Free of corrosive gases	
Air Pressure Resistance (Operation Altitude)	800 to 1114hPa (2000m or lower above sea level)	
Vibration Resistance	JIS B 3502, IEC/EN61131-2 compliant <With HDD> 10 to 25Hz, 4.9m/s ² in X, Y, Z directions (for 30 minutes) <Without HDD> 5 to 9Hz Half Amplitude: 3.5mm, 9 to 150Hz, Constant Acceleration: 9.8m/s ² in X, Y, Z directions 10 cycles (for 100 minutes)	
Noise Immunity	Noise Voltage: 1500Vp-p Pulse Duration: 50ns, 500ns, 1μs Rise Time: 1ns (via noise simulator)	Noise Voltage: 1000Vp-p Pulse Duration: 50ns, 500ns, 1μs Rise Time: 1ns (via noise simulator)
Electrostatic Discharge Immunity	6kV (IEC/EN 61000-4-2 Level 3)	
Grounding	Protection: type D (Common to SG-FG)	Function: type D (Common to SG-FG)
Ratings	Equivalent to IP65f, NEMA 4/4X/12, (When not using Front USB) ^{*2}	
External Dimensions	W313 [12.32] x H239 [9.41] x D103mm [4.06in.] ^{*3}	
Weight	About 4.5kg (9.9lb) or less (Main unit only)	
Cooling Method	Forced Air Cooling by CPU Fan	

^{*2} Meets applicable testing requirements operation is not, however, guaranteed in every environment. ^{*3} External dimensions when the battery unit is used: W313 [12.32] x H239 [9.41] x D78.6mm [3.09in.]

Option

WinGP

Pro-face Approach

Integration of Open and Dedicated HMI Platforms

Trends Toward HMI Standardization

Pro-face's multi-platform GP-Pro EX HMI Software creates a user interface for Industrial PCs based on the "WinGP" runtime engine. Furthermore, it enables establishment of a common HMI platform, and facilitates addition of the manufacturer's original functions. Users can therefore expand system configuration by taking advantage of the expandability of a general-purpose OS, as well as compatibility with general-purpose applications.

PC

Control Device

GP-Pro EX

IPC

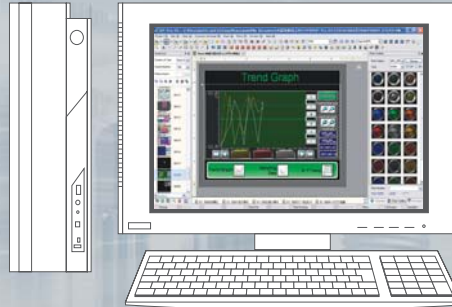

(Industrial Personal Computer)

AGP

(Graphic Operator Interface)

Office

PC

**Reduction in the
Number of Design
Steps Results in
Time (Cost) Saving!**

Screen Data

GP-Pro EX
HMI Development Software

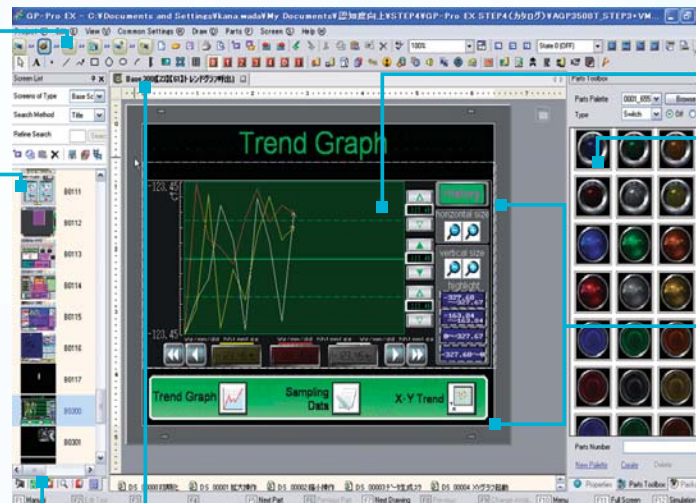

Using WinGP, Pro-face industrial computers can apply screen data created using GP-Pro EX.

Individual functions can be selected at a glance using the icons

Created screens can be visually selected using the thumbnail view.

A screen call menu can be displayed.
If you activate the screen call function while creating a screen, the called screen is moved below, and displayed as a thumbnail.

The edition screen provides a user-interface that adopts many mainstream tabs.

Various graphs such as trend graphs can be placed on the screen.

The parts selection window shows a list of available parts.

Once headers and footers for frequent use are registered above/below the screen creation area, they can be called into a project anytime.

HMI Software Data is Applicable to Windows® PCs

GP-Pro EX screen data, which is conventionally available only with a Graphic Operator Interface including AGP3000, can be used even with Windows machines. Thus, a common software platform can be used.

Seamless Communication with the Control Device

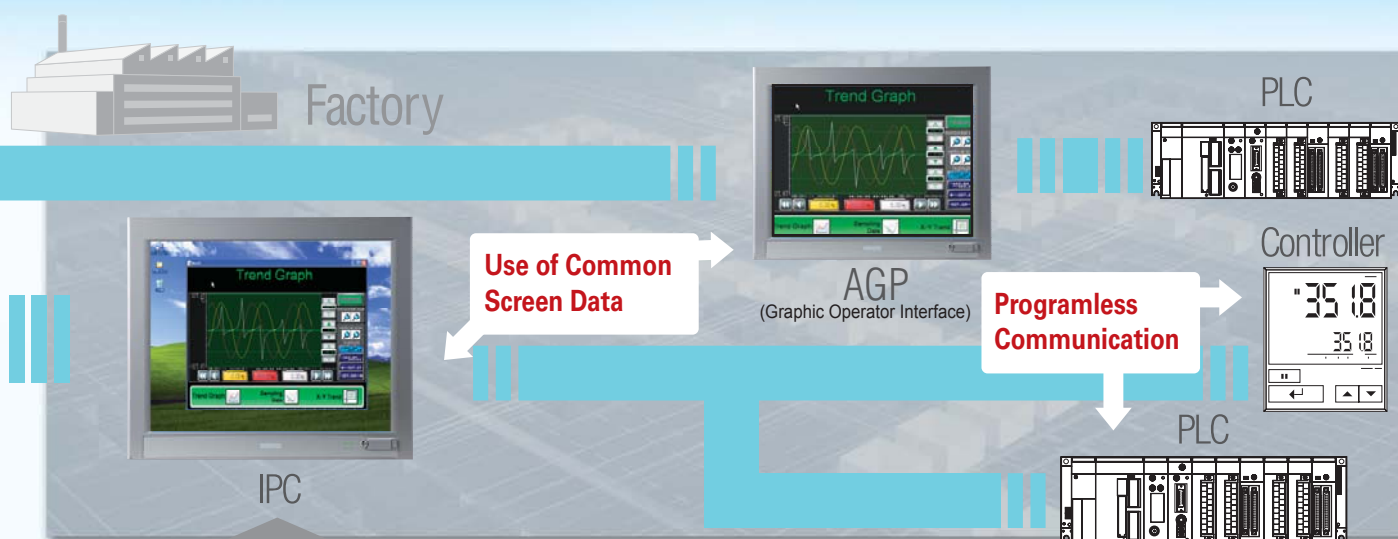

Communication drivers are installed as a standard feature. Development of additional drivers for control devices such as PLC and temperature controller is not required.

Facilitating System Space-Saving

A system conventionally operated by combinations of a PC, Graphic Operator Interface and PLC can be operated simply with an industrial computer and PLC.

Seamless Link to User Application

With the dedicated API, WinGP provides a flexible link to user-prepared PC applications.

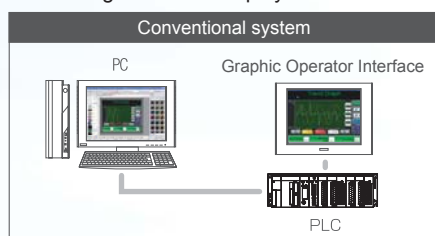

Use of Common HMI Software

GP-Pro EX software can be applied to both the Graphic Operator Interface display and panel computer. Hardware-dependent screen development is not required.

Space-saving

From "Programmable Display + PLC + PC" to "Industrial Panel Computer + PLC"

Link to PC Application via Dedicated API

■ Link to User Database using the Handling API

Enables WinGP status acquisition and setup change from user application. (Provided as the DLL file)

■ Control via User Applications using the Device Address API

Enables device read/write operations for WinGP communication target equipment via user application. (Provided as the DLL file)

Supported Languages

• Visual C++ • Visual Basic • C# • VB.NET • Excel • VBA

No Need to Develop an Additional Communication Driver

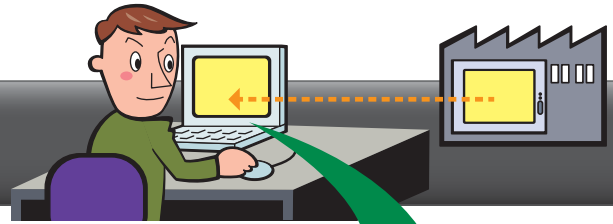

Communication drivers for control devices such as the PLC and controller are pre-installed as standard. Purchase or development of an additional communication driver is not required.

Taking advantage of expandability of a general-purpose OS, such as abundant peripheral equipment and large-volume memory, WinGP enables diversified system configuration specific to the IPC.

New Technologies "Exclusive to Pro-face" and Supporting State-of-the-art Manufacturing

Automatically collect production information in real-time remotely.

Use Pro-Server EX to collect production information at sites, and utilize it as information data.

Helpful to grasp situations from a remote site for product instructions. You can easily create daily or monthly reports by directly printing out the data at manufacturing sites.

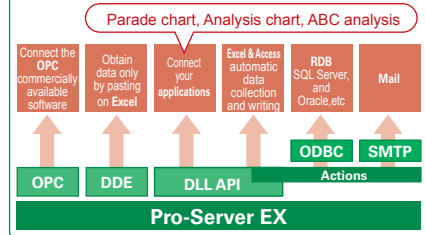

More convenient through the combination with Pro-Server EX!

Remote RAS Function

Various remote environments can be constructed using API-DLL.

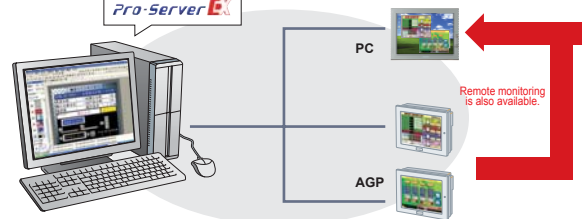

Remote Monitor	Remote monitor of the terminals at a manufacturing site from the office
Remote Boot	Regular rebooting at a preset time to keep the stability of OS or applications
Remote Shutdown	Shut down the OS in unison from a remote office.
Remote Reboot	Start multiple IPCs in unison from an office at the beginning of operation. Start reservation is also available.

Data Utilization in Various Applications

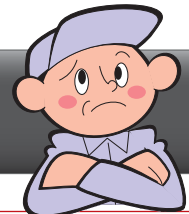

WinGP

Built-in WinGP units have been registered as nodes. This enables data collection, delivery, or data transfer between the AGP and IPC via the network.

Worried about data crashes and downtime due to vibration or shock?

The Windows® XP supported CF card helps you achieve excellent resistance to both impact and vibration without a HDD.

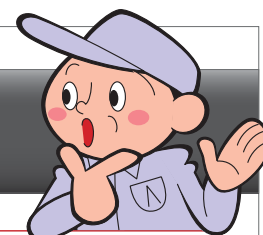

8GB CompactFlash Version Available for Windows® XP!

● Supports 7 Languages

Supports English, Spanish, French, Brazilian Portuguese, Japanese, Simplified and Traditional Chinese.

RAS prevents costly system crashes and downtime.

Pro-face IPC Innovative Instant Alert Feature (RAS) Reliability, Accessibility, Serviceability. A Powerful Built-in Health Monitoring System provides early warning of system failure.

Alarm symptom monitor

Warning cause display

Actions

- Maintenance (Parts replacement, repair, etc.)

More effective in reducing the number of maintenance process and avoiding loss compared to detection and recovery after occurrence of an alarm.

System Monitor

Utility to monitor various situations residing on the task bar tool which provides various support regarding the RAS function.
Free download from Otasuke Pro! (<http://www.Pro-face.com/otasuke/>)

S•M•A•R•T Function

Monitoring HDD status, this function warns of and logs a HDD failure signal. (Included in the system monitor.)

ERROR Status.

Alarm monitor

- Power voltage alarm, Internal temperature alarm
- Cooling fan speed alarm
- Watch dog timer time up
- Touch panel alarm (Orange LED lit)
- Blackout of backlight detection function
- Soft mirror alarm
- SMART alarm

External input signal

- General purpose signal input
- Remote reset input

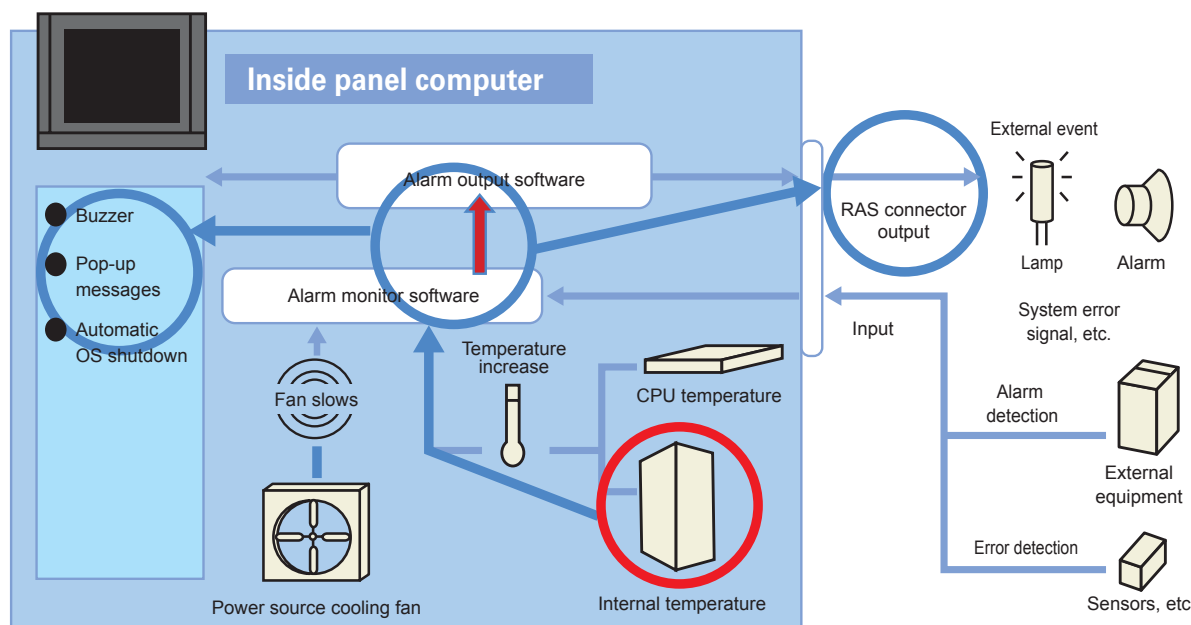

External output signal

- General purpose output signal
- Alarm output; Lamp output

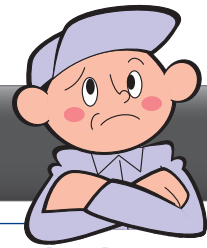

Various processing functions

- LED indicator
- Popup message output
- Buzzer output
- System shutdown
- System reset

For example, Internal Temperature Increases!!

Reliability and Operability "Exclusive to Pro-face"

Avoid data loss from sudden blackouts.

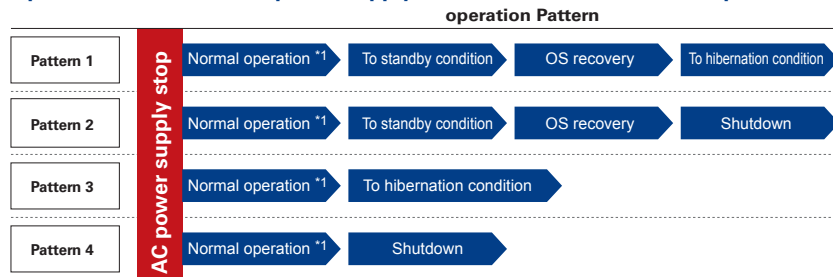

Data can be protected from damage caused by blackout or voltage reduction, thanks to the power supplied by the battery unit.

Automatic shut down through software processing.

When the system detects a blackout, our computer automatically shifts to standby/ hibernation/shutdown of Windows® in 4 patterns. For this function, you can feel secure about the safety of precious data, even after a sudden blackout or temporary voltage reduction.

- Supported Model: PS-3650 (AC power supply model)

Operation in case that AC power supply has been cut in normal start-up conditions

Note: Battery operation time could vary depending on the environment and specifications.

Features

- With a compact backup unit incorporated in the main unit (For BTO exclusive use option).
- With the automatic status shift function after blackout detection.
- Monitors the remaining amount, temperature, and status (charge/discharge) of the battery.
- Contains a function to notify the user of the time to replace the battery.

*1 Settable time: 0 to 60 sec.

Enhance the safety of Hard Drive Data.

Don't worry if some accident should happen during Operation.

Because... With the mirroring function to write data to 2 HDDs simultaneously, even if the one unit crashes, lost data can be recovered from the other.

Furthermore, APL3000 Series... Can perform other operations in parallel because the CPU is under less load during rebuilding.

Easily connect to a peripheral device.

Easy Maintenance

Without opening the operation panel, a USB storage device or keyboard can be connected to the unit, which actualizes simple inspection and maintenance.

Also, double security protection is available because you can set whether to use a USB port installed by using a thread-attached front USB fastener and DIP switch.

* A USB port can be installed using the optional USB front cable (CA5-USBEXT-01) on the panel even for the non front USB type.

Easily replace hard drives.

Simple replacement requiring only a cartridge change.

Has adopted the cartridge disk system requiring only a hard disk drive change.

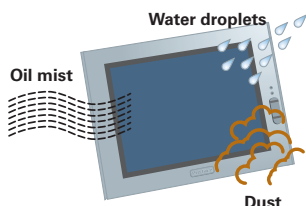

Furthermore, APL3000 Series... Hot-swappable
The unit can be replaced without stopping the device even with power turned ON.

* Available only when mirror utility software is used in parallel.

Environmental Resistance

Strong even in harsh environments

An IP65f rated overlay (front sheet) protects the panel from oil mists, water droplets, dust, etc. Also, excellent in terms of performance, such as with resistance to vibration and high temperature operation.

Stable Long-term Supply

Longterm Supply for industry

With a design assuming 24-hour continuous operation, our product has gone through a series of hard quality tests. As well, a stable long-term supply will be provided not only to the body and parts but also the OS. Furthermore, we procure the products and offer product support overseas through our global network.

Peripheral Devices

Don't worry about the compatibility with other companies' peripheral devices

You can combine our IPC with not only our Pro-face products but also other companies'.

You can safely use other companies' products since our IPC has been evaluated with commercially available expansion boards, as needed.

International Safety Standards

Complies with overseas safety standards

Complies with global safety standards. You don't have to worry about setting up our product for your exporting products.

Touch Panel

Simple operation possible through direct touch of the screen

With use of a resistive film (analog) touch panel, mouse operation can be substituted by touch and freely performed on the screen. Simple operation is possible even for those who are not good at using a mouse or keyboard.

RoHS

Earth friendly RoHS directive compliant

Our product has been made in order to comply with EU standards, which designate the limit of the use of harmful substances. We have established our earth friendly mounting technology so as to avoid flow of harmful substances designated by the RoHS directive into the earth via waste and in turn contaminate groundwater.

*Chinese RoHS directive: The units produced in March 2007 and after have been applied sequentially. Please feel free to contact us for when to apply Chinese RoHS directive to your devices.

Space Saving

Actualizes space reduction thanks to the one-unit type

This one-unit type contributes to space saving and can be set up to incorporate through touch panel operation without a keyboard or mouse.

VESA Arm

Easy arm installation

Complying with the VESA standard, our products can be installed flexibly to the arm, as well as other components.

The VESA standard compliant arms are available according to your application.

BTO

Built to order and shipped with your choice of options

We will accept any customers' orders according to the requested conditions, such as, "something with a high CPU and memory processing capacity," or, "something with the best quality but that is also affordable".

7-year Guarantee

We offer repair service even after production stoppage

Free guarantee for 1 year after delivery. (When several conditions and precautions have been observed.) we guarantee repairs for 7 years after delivery at our service repair center, even for items for which production has been discontinued. (Charged)

* For the products that were discontinued in September 2005 and before, our repair service will be effective during a 5 year period from the last shipment. Please understand, however, we may not be able to repair the products if the replacement parts should become unavailable, not limited to the above period.
