A selection of
1430 products,
with the top 560
selling products
referenced in
bold characters.

A worldwide detection first for improving productivity.
A complete offer for resolving your most commonly
encountered detection problems:
● product selection simplified
● product availability simplified
● installation and setting-up simplified
● maintenance simplified
● detection simplified using a single supplier.
Improved simplicity for improved productivity.

Select the sensor according to your specific requirements

“Universal” series:

Multi-purpose
products providing
multiple functions.

“Optimum” series:

Designed for
essential and
repetitive functions.

“Application” series:

Offers functions
specifically for
specialist needs, thus
providing the ideal
solution for your more
complex applications.

Contents

> A single product that automatically adapts to all conditions

> A single product that automatically adapts to all installation environments

> A single product that automatically learns both its detection mode and detection zone

> Simple parametering of many different resolutions on the same product

> Availability of more than 5,000 interchangeable configurations within 24 hours

> A user-friendly product at last; easy to parameter prior to installation and to modify during operation

> 13.56 MHz RFID that is open to the majority of ISO electronic tags

● Osiris Photo-electric sensors 1/2 to 1/15

Detection without contact of objects

whatever their shape or material

- > Detection from a few millimetres to several tens of metres
- > 3D adjustable fixing accessories
- > Specific products for particular applications

● Osiprox Inductive proximity sensors 1/16 to 1/26

Detection without contact of metal objects

- > Sensor / object distance \leq 60 mm
- > Generic cylindrical and flat form products
- > Specific products for particular applications

● Osisonic Ultrasonic sensors 1/28 and 1/29

Detection without contact of any object of any material

- > Detection from a few millimetres up to 8 metres
- > Extra large range to ensure finding the right product
- > Specific products for particular applications

● Osicoder Rotary encoders 1/30 and 1/31

Opto-electronic detection

- > Incremental
- > Absolute - single turn and multturn
- > PROFIBUS and CANopen fieldbus communicating

● Osiswitch Limit switches 1/32 to 1/41

Detection by contact of rigid objects

- > Positive opening operation of electrical contacts
- > Object speed \leq 1.5 m/s
- > Specific products for particular applications

● Nautilus Sensors for pressure control 1/42 to 1/47

Detection by contact with fluid

- > Electronic pressure and vacuum switches
- > Analogue pressure sensors
- > Electromechanical pressure and vacuum switches

● Ositrack Radio frequency identification 1/48 to 1/49

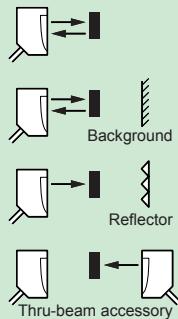

13.56 MHz RFID detection

Complete range of RFID tags and compact stations

Other detection technologies

● Osiprox Capacitive proximity sensors 1/27

● Sensors for explosive atmospheres (see chapter 10 "Explosive Atmospheres")

A single product that automatically adapts to all conditions.

Presentation

Ositrack® is open to the majority of ISO 18000-3, ISO 15693 and ISO 14443 electronic tags.

Ositrack® integrates Modbus RTU, Uni-Telway and Modbus TCP/IP (using Ethernet box XGSZ33ETH) protocols.

The Ositrack® RFID offer comprises:

- 2 models of 13.56 MHz compact stations (read/write)
- 6 models of 13.56 MHz electronic tags
- 1 portable RFID diagnostics terminal
- 2 models of network connection boxes plus connection and mounting accessories.

Setting-up

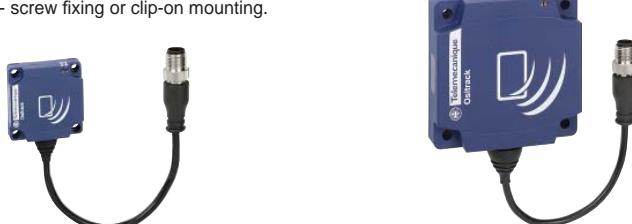

Ositrack® compact stations are simple to set-up:

- Integrated RFID and network functions
- No programming
- Automatic detection of the RFID electronic tags (read or write)
- Automatic setting of the communication parameters (speed, format, parity, protocol, etc.)
- Configuration of the network address (1 to 15) using badge included with the station
- Low sensitivity to metal environments.

Installation

Ositrack® stations easily integrate in flexible manufacturing production lines:

- quick connection using M12 connector
- screw fixing or clip-on mounting.

Unequalled and of high quality, it is the largest offer on the market.

- **Simplicity:** the clip together components ensure simple and secure assembly.
- **Ingenuity:** LED technology for all signalling functions.
- **Flexibility:** of modular construction, the products evolve with the automation system.
- **Robustness:** mechanical performance much higher than standard requirements.
- **Compactness:** the overall dimensions are the smallest on the market.

Magelis

HMI at the touch of a finger and the *blink* of an eye.

The new Magelis range, comprising display units, terminals, graphic terminals with keypad or touchscreen and i PC industrial PCs, offers improved robustness for ensuring availability of your installation.

- **Compact,** the range of Magelis display units, terminals and industrial PCs is characterised by its ease of implementation.
- **Ingenious,** the software range simplifies the design of your HMI (Human/Machine Interface) applications.

- Take advantage of these new offers that are **open** to the new information and communication technologies.

Vijeo Designer Lite configuration software enables creation of simple operator dialogue applications on Magelis XBT N, R and RT simple terminal ranges (with touch screen). It also enables transparent recovery of all applications for Magelis XBT N and R platforms produced using its predecessor: XBT L1000.

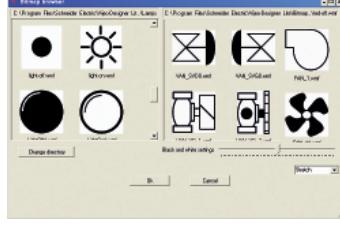

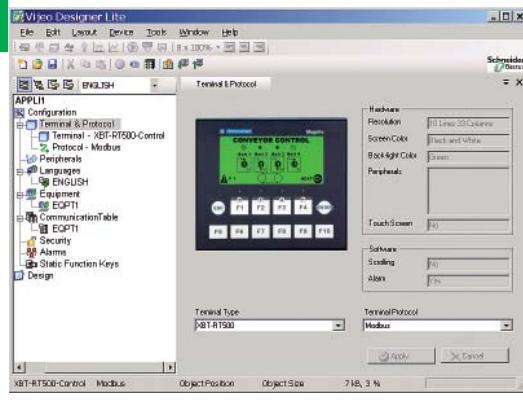

For simplified installation and improved consistency, Vijeo Designer Lite retains the main characteristics of Vijeo Designer software (ergonomics, interface ...) which has become the reference in the HMI field.

Configuration

Vijeo Designer Lite software enables fast and easy creation of different page types (application page, alarm pages, help pages...) and the installation of navigation between pages.

It offers:

- Graphic objects developed for Magelis XBT RT (bar charts, trend curves...)
- Character fonts Byzantine, simplified Chinese, Cyrillic, Japanese
- Project reports
- Application simulation on PC
- Multilingual software : English, French, German, Italian, Spanish and Chinese.

Vijeo Designer

Configuration software
for Magelis XBT GT, GK, GTW graphic terminals and
Magelis Smart and Compact *iPC* industrial PCs

Vijeo Designer configuration software enables creation of automated system control operator dialogue applications for XBT GT, GK, GTW terminals and Smart & Compact *iPC*. It also enables management of the multimedia functions of XBTGTs and Smart & Compact *iPC* (video and audio) and offers users of Ethernet terminals and *iPC* remote access via a Web browser (WEB Gate function).

Configuration

Vijeo Designer configuration software enables fast, simple processing of operator dialogue projects thanks to its ergonomics, developed around 6 configurable windows.

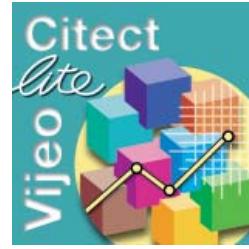

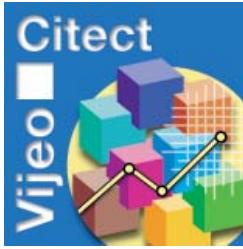

It also offers comprehensive application management tools:

- . Project creation; projects comprising one or several applications.
- . Recipe editor (32 groups of 64 recipes of max. 1024 ingredients).
- . User action list (eg. script) for application adaptability.
- . Application variable cross-referencing.
- . Vectorial graphic library for more attractive graphic screens.
- . Application block diagram documentation.
- . Simulation mode for simple design office application testing.
- . High-performance graphic editor for simple block diagram creation (over 30 animated preconfigured objects).
- . Support of layers and masks for faster development.
- . Data sharing (up to 300 variables on 8 terminals).
- . Management of 40 languages (including simplified Chinese, Korean, Arabic and Hebrew).
- . Programmable controller database sharing (Unity, PL7, Concept, TwidoSoft, ProWORX, ModSoft).
- . Advanced traceability function (periodic, at event or on request).
- . Project backup on terminal for simple maintenance.
- . User-friendly data recovery tool.
- . Support of standard USB peripherals (USB key up to 2 GB).
- . Support of external USB keyboards and mice.
- . Integration with Schneider Electric equipment (buffer diag., variables access ...)
- . Over 35 third party protocols
- Multilingual software : English, french, german, italian, spanish and chinese.

Vijeo Citect is designed for control engineers, product managers and industrial automated system integrators seeking simple configuration and high performance. It provides multi-CPU support, a multi-project Find/Replace tool and integrated XML Web service. Vijeo Citect uses the power of multi-CPU machines to offer outstanding performance.

The possibility of grouping servers from version Vijeo Citect 7.0 enables easy adaptation of SCADA architecture to that of the application for optimum performance.

Highly-developed "Find/Replace" functions enable searches in project graphic pages. The "Find" function can browse the entire project structure, offering the user a unique search engine simplifying configuration.

Industry accepts use of XML Web services as interface between different applications, and Vijeo Citect integrates a read-only Web interface. This enables access to all data, alarms and trends, and simplifies integration of Vijeo Citect in information systems.

Single data entry

Application development time is significantly reduced thanks to SpeedLink software, which enables automatic creation of variables, alarms and histories from Unity Pro applications.

In addition, Citect is compatible with Unity v2.3 Application Generator.

Added security

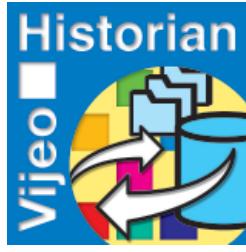

Configuration security of Vijeo Citect enables application of read-only parameters to all or certain projects within a system. The read-only parameters are based on Windows user or user group privileges to centralise access rights management. Integrators or system producers can therefore lock all or certain of their projects.

Redundancy

Vijeo Citect supports full hot standby configuration. By nominating primary and standby PLCs, Vijeo Citect automatically connects to the active device in case failure. Due to its built-in redundancy, Vijeo Citect provides switches with no loss of functionality, or performance.

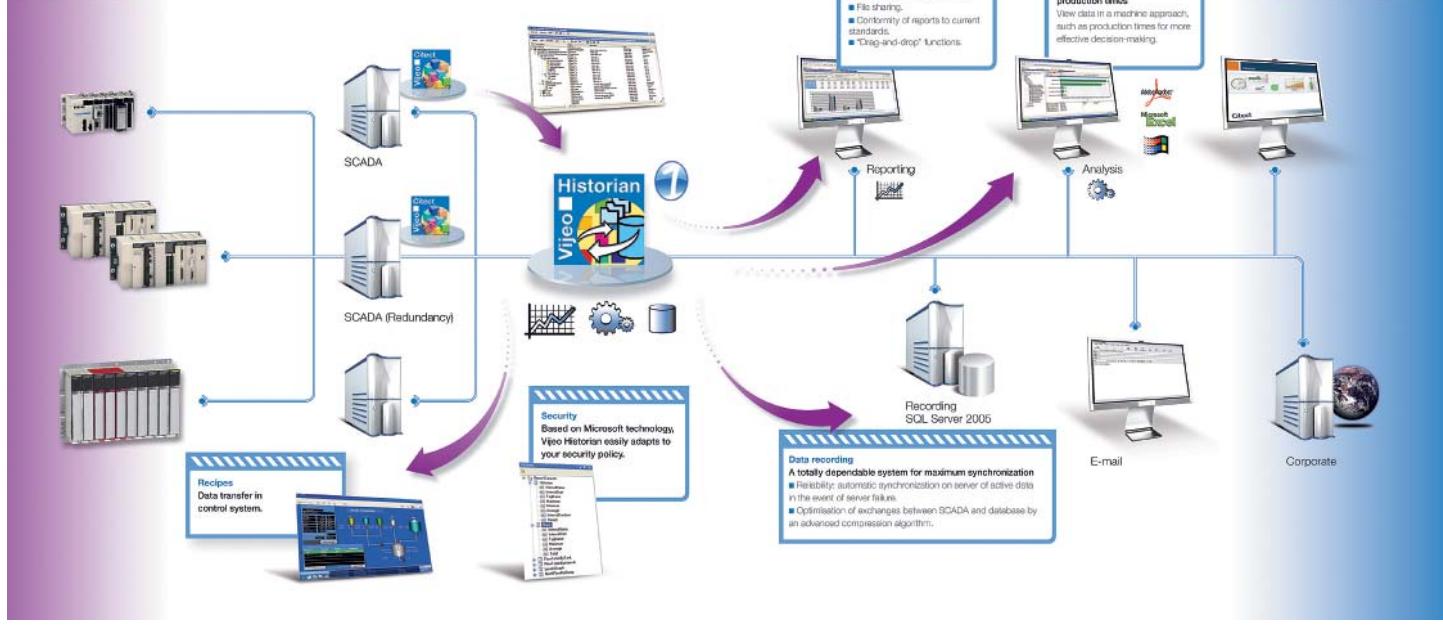

Advanced help

Vijeo Citect online help includes easy access to information and its use of "breadcrumb trails" simplifies navigation.

Vijeo Historian is a powerful factory-level reporting tool which collects, memorises and produces reports from different systems. Based on Microsoft SQL Server 2005, it is a true link between production and the information system.

Vijeo Historian offers production managers and operators clear and relevant reports to assist decision-making.

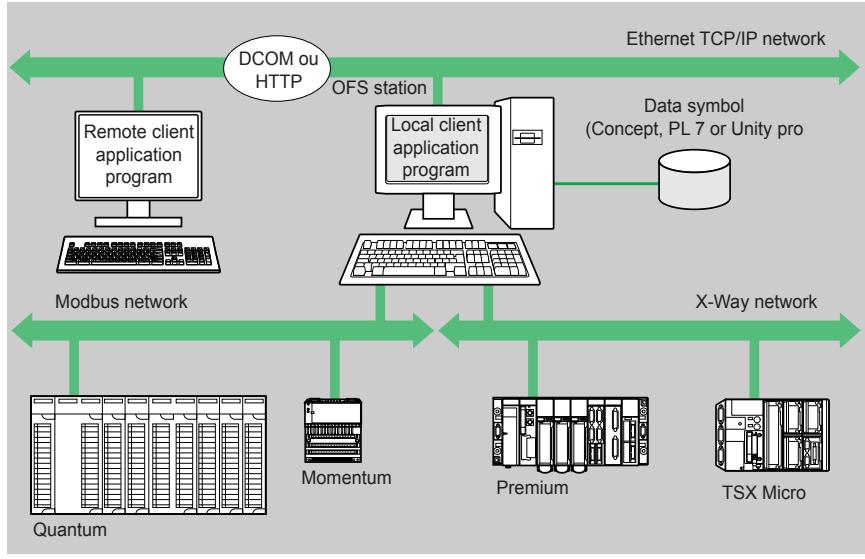

Data is directly accessible via optimisation and management software such as Microsoft Excel or Microsoft Reporting Services. Based on recognised standards, Vijeo Historian is easy to maintain.

Vijeo Historian services

- Display of data from several SCADAs
- Data analysis with Microsoft Excel
- SCADA data transfer to SQL Server 2005 database
- Report creation from standard industry tools

Description:

Based on the OPC protocols, Schneider-Electric's OFS software (**OPC Factory Server**) enables local or remote OPC client applications such as SCADA, supervisors or custom interfaces, to access Schneider devices and PLCs data in real time.

OFS software is a multi-device data server which provides simultaneous use of various communication protocols, and allows client applications to access control data via physical addresses or via symbols

Supported devices :

- Modicon Quantum, Premium, Micro, Compact and Momentum PLCs
- TSX Series 7 and April Series 1000 Schneider-Electric PLCs
- Serial Modbus or Uni-Telway devices connected via Schneider-Electric and Merlin Gerin gateways TSX ETG 10xx, EGX xxx ranges etc.

Supported networks and protocols :

- Modbus: Serial Modbus, Modbus Plus, Modbus TCP/IP.
- XWAY/UNI-TE: Uni-Telway, FIPWAY, ETHWAY, ISAWAY, PCIWAY.

Openess:

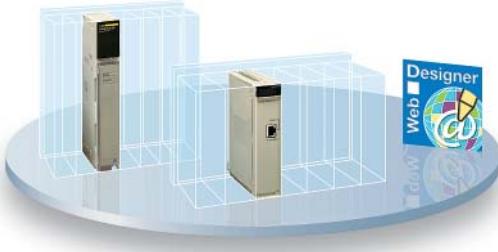

OFS V3.3, integrates the most recent specifications of the OPC Foundation:

- **OPC-DA** (OPC Data Access)
- **.NET API interface**
- **OPC XML-DA V1.0** (OPC XML Data Access)

The development of specialized interfaces is even more easy and open.

Developers and System integrators can develop custom applications (in Visual Basic, VBA for Excel, C++, etc) requiring access to Schneider Electric control devices. The OPC XML-DA V1.0 interface is designed to provide an interface for Windows and non-Windows client applications and remote access via the Internet through firewalls.

Embedded in the TCP/IP communication modules for Modicon M340, Premium and Quantum PLCs, FactoryCast Web servers provide secured access to the diagnostics, monitoring and maintenance functions of your automation installations via a simple web browser.

FactoryCast modules for PLC

"Ready to use" diagnostic and monitoring functions embedded in a PLC module accessible remotely via a simple Internet browser:

- Real-time communication based on Ethernet TCP/IP (Modbus and Uni-TE)
- Secure access to the PLC system and application diagnostics
- Numerical or graphical data monitoring and control
- E-mail notifications
- Web server open to user customization and creation of Web pages for diagnostics suited to your needs
- Library of animated graphic objects
- Open communications using SOAP/XML protocol as a server interface (Web services)

FactoryCast HMI modules for PLC

Diagnostic functions Identical as FactoryCast modules + Built-in HMI / SCADA functions embedded in a PLC module:

- Visualization of Unity Pro PLC program and Operator screens via Web pages
- PLC data acquisition
- Calculations scripts for data-processing Real-time database (1000 variables)
- Alarm and report notifications via E-mail
- Archiving of data directly into database servers (SQL, Oracle, MySQL)
- Data logging in CSV files in the module.
- Recipe management with read Database
- Dynamic HTML Reporting function
- Web server open to user Web pages customization
- Built-in Supervision via graphic screens and custom Web pages
- Data monitoring and Graphic monitoring (read/write)
- Library of animated graphic objects
- Open communication using SOAP/XML protocol as a server interface (Web services)

FactoryCast Gateways - ETG 1000 / 10.. modules

Cost-effective web gateways offer integrating in a stand-alone module:

- All Communications network interfaces: Ethernet TCP/IP, Modbus and Uni-Telway
- Remote access functions, RAS server,
- Transparent gateway / Router functions
- Notification of alarms via E-mail
- Data monitoring and Graphic monitoring (read/write)
- A user customizable Web server for creating an interface fully adapted to your needs
- Library of animated graphic objects

In the areas of distributed infrastructures, transport, RTU installations, industry and machines, ETG 1000 / 3000 modules more than satisfy your requirements for remote diagnostics and maintenance, remote monitoring and control, and remote programming.

FactoryCast HMI Gateways - ETG 3000 / 30.. modules

"All in one" Web gateway module integrating in a stand-alone device:

- a built-in modem (PSTN or GSM/GPRS) depending on the reference
- A Remote Access server function (RAS)
- 2 Ethernet ports and a Modbus serial port
- Transparent gateway / Router functions to Ethernet or Modbus serial devices
- I/O card : 6 discrete inputs/ 2 discrete outputs
- Operating temperature : -25°C to +75°C
- User customizable Web server
- Built-in Supervision via graphic screens and custom Web pages
- Data monitoring and Graphic monitoring (read/write)
- Data Acquisition, Data Processing and Data logging in the module (CSV files)
- Archiving of data directly into database servers (SQL, Oracle, MySQL)
- Alarms and reports via E-mail / SMS
- Open communication using SOAP/XML protocol as a server interface

Unity Pro is common programming software for debugging and operation of Modicon M340, Premium, Quantum and Atrium programmable controller ranges. Unity Pro takes the recognized usage values of PL7 and Concept software and offers a complete set of new functions for improved productivity and opening to other software.

Five IEC61131-3 languages are supported as standard in Unity Pro with all debugging functions, either on the simulator or directly online with the programmable controller.

Thanks to symbolic variables independent of memory, structured data and user function blocks, application objects are a direct reflection of the automated process application components.

Unity Pro operator screens are user-configured in the application from graphic libraries. Operator accesses are simple and direct.

Unity V 3.0 integrates the PLCopen standard MFB (Motion Function Block) library, simplifying installation of motion controllers on CANopen machine buses: Altivar 31, Altivar 71, Lexium 05, Lexium 15 LP, MP and HP, IcIA.

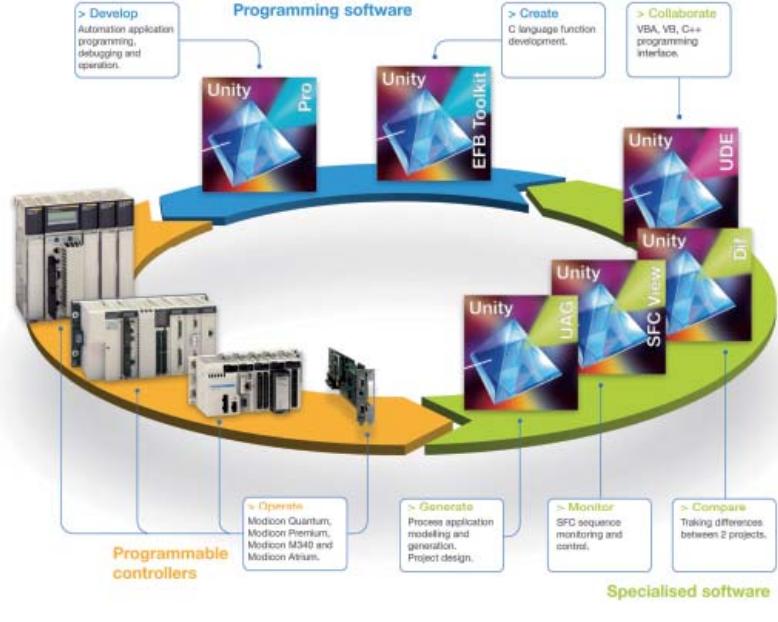

Debugging and maintenance are simplified by animated graphic objects.

For diagnostics, a window clearly and chronologically displays all system and application faults with timestamping at source.

The fault cause search navigation function enables precise location of the source of missing conditions.

XML format, the Web standard for data exchange, has been adopted as Unity application source format. By simple import/export, all or part of the application can be exchanged with other project software.

Finally, the converters integrated in Unity Pro automatically convert PL7 and Concept IEC 61131-3 standards and applications.

PL7 is the common programming, debugging and operating software for the TSX Micro and Premium ranges of PLCs as well as Atrium coprocessors (see pages 3/12, 3/18 and 3/26).

PL7 offers 4 IEC languages: Instruction List (IL), Ladder Diagram (LD), Structured Text (ST) and Sequential Function Chart (SFC). You can use the most suitable language for each function in your application, making use of the multi-tasking structure of the processors.

For using application-specific functions, PL7 directly integrates the application-specific screens required for configuration and adjustment as well as supervisory and diagnostics activities.

Programming software For Modicon Quantum, Momentum

Concept is the IEC programming software for the Momentum and Quantum range of PLCs. It provides advanced Microsoft Windows based tools that deliver a multi-language development environment for control system programming.

Uses familiar, standardized editors, bundled in a single application to create and integrate PLC control, communication and diagnostic logic.

Five IEC editors give users the freedom to choose the programming language that fits their application requirements: Function Block Diagram (FBD), Ladder Diagram (LD), Sequential Function Chart (SFC), Structured Text (ST) and Instruction List (IL).

ProWORX for Modicon Quantum, Momentum

ProWORX 32 is the flexible, easy-to-use cross-platform LL984-programming software for Modicon range PLCs. It gives you the power to program your Modicon controllers online or offline, manage your I/O subsystems, and analyze your plant's activity in real-time, all in a familiar Windows environment.

ProWORX 32 provides client/server capabilities to organize user-groups and -rights, store projects at a central location and realize office-plant floor bridging.

The project emulator provides the ability to test projects prior to running them in the PLC run-time environment to ensure your system will run at peak efficiency.

Remote display terminal

Description	The Altivar 21 drive can be connected to a remote display terminal. The display terminal can be mounted on the door of an enclosure with IP54 protection on the front panel. Max. operating temperature: 40°C Supplied with: – 1 cable with 2 RJ45 connectors, length 3.6 m – Seal and screws for IP54 mounting on an enclosure door

(1) By adding a DC choke, we get: THD ≤ 10%

(2) By adding a DC choke, we get: THD ≤ 15%

These reduced current harmonics are obtained on condition that the THDu is < 20% and the RSCE > 66%.

Resistance braking units (integrated in ATV61 drives up to 220 kW)

ATV61H●●●M3, ATV61H●●●M3X and ATV61H075N4...HC22N4, ATV61W●●●N4 and ATV61W●●●N4C drives have a built-in braking transistor.

The braking resistor enables the Altivar 61 drive to operate while braking to a standstill or during slowdown braking, by dissipating the braking energy.

Braking resistors

The network braking unit can be used to restore the following to the line supply:

- The energy from the motor
- The energy from the motors controlled by several drives connected on the same DC bus

(1) Must be used with a line choke, see page 4/26.

(2) Drive supplied without EMC filter.

(3) To order a reinforced version of the drive for specific environmental conditions, conforming to IEC 60721-3-3 class 3c2, add S337 at the end of the reference.
E.g. ATV71H075N4S337. To order drive supplied without EMC filter, add 337 at the end of the reference. E.g. ATV71HD11M3X337.

(4) To order a drive for synchronous motor with speed feedback, add 383 at the end of the reference. E.g. ATV71HO75N4383.

(5) In the reference replace the points with: N4 for 480 V - Y for 690 V.

NB : The first code of dimensions located before the slash is for 480 V speed drives. The code located after the slash is for 690 V speed drives.

Passive filters

A passive filter is used to reduce current harmonics with total harmonic distortion factors of less than 16% or 10%. These factors may be less than 10% or 5% if used with a DC choke.

(1) By adding a DC choke, we get: THD ≤ 10%

(2) By adding a DC choke, we get: THD ≤ 15%

These reduced current harmonics are obtained on condition that the THDu is < 20% and the RSCE > 66%.

ATV 71H●●M3, ATV71H●●M3X and ATV71H075N4...HC16N4 drives have a built-in braking transistor.

The braking resistor enables the Altivar 71 drive to operate while braking to a standstill or during slowdown braking, by dissipating the braking energy.

• Applies to the following drives: ATV71H...N4, ATV71W...N4

The network braking unit can be used to restore the following to the line supply:

- The energy from the motor
- The energy from the motors controlled by several drives connected on the same DC bus.

Easy Motion... for configuring the motioncontrol functions

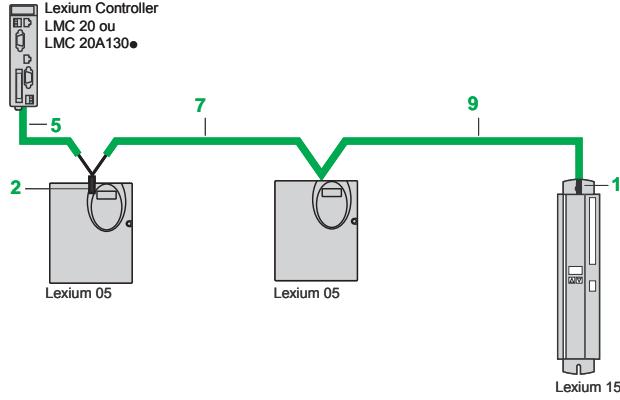

- Configuration of the axis
- Servodrive and Lexium Controller adjustment and diagnostics
- Creation of a position register by teaching
- Axis operating modes and manual control management
- Edit positioning tasks
- Edit cam profiles
- Application backup and recovery

Motion Pro... for configuring and programming the motion control functions

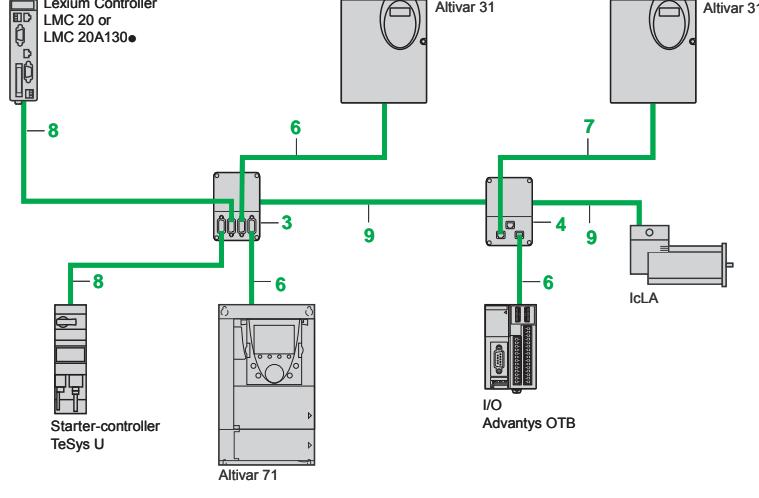

- Retains the benefits of Easy Motion for motion control
- The entire application, automation functions and motion control are realized using a programming editor IEC 61131 compliant
- Machine signature recording
- Program code protection

Unilink software for PC is a tool for configuring Lexium 15 servodrive operating parameters.

Its simple, easy-to-follow graphic interface helps to reduce setup costs.

It incorporates various functions for the setup phases, such as:

- Parameter setting
- Advanced adjustment of the various control loops
- Programming motion tasks
- Supervision

This software is available in two versions, for configuring Lexium 15 LP servodrives (Unilink L) and Lexium 15 MP/15 HP servodrives (Unilink MH).

It is supplied with the servodrive as standard.

Schneider Electric has selected GBX gearboxes made by Neugart to be used in association with the BSH and BDH servomotor ranges.

As their association with BSH or BDH servomotors has been fully qualified and they are very easy to mount, the gearboxes are simple to put into operation and risk free.

Available in 5 sizes (GBX 40... GBX 160), the planetary gearboxes are offered in 12 gear ratios (3:1...40:1).

To order a GBX planetary gearbox, complete each reference with

Motor control

TeSys range provide you more *simplicity, compactness, openness* and *flexibility*
... so many evolutions and new items to aid your productivity.

*Accurate and reliable
control of motors*

5

Increase your productivity, adopt our solutions which help to simplify setting-up.

Motor starters

- Ready-to-use component combinations, designed to work together in perfect harmony.
- Safe operation and level of coordination guaranteed by a major manufacturer.

Power circuit control

- A wide range of components.
- Solutions for a variety of power control applications: lighting, capacitor switching, heating, changeover contactor pairs, resistive loads, upstream protection.

TeSys T Motor management system

TeSys protected

TeSys T is an advanced motor management and protection system. It is able to guard against all motor malfunctions: overload, current peak, excessive consumption, etc.

TeSys U Communication modules

With open communication across CANopen, Profibus DP, Modbus, AS-interface, Advantys STB, DeviceNet and Ethernet networks, **TeSys U has openness in mind.**

Motor control components

TeSys contactors 5/2 to 5/11

- Contactors, **TeSys K, D, F, B**
- Variable composition contactors, **TeSys CV**

TeSys protection components 5/12 to 5/33

- Thermal-magnetic circuit-breakers
- Magnetic circuit-breakers
- Fuse carriers, switch-disconnector-fuses
- Thermal overload relays
- Electronic thermal overload relays
- Electronic overload relays
- Starter-controller, **TeSys T**
- Multifunction protection relays
- Switch disconnectors **Mini Vario and Vario**

TeSys starters 5/34 to 5/41

(1) Terminal blocks are supplied with terminals protected against direct finger contact and screws in the open "ready-to-tighten" position.

(2) To order a terminal block for connection by lug-clamps, the reference becomes LA7-D30646.

(3) The time for which the coil of remote tripping or electrical resetting device LA7-D03 or LAD-703 can remain energised depends on its rest time: 1 s pulse duration with 9 s rest time; maximum pulse duration of 20 s with a rest time of 300 s. Minimum pulse time 200 ms.

(4) Reference to be completed by adding the code indicating the control circuit voltage.

Class 10A with connection by lug-clamps:

Select overload relay with screw clamp terminals or connectors from the table above and add one of following suffixes:

■ figure 6 for relays LRD01 to LRD35 and LRD313 to LRD365.

■ figure A66 for relays LRD3361 to LRD3365.

Relays LRD43 are suitable as standard, for use with lug-clamps

(1) Independant mounting on a DIN rail, order an EverLink LAD96560 terminal block.

Thermal overload relays for use with unbalanced loads Class 10A**with connection by screw clamp terminals and lug-clamp terminals:**

In the reference selected above, change LRD (except LRD 4●●●) by LR3D

Above 32 A, the TeSys U controller provides a motor starter management system solution identical to that provided by the TeSys U starter-controller.

Used in conjunction with a short-circuit protection device and a contactor, it provides a motor starter whose functions are the same as those of a TeSys U starter-controller and, in particular, provides the following functions: overload protection, motor starter control and application monitoring.

It comprises a control unit, whose adjustment range is compatible with the secondary of current transformers, and a control base that also enables the fitting of a function module or communication module.

It requires a 24 V DC external power supply.

TeSys Quickfit is a modular system which standardises and simplifies the implementation of motor starters with its pre-wired control and power circuits.

Installation of a motor starter becomes quick, simple, safe and flexible.

In addition, this system:

- enables the motor starter to be customised at a later date,
- reduces maintenance time and
- optimises panel space by reducing the number of terminals and intermediate interfaces and the amount of ducting.

The motor starters concerned are those created by combining:

- GV2 ME or GV3 P circuit-breakers, with an operating limit of 80% of the maximum current at an ambient temperature of 60 °C, up to 690 V
- with 9 to 65 A TeSys D (LC1) contactors.

This offer comprises components for pre-wiring

- the power part,
- the control part.

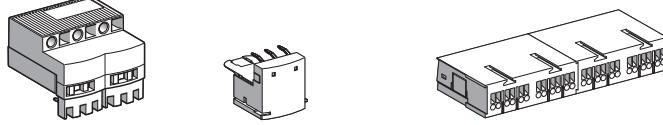

Components for pre-wiring the power part

- a power kit comprising, for each starter, a plate for mounting the contactor and the circuit-breaker, and two power connection modules,
- a power splitter box for 2 or 4 starters,
- an upstream terminal block for a power supply up to 60 A (16 mm²),
- a downstream terminal block for connecting the motor power supply cables and the earth cables (6 mm²).

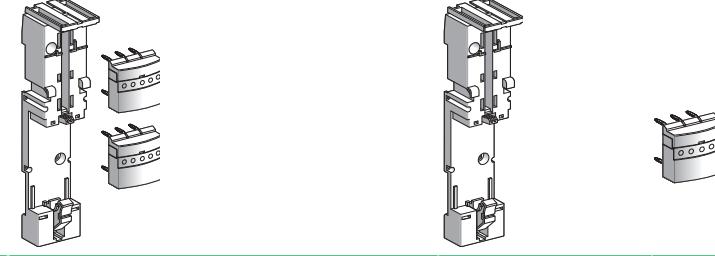

Components for pre-wiring the control part

- a control circuit connection module that mounts directly on the contactor and the circuit-breaker of each starter. This module integrates the status and control information of this particular motor starter.
- a parallel wiring module enabling grouping of the information relating to each motor starter:
- HE 10, intended for centralised applications. The information is transmitted to the PLC via the Advantys Telefast pre-wired system.
- STB, intended for decentralised automation architectures. This module is integrated in an Advantys STB configuration for connection to the PLC via a fieldbus.

Increase in operational current by parallel connection of poles

Apply the following coefficients to the currents or powers above; these coefficients take into account an often unbalanced distribution of current between the poles:

- 2 poles in parallel K = 1.6
- 3 poles in parallel K = 2.25
- 4 poles in parallel K = 2.8

Universal Power Supplies

Performance and service for your automated systems

A new generation of regulated switch mode power supplies for single and three-phase networks delivering 3 A to 40 A.

Their extremely wide operating range and their integration of a large number of new functions make them the new reference in universal power supply.

*single phase
100-240 V 7 W-145 W*

Optimum, Modular Power Supplies

Simple and compact

Designed for simple applications and machines, optimum and modular power supplies are primarily appreciated for their highly compact size.

Dedicated Power Supplies

Tailor-made for your repetitive machines...

Designed for simple and repetitive commercial machines, a range of competitive high quality dedicated power supplies.

Filtered Rectified Power Supplies

Ruggedness serving your applications

Filtered rectified models are used for supply of circuits not requiring output voltage regulation, such as: solenoid valves, contactors, etc.

Their simple and proven technology enables them to offer greatly extended working life.

Network cuts

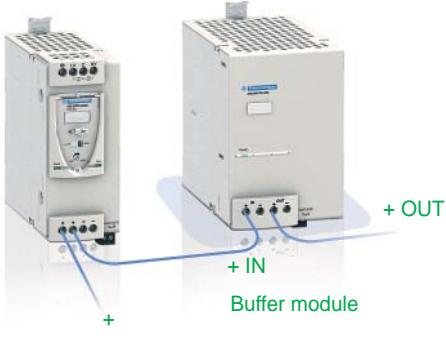

Network voltage interrupts create equipment operating irregularity that can result in production losses and even require maintenance team intervention for restarting.

Phaseo universal solutions can:

- Render microcuts «transparent» for equipment
- Enable equipment stop with necessary data backup, so allowing restart without problems at return of network voltage.

Buffer module solution

(Microcuts < few secondes)

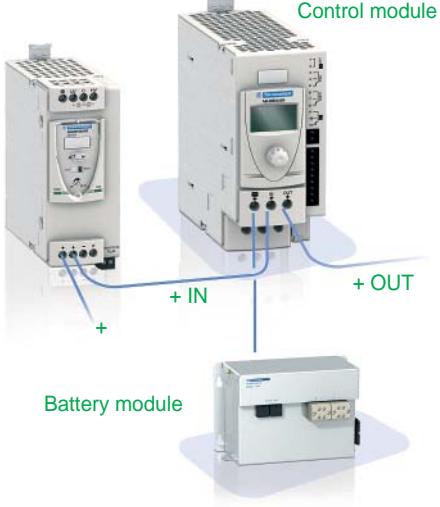

Simple and efficient

- No setting required
- Diagnostic relay contact (module charge state)
- Standard and backup circuit separation possible.

Battery backup solution

(Cuts > few secondes)

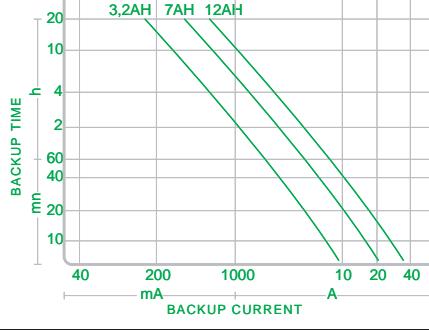

Total confidence

- Battery state automatic test
- Advanced and user-friendly diagnostics:
 - Power supply operation
 - Battery operation
 - Fault presence.

Flexible and adaptable

- 2 current supply modules are available:
 - Backup until complete battery discharge (battery is however disconnected before overdischarge)
 - Backup for an adjustable time period, keeping energy in reserve in case of a closely following cut.

Quick installation

- Copy of configuration between 2 modules using memory cartridge
- Quick configuration of battery control module by a single selector switch and display pictograms.

Other versions: please consult your Schneider Electric agency.

24 VDC circuit overload

Protection of circuits supplied in DC low voltage has traditionally been by fuses or electromechanical circuit-breakers. In certain cases (notably short-circuits) this protection is not sufficiently selective, and electronic protection of the power supply suspends low voltage supply before downstream protections can react.

The Phaseo solution is a 4-starter electronic protection module, dedicated to ABL 8R/W Universal power supplies.

Each of these starters is adjustable from 1 to 10 A.

High-performance solution ensuring service continuity

- Selectivity enabling isolation of fault circuits only
- Advanced diagnostics by LED and relay contact
- Manual opening of each circuit by switch
- Lead-sealed settings.

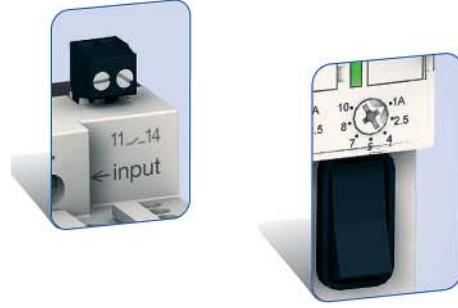

Minimised stock levels

- 1 product reference each covering 1 to 10 A.

Starter protection solution

Protection module

Availability

On certain equipment, the consequences of a 24 V control voltage breakdown can be extremely detrimental and can justify paralleling 2 or more power supplies to maintain faultless operating continuity.

The Phaseo solution consists of coupling 2 universal power supplies with an electronic redundancy module.

The primaries of these power supplies can be on the same or on different networks.

Service continuity in total confidence

- Advanced diagnostics by LED
- C/O contact enables signalling of fault in one of the 2 power supplies and alerts maintenance.

● IP 67 passive splitter boxes Advantys ABE9	7/7

Distributed I/O solution Advantys STB

● **The intelligence**
integrated in Advantys STB and its software responds perfectly to your needs by simplifying the implementation of your automation systems. She offer too a simple integration solution of human/machine dialog, motor starter, speed drives, electronic valves,...through a simple «drag&drop»

● **Simplicity:**
connectors and sockets simplify installation and commissioning; removable memory card enable island

configuration to be copied in a few seconds.

● **Adaptability:**
The modular and evolutionary design of the range, I/O modules, network interfaces and options available enable you to design a system suited to your needs.

● **Open:**
Advantys STB can be interfaced with the main fieldbuses: CANopen, DeviceNet, Ethernet, Fipio, INTERBus, Modbus Plus, Profibus DP.

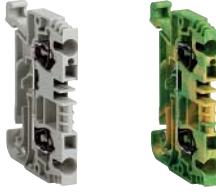

Distributed inputs/outputs

● IP 20 distributed I/O, optimised block Advantys OTB	7/8
● IP 67 distributed I/O, optimised block Advantys FTB	7/9
● IP 20 distributed I/O, modular system Advantys STB	7/10 to 7/13

ConneXium cabling system

ConneXium

ConneXium products are the industrial Ethernet-ready network devices that can provide you with integrated Ethernet solutions to unite everything in your plant, from the device level all the way to your corporate intranet.

With innovative new tools like ConneXview Industrial Ethernet Diagnostic Software, intelligent managed switches, and an ever-expanding line of cables and accessories, the ConneXium range can help you realize the benefits of open and reliable networking in the industrial environment.

A unified communication solution
based on Ethernet standards and 3rd party compatibility

Improved network performance

ConneXium switched networks limit the number of collisions in the media and increase overall network performance. Furthermore, ConneXium full duplex capability delivers a high level of determinism to your industrial Ethernet network. ConneXium IP Multicast capability supports the Publish/Subscribe and streaming protocols of today's Industrial networks.

ConneXview Ethernet Diagnostic Software

Help your network perform at peak efficiency with ConneXview, the powerful yet easy to use Ethernet network diagnostic tool. It automatically discovers and maps your networks and devices, then gives you all the tools you'll need to easily monitor and troubleshoot network operations.

Diagnosing and managing installations

ConneXium switches implement SNMP protocol to facilitate network monitoring and diagnosis of problems. A web server is embedded in every TCSESM switch to deliver complementary management services that can be accessed via any web browser.

Fault-Tolerant

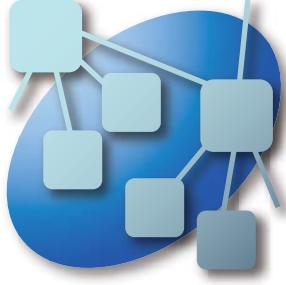

ConneXium managed switches incorporate a mechanism to support a high level of resilience. With their scalable redundant features, from single to double ring structure, it is easy to build a network that fits the specific requirements of your environment.

Introduction

ConneXview is a user friendly software tool used to diagnose industrial Ethernet networks. It provides a very easy and intuitive interface for network operators and maintenance personnel, plus a set of features and advanced functions that are of great value to system integrators and controls engineers.

Product features and functions

Automatic discovery of connected devices

ConneXview performs an automatic discovery of IP devices connected on an Ethernet network and then automatically maps the network topology and devices, providing a green/ yellow/ red color coding of links and devices to enable users to quickly evaluate the status of the network.

Client/ server architecture

ConneXView v2.0 now provides a client/ server architecture, giving you the ability to monitor your network, make routine checks on performance and troubleshoot problems, from anywhere you have access to a PC and a browser.

Alarm Notification

In the event of an alarm, you can choose to be automatically notified by eMail, pager or text message, and even get a list of all alarms and their severity.

Network Assistant

The Network Assistant is a context-sensitive help file containing topics describing every network alarm and warning reported by ConneXview. Selecting an alarm and clicking on the help button will launch the Network Assistant where you will find the alarm text message, a definition of the alarm, a list of the possible causes of the alarm, and a series of recommended actions to clear the alarm.

Device Type Editor (DTE)

ConneXview has a device-type library that enables it to identify a large number of Schneider devices. The DTE can also be used to add 3rd party devices that are not already in the library.

ConneXium shielded connection cables are available in two versions to meet the various current standards and approvals:

EIA/TIA 568 shielded twisted pair cables

These cables conform to:

- EIA/TIA-568 standard, category CAT 5E,
- IEC 11801/EN 50173 standard, class D.

Their fire resistance conforms to:

- NFC 32070# C2 classification
- IEC 322/1 standards
- Low Smoke Zero Halogen (LSZH).

AS-Interface cabling system

(Actuator Sensor Interface)

● Simplicity

A quick and expandable cabling system:

- > Only 1 cable for connecting all the components of an automation system
- > Management of communications integrated in the products

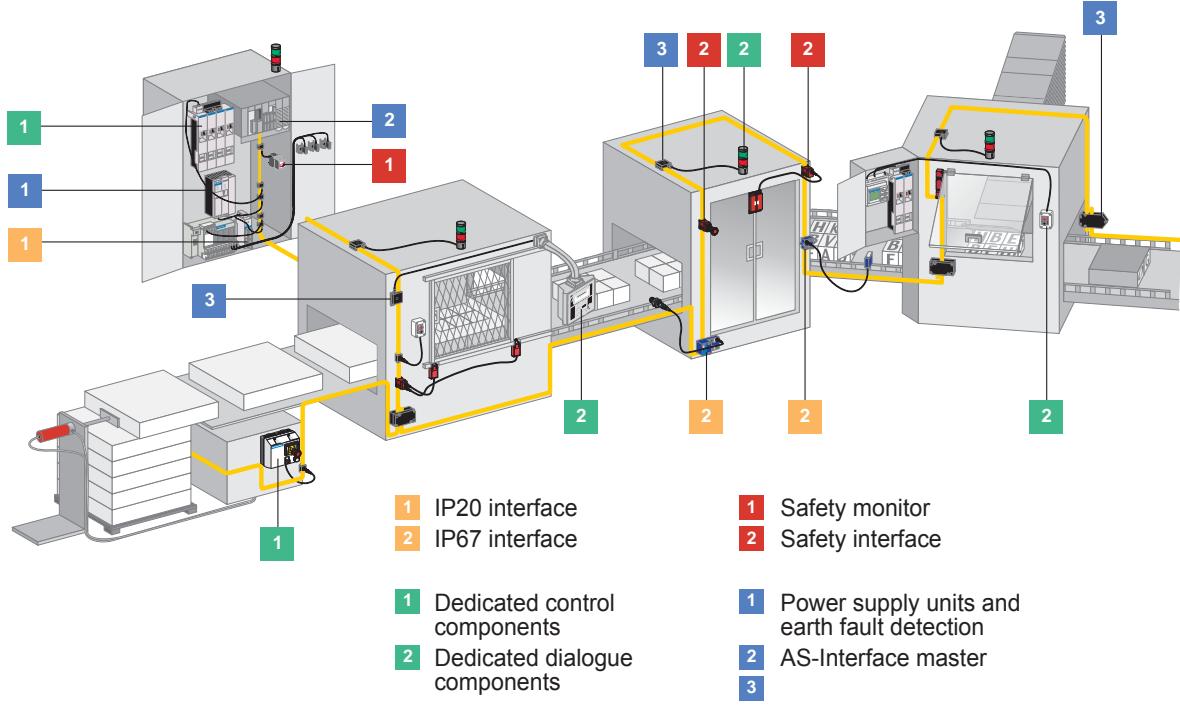

● Maximum security

AS-Interface significantly improves the reliability, availability and safety of your machine:

- > Cabling errors are eliminated
- > Risk of electrical connection failure greatly reduced
- > High immunity to electromagnetic interference (EMC)
- > The machine's safety function is fully integrated with AS-Interface Safety at Work.

● Up to 40% savings in costs

- > Savings in time for design, installation, setting-up and commissioning
- > Savings in space required in enclosures due to smaller products and elimination of intermediate boxes
- > Control cabling eliminated and reduction in cable ducting

Advantys interfaces for generic products 8/14 et 8/15

These IP20 or IP67 interfaces allow any standard automation component to be connected to the AS-Interface cable.

These handle automation functions and can be connected directly to the AS-Interface cable. An integrated circuit (ASIC) built into the products manages all interfacing functions and communication.

The incorporation of safety functions in the AS-Interface system is achieved by adding a safety monitor and safety interfaces, connected together with other standard AS-Interface components on the same yellow cable.

Sensors and actuators are connected to the processing unit by the AS-Interface system. This system comprises a cable, accessories, a master module and a power supply unit.

The terminals enable the assigning of an address to each interface and component in the system and diagnostics of the installation.

Machine safety

Preventa

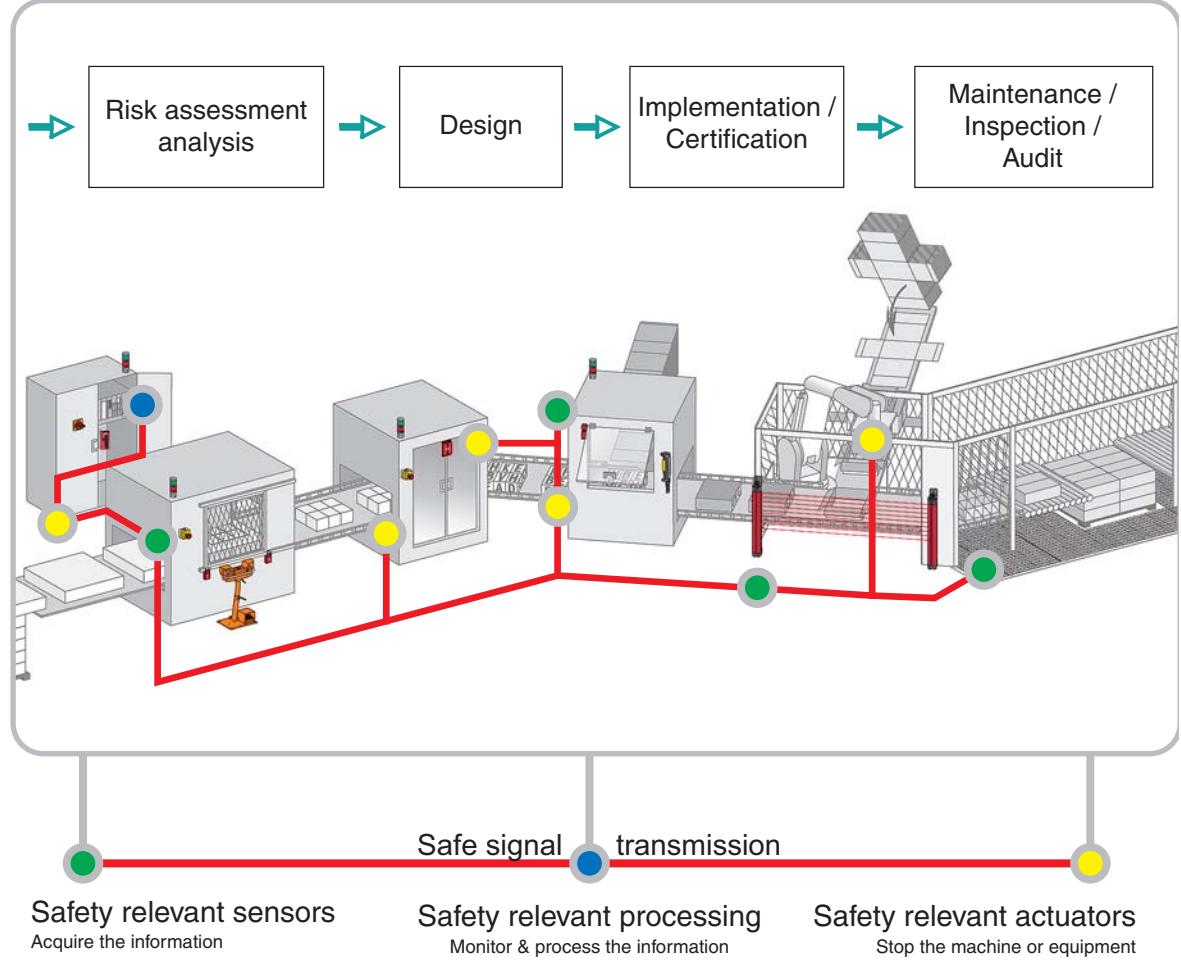

Ingenious and innovative, Preventa safety solutions provide maximum protection for all the safety functions of your automation system.

Select Preventa:

- To export your machines to any location in the world, you expect solutions that are both *approved* and *conform* to international standards.
- To maintain productivity, you need solutions *quickly* to assist you, irrespective of the circumstances.
- You seek *universal* solutions to respond to the diversity of your customers' requirements and, at the same time, *optimise* your stock.

Full safety chain:

Since a perfect safety system does not exist, the latest standards relating to functional safety and voluntary application provide new risk management methods to be used from the design stage by applying principles such as the safety integrity level (SIL) as well as extensively using established operating safety concepts.

Functional Safety and Safety Integrity Level (SIL)

Risk reduction according to EN IEC 61508

- **Safety** is achieved by risk reduction (for those hazards that cannot be designed-out).
- **Residual risk** is the risk remaining after protective measures have been taken.
- **Protective measures** realised by E/E/PE safety related systems contribute to risk reduction.

For machinery, the probability of dangerous failures per hour of a control system is denoted in EN IEC 62061 as the PFHD

- The rate of failures λ can be expressed as follows:

$$\lambda = \lambda_s + \lambda_{dd} + \lambda_{du}$$
- The calculation of the PFHD for a system or subsystem depends on several parameters:
 - the dangerous failure rate (λ_d) of the subsystem elements
 - the fault tolerance (e.g. redundancy) of the system
 - the diagnostic test interval (T2)
 - the proof test interval (T1) or lifetime whichever is smaller
 - the susceptibility to common cause failures (β)
- For each of the four different logical architectures A to D there is a different formula to calculate the PFHD. (see EN IEC 62061)
(The principal relationship is: PFHD = $\lambda_d \times 1h$)

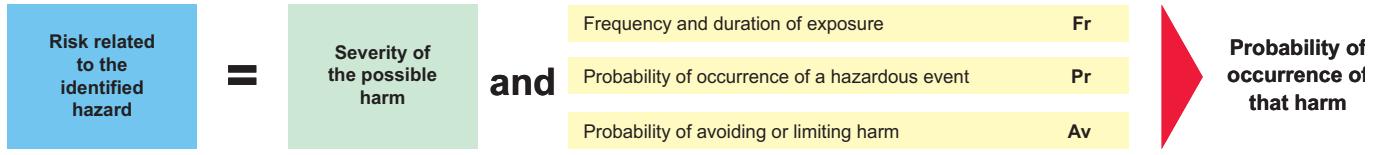

λ_s = rate of safe failures,
 λ_{dd} = rate of detected dangerous failures,
 λ_{du} = rate of undetected dangerous failures

In practice, detected dangerous failure are dealt with by fault reaction functions

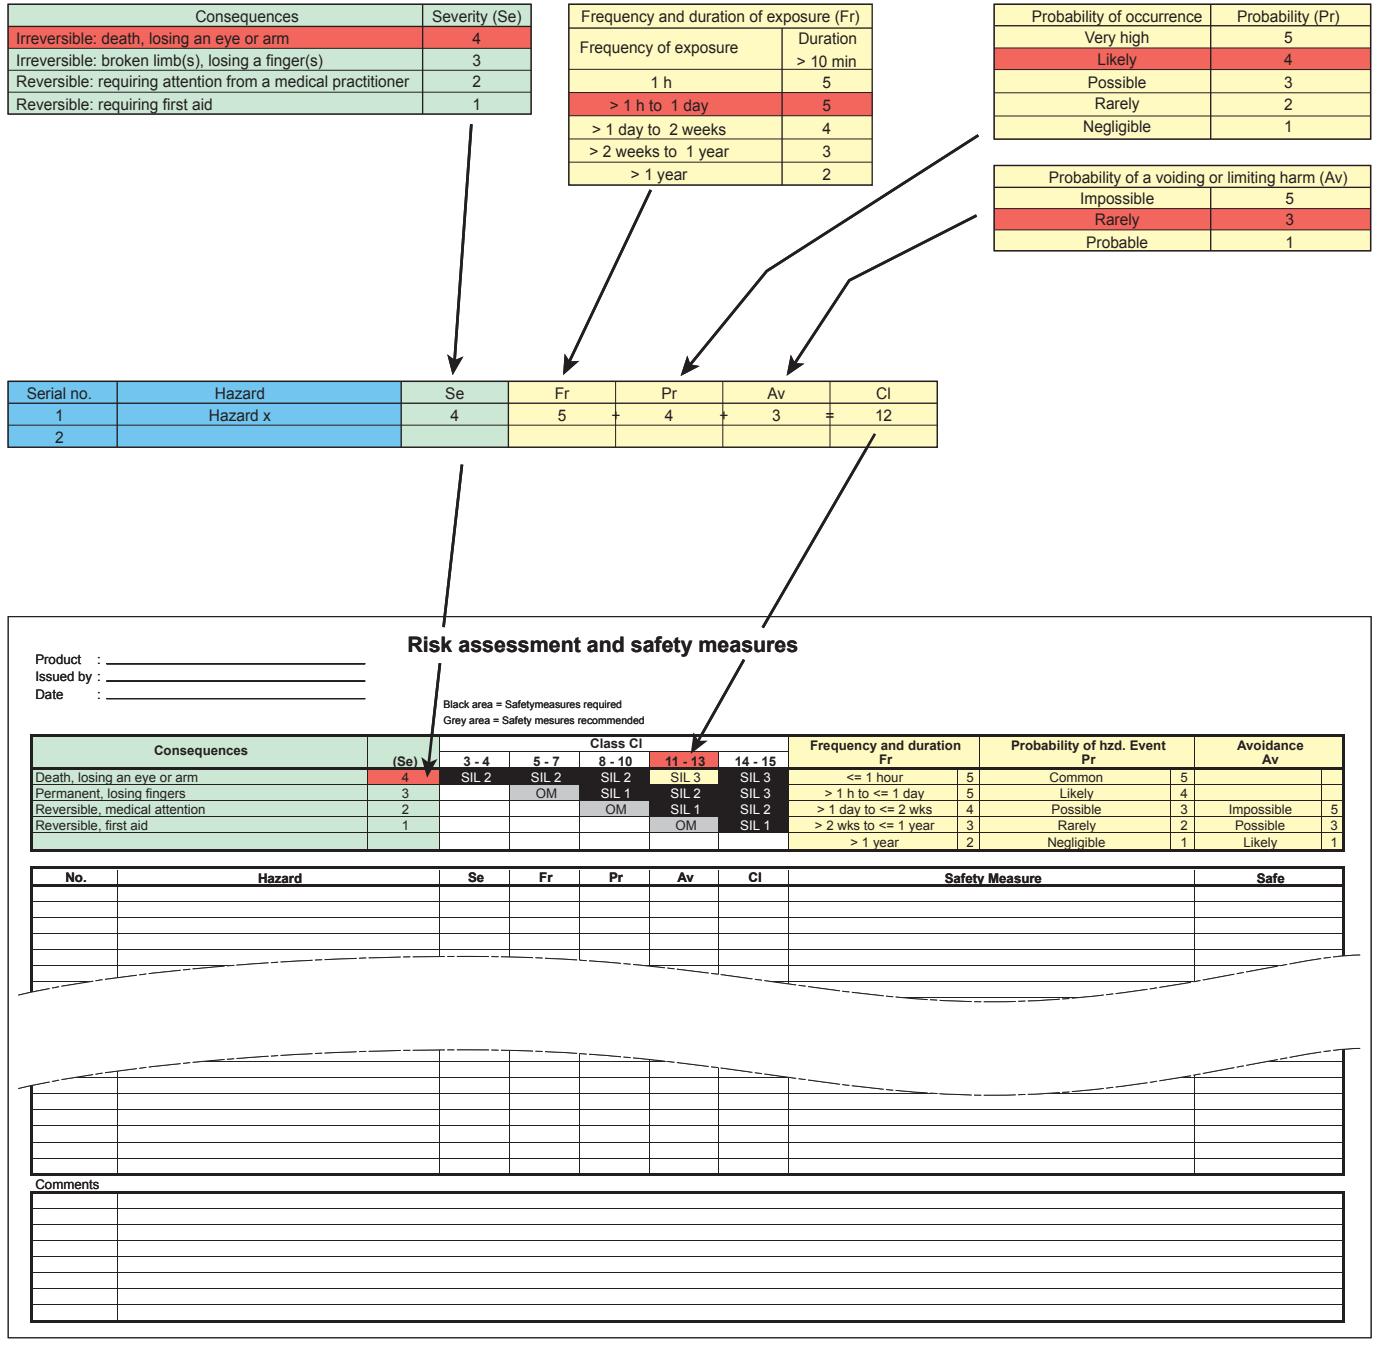

Safety integrity level SIL	High demand or continuous mode of operation (Probability of a dangerous failure per hour) PFHD
3	10^{-8} to $< 10^{-7}$
2	10^{-7} to $< 10^{-6}$
1	10^{-6} to $< 10^{-5}$

Machinery: Risk estimation and SIL assignment of EN IEC 62061

Given as an example in an informative Annex

Machinery: Determination of the required SIL. Example according to EN IEC 62061

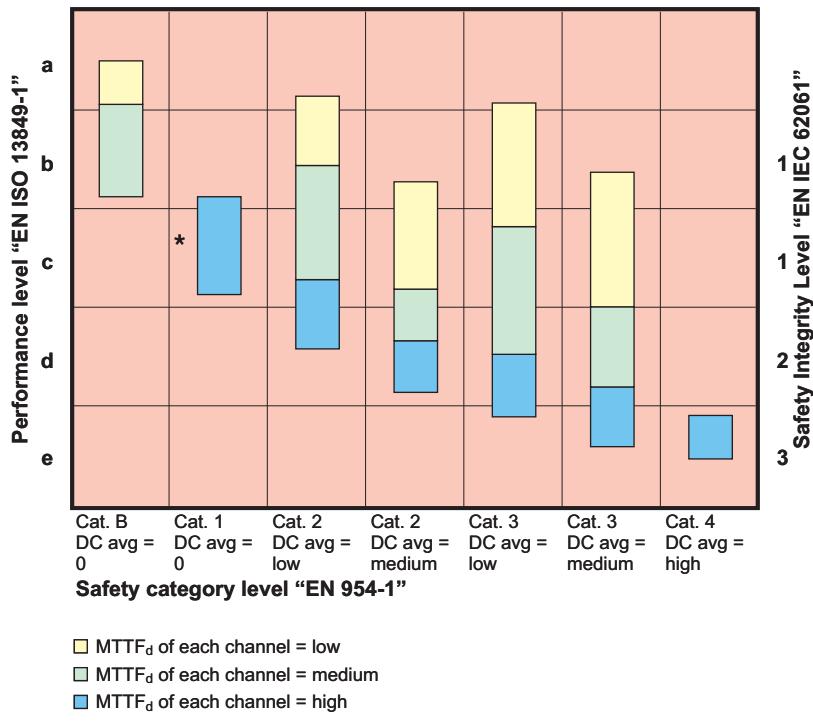

Safety of Machinery: *EN ISO 13849-1, definition of MTTF_d

The parameter for the failure rate in EN ISO 13849-1 is the Mean Time To Failure (MTTF). This time value indicates the number of years in which the first failure probably occurs.

- MTTF = mean time to failure [years]
 - The mean time after installation of devices to any first failure.
 - The general relation between λ and MTTF is:

$$MTTF = 1/\lambda$$

- MTBF = mean time between failures
 - Not relevant for devices which are not repaired.
- MTTF_d = mean time to dangerous failure
 - The MTTF_d is defined in EN ISO 13849-1 as the expectation of the mean time to dangerous failure of a safety related part of a control system.

Safety of Machinery: *EN ISO 13849-1 Risk graph and parameters

S = Severity of injury

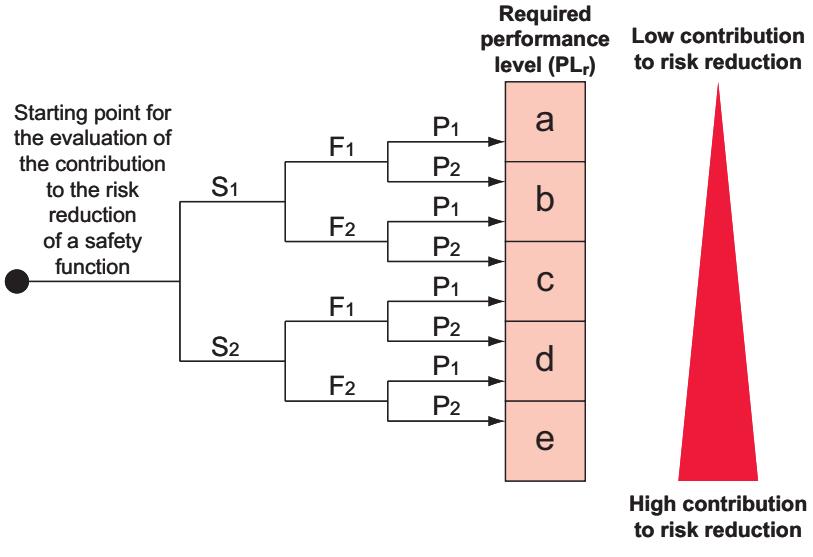

S1 = Slight (normally reversible injury)
S2 = Serious (normally irreversible) injury including death

F = Frequency and/or exposure time to the hazard

F1 = Seldom to less often and/or the exposure time is short
F2 = Frequent to continuous and/or the exposure time is long

P = Possibility of avoiding the hazard or limiting the harm

P1 = Possible under specific conditions
P2 = Scarcely possible

ASISWIN update version comprising the new ASISWIN 2+, only if the previous version of Safety Suite V1 with ASISWIN2 version 2.0.3 (ref: ASISWIN) have been already installed.

Reference: **SSVASISWINUP**

■ XPS MCWIN

XPS MC safety controllers configuration software.

SafetySuite V2 comprising Protect Area Design, ASI SWIN and XPS MCWIN (full versions) and demo version of XPS MFWIN.

Reference: **XPSMCWIN**

XPSMCWIN update version comprising the new XPSMCWIN 2.10, only if the previous version of Safety Suite V1 with XPSMCWIN version 2.0 (ref: XPSMCWIN) have been already installed.

Reference: **SSVXPSMCWINUP**

■ XPS MFWIN

XPS MF safety PLCs programming software.

SafetySuite V2 comprising Protect Area Design, ASI SWIN, XPS MCWIN and XPS MFWIN (full versions).

Reference: **SSV1XPSMFWIN**

XPSMFWIN update version comprising the new XPSMFWIN 4.1 build 6150, only if the previous version of Safety Suite V1 with XPSMFWIN version 4.1 (ref: SSV1XPSMFWIN) have been already installed.

Explosive atmospheres

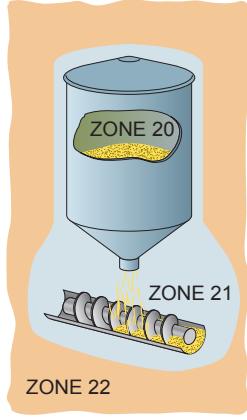

A reference for installations in ATEX Dust explosive atmospheres.

What is an explosive atmosphere according to the Directive?

It is the mixing with air, in atmospheric conditions, of flammable substances in the form of gas, vapour, mist or dust which, in the event of combustion, spreads throughout the non burning mix.

The products in this catalogue are certified by a European Union Commission notified body.

Implementation of European Directives

> Directive 99/92/EC

This requires that a risk analysis be performed for all industrial processes.

If there is any risk of an explosion:

- the zones are defined and physically identified,
- the installation is classified by governing bodies.

> Directive 94/9/EC

This requires certification of the products in accordance with the classification of the zones of use

> Dust zones

- Zone 20: area where an explosive atmosphere exists in the form of combustible clouds of dust in the air, either permanently, for long periods or frequently.
- Zone 21: area where an explosive atmosphere exists in the form of combustible clouds of dust in the air during normal operation occasionally.
- Zone 22: area where an explosive atmosphere in the form of combustible clouds of dust in the air is unlikely to occur during normal operation but, if it does occur, it is only for a short period.

Main sectors of activity subject to a higher risk of explosion or fire

A selection of certified products, conforming to the European Directive ATEX94/9/EC, to ensure maximum safety for your installations in a zone where the risk of explosion or fire is high.

Complete stations, metal or plastic

Type	Complete control stations		
Type of operators	Ø 22 flush pushbuttons		
Conformity	Directive ATEX 94/9/EC, EN 50014, EN 50281-1-1, pr IEC 61241-0, pr IEC 61241-1		
Zone D (dust)	21 - 22		
EC type examination certificate number / marking	INERIS 04ATEX0023/ Ex II2 D-Ex tD A21 IP65 T85°C		
Temperature range	- 20...+ 60°C		
Degree of protection	IP65		
Connection	1 entry fitted with ISO M20 cable gland		
Rated operational characteristics of contact blocks	AC15; A600 (Ue = 600 V, le = 1.2 A or Ue = 240 V, le = 3 A or Ue = 120 V, le = 6 A) DC13; Q600 (Ue = 600 V, le = 0.1 A or Ue = 250 V, le = 0.27 A or Ue = 125 V, le = 0.55 A)		
Short-circuit protection	By 10 A cartridge fuse type gG (gl)		
Function	1 function, Start or Stop	2 functions, Start - Stop	3 functions
Composition	1 spring return pushbutton	2 spring ret. pushbuttons	3 spring ret. pushbuttons
