

June 29, 2007

Dear Steven Engineering Customer:

Back in 1978, Square D launched the Telemecanique XA2B and XB2B 22mm push button product offering, which became the world's most popular push button line. In September, 1999, they launched the Telemecanique XB4 and XB5 push buttons to replace the old XA2B and XB2B product lines,. Effective immediately, the old XA2B and XB2B are no longer available. Over 120 million of the XB4 and ZB4 push button lines have been sold. This line has many advantages over the now obsolete XA2B and XB2B, such as

- Easier and quicker mounting
- Being tamperproof from the front of the panel
- Superior selector switch action
- Super bright LEDs as standard
- Can mount 3 contact clocks in the single depth

Should you require assistance when placing an order for replacements, or updating your in-house documentation, please do not hesitate to contact anyone in our Technical Services department. Additionally, anyone in our Inside Sales department can assist you in fulfilling any of your other electrical, electronic and/or pneumatic needs.

Sincerely,

Paul E. Burk III
Vice President of Marketing
