Industrial Edge control for IIoT

Modicon IIoT-native edge controllers manage complex interfaces across assets and devices or directly into the cloud, with embedded safety and cybersecurity. **Modicon** provides performance and scalability for a wide range of industrial applications up to high-performance multi-axis machines and high-available redundant processes.

Explore our offer

Life Is On Schneider Electric

General content

Modicon® TM7
High-Performance and Safe IP67 Distributed I/O System

To be competitive in today's digital era, machine builders must be innovative. Smart machines, those that are better connected, more flexible, more efficient, and safe, are enabling machine builders to innovate in ways never before possible.

EcoStruxure, Schneider Electric's open, IoT-enabled architecture and platform, offers powerful solutions for the digital era. As part of this, EcoStruxure Machine brings powerful opportunities for machine builders and OEMs, empowering them to offer smart machines and compete in the new, digital era.

EcoStruxure Machine brings together key technologies for product connectivity and edge control on premises, and cloud technologies to provide analytics and digital services. EcoStruxure Machine helps you bring more innovation and added value to your customers throughout the entire machine life cycle.

Innovation at Every Level for Machines is full systems across three layers:

– Connected products
Our connected products for measuring, actuating, device level monitoring, and control adhere to open standards to provide unmatched integration opportunities and flexibility

– Edge Control
We are IIoT-ready with a proven set of tested and validated reference architectures that enable the design of end-to-end open, connected, and interoperable systems based on industry standards. Ethernet and OPC UA facilitates IT/OT convergence meaning machine builders reap benefits from web interfaces and cloud.

– Apps, Analytics & Services
Seamless integration of machines to the IT layer allows the collection and aggregation of data ready for analysis – for machine builders and end users alike this means increased uptime and the ability to find information faster for more efficient operations and maintenance.

These levels are completely integrated from shop floor to top floor. And we have cloud offers and end-to-end cybersecurity wrapped around.

EcoStruxure Machine makes it easier for OEMs/ machine builders to offer their customers smarter machines. The advent of smart machines is driven by the changing needs of end users:

– Evolving workforce
– Reducing costs
– Dynamic markets
– Shorter life cycles
– Prioritizing safety and cybersecurity

EcoStruxure Machine provides one solution for the whole machine life cycle:

– With Smart Design & Engineering the time to market is reduced by up to 30% using our automated engineering and the simulation capabilities

– During Commissioning & Operation of the machine, resources such as energy, material and loss can be improved, and with seamless integration to the IT world efficiency can be improved by up to 40%

– Smart Maintenance & Services reduces the time for corrective actions up to 50%

EcoStruxure™ Innovation At Every Level **Machine**

* The Schneider Electric industrial software business and AVEVA have merged to trade as AVEVA Group plc, a UK listed company. The Schneider Electric and Life is On trademarks are owned by Schneider Electric and are being licensed to AVEVA by Schneider Electric.

High-Performance and Safe IP67 Distributed I/O System
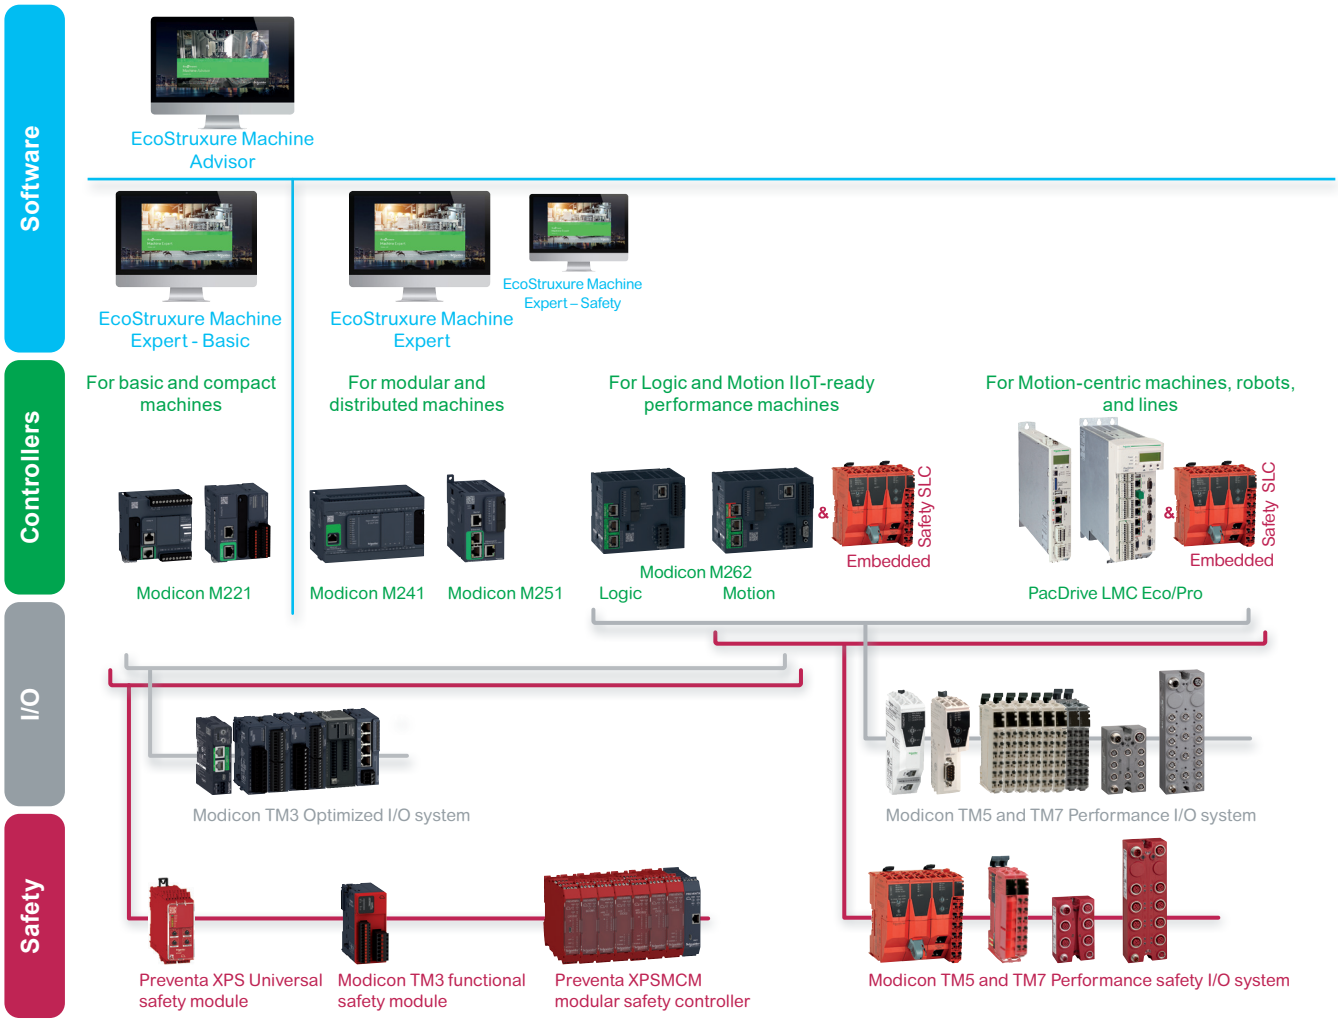
Machine Automation

Machine Automation



Machine control

> From basic to motion- and robot-centric machines with the PacDrive 3 offer, Modicon controllers and solutions bring a consistent and scalable response to achieving flexibility, performance, productivity, and digitization.

The scalability and consistency of I/O ranges allow you to select the right offer depending on your needs

> Modicon TM3 Optimized I/O system for more compact and modular machines
> Modicon TM5 for more performance-demanding machines, with Modicon TM7 for harsh environments; Both Performance I/O ranges (Modicon TM5 and TM7) allow safety functions to be implemented using the Modicon TM5CSLC safety logic controller

Embedded Safety provides holistic solutions to Modicon M262 and PacDrive LMC controllers, increasing overall safety demand in Machine Automation

> Preventa XPS Universal safety modules cover a wide range of safety functions, suitable for small applications with 4-5 safety functions, with diagnostic information provided to controllers via a single wire connection
> Modicon TM3 safety functional modules are suitable for small applications covering E-Stop functions and diagnostics via TM3 bus
> Preventa XPSMCM modular safety controllers are suitable for medium size applications with up to 20 safety functions and diagnostics via Modbus TCP, EtherNet/IP, EtherCAT, or Profinet

All these devices are managed within a single software, EcoStruxure Machine Expert, a powerful and collaborative engineering environment

> **EcoStruxure Machine Expert – Safety** optional addon for programming safety logic controllers
> **EcoStruxure Machine Expert – Basic** software for programming Modicon M221 logic controllers: an intuitive standalone environment accessible to basic skilled technicians
> **EcoStruxure Machine Advisor** is a cloud-based services platform designed for machine builders to track machines in operation worldwide, monitor performance data, and resolve exceptional events, while reducing support costs by up to 50%

Machine Automation

Comprehensive Schneider offers for machine builders

> Lexium servo drives, motors, and robotics are designed to control applications ranging from a single independent axis up to high-performance synchronized multi-axis machines requiring high-speed and precise positioning and movements

Robotics

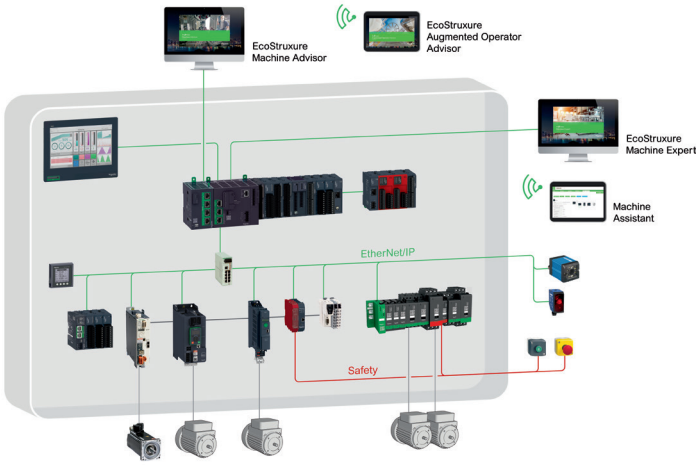
Integrated drives

Servo Drives & Motors

Steppers Drives & Motors

> The Lexium offer is designed for a broad range of motion-centric machines in applications such as Packaging, Material Handling, Material Working, Food and Beverage, and Electronics

> Schneider Electric has developed Tested Validated & Documented Architectures (TVDA) applicable for generic machine control applications as well as for dedicated segment applications such as Packaging, Material Working, Material Handling, Hoisting, Pumping, or generic Machine Control applications



Choose Schneider Electric to help secure your investment and benefit from worldwide services at every step of your project

Renew
Being your expert to control and renew your aging equipment at the right time and at optimal cost

Optimize
Identifying how you can get even more out of your equipment and further improve your return on investment

Plan
Discussing your maintenance policy and needs arising from it

Install
Delivering services to help ensure your equipment is set up reliably and starts to operate efficiently from day one

Operate
Providing services to support you during normal operations as well as during maintenance breaks and in unexpected situations
Collaborating to maximize your uptime and performance as well as become more proactive in operations

> From planning and inception to modernization, we help ensure optimal technical and business performance. Our field service engineers combine 30+ years of manufacturer-level experience with the latest technology to bring innovation to every level of our offer, and every step of your project.

> Our machine control dedicated services empower you to maximize your business infrastructure and face increasingly stringent demands on productivity, safety, equipment availability, and performance optimization.

Modicon TM7

High-Performance and Safe IP67 Distributed I/O System

Presentation of the range

Digital I/O expansion block

Analog I/O expansion block

Power distribution block

Safety I/O blocks

CANopen interface blocks with digital I/O

DIA3ED2131204EN

Modicon TM7 range

The Modicon TM7 offer has been developed to create flexible, scalable I/O configurations for automation solutions based on Modicon and PacDrive controllers:
- Modicon M258 logic controllers
- Modicon LMC058 and LMC078 motion controllers
- PacDrive LMC Eco/Pro/Pro2 motion controllers
- Modicon M262 logic/motion controllers

The IP67 protection of these blocks enables them to be used within processes or machines in harsh environments (where there is a risk of splashing water, oil, dust, etc.) and offers the following advantages:
- ingress protection
- ruggedness and compactness
- rapid wiring, economical use

This I/O system is compatible with EcoStruxure Machine Expert software.

Digital blocks

The offer comprises input blocks, configurable I/O blocks, and an output block.
See page 10

Analog blocks

The offer comprises:
- expansion blocks with 4 inputs for connecting 4 sensors
- expansion blocks with 4 outputs for connecting 4 actuators
- expansion blocks with 2 inputs and 2 outputs
- expansion blocks with 4 resistive temperature probe or thermocouple temperature measurement channels

See page 14

Power distribution block

A power distribution block is available as an option to power I/O expansion blocks on the TM7 expansion bus.
This power distribution block is necessary to avoid voltage drops in the following situations:
- With a TM5SBET7 transmitter module *(1)* followed by 6 *(2)* TM7 I/O expansion blocks (mounted vertically)
- With a TM7NCOM08B CANopen interface block followed by 4 *(2)* TM7 I/O expansion blocks
- With a TM7NCOM16A/16B CANopen interface block followed by 18 *(2)* TM7 I/O expansion blocks

See page 19

***Note**: These limits must be weighted according to the cable lengths. Please refer to the SPIG (System Planning and Installation Guide) for the Modicon TM7 IP 67 block offer on our website www.schneider-electric.com*

Safety blocks

The offer also comprises safety I/O blocks. These blocks complement the Modicon TM5 safety offer *(1)* on the Sercos bus.
See page 19

CANopen interface blocks with digital I/O

The CANopen interface block offer comprises IP67 blocks that connect to a CANopen bus and have digital channels that can be configured as inputs or outputs, including:
- A CANopen interface block with 8 configurable I/O for connection via M8 connector
- Two CANopen interface blocks with 16 configurable I/O

See page 20

Connection accessories

A range of cables and connectors is available for connecting the CAN bus, TM7 expansion bus, I/O, and the 24 V ⎓ power supplies on TM7 expansion blocks.
See page 26

High-Performance and Safe IP67 Distributed I/O System

Modicon TM7 expansion system

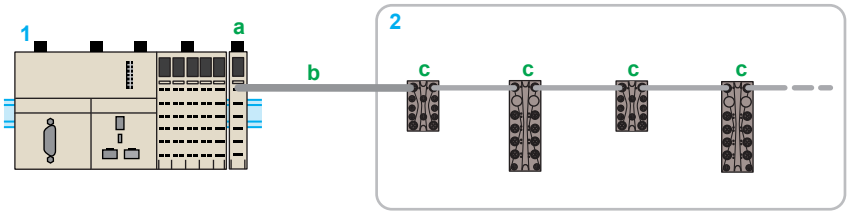
Diagnostic functions

Modicon TM7 expansion system

EcoStruxure Machine Expert software is used to configure the remote I/O and distributed I/O islands.

Remote I/O configuration

The TM5SBET7 bus expansion module (transmitter module) *(1)* is used to create remote I/O islands.

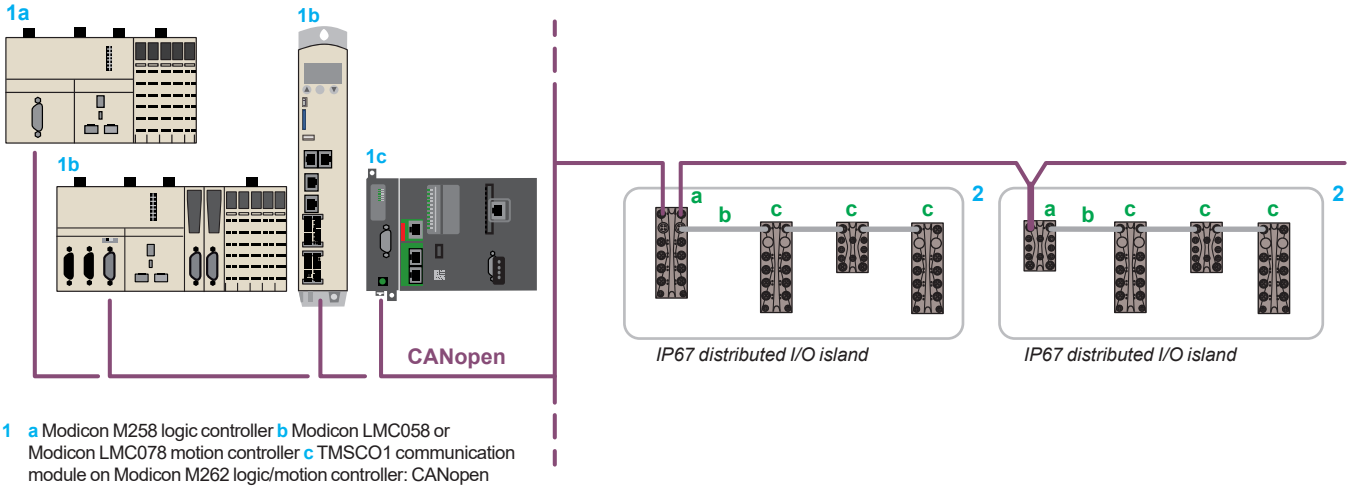


IP67 remote I/O island

1 M258 logic controller/LMC058 motion controller + TM5SBET7 transmitter module (**a**) *(1)*
2 IP67 distributed I/O island: TM7 bus expansion cable (**b**) + TM7 digital/analog expansion blocks (**c**)

Distributed I/O configuration

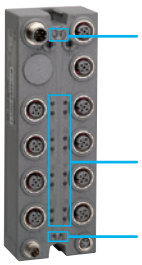
Modicon TM7 CANopen interface blocks are used to create distributed I/O islands on the CANopen bus. See page 22



1 **a** Modicon M258 logic controller **b** Modicon LMC058 or Modicon LMC078 motion controller **c** TMSCO1 communication module on Modicon M262 logic/motion controller: CANopen bus masters
2 TM7 CANopen interface block (slave) (**a**) + TM7 bus expansion cable (**b**) + TM7 digital/analog blocks (**c**)

(1) Modicon TM5 transmitter module: please refer to catalog ref. DIA3ED2131204EN

Diagnostic functions



The diagnostics for monitoring detected faults are indicated by LEDs on the expansion blocks and power distribution blocks and inform the control system (Modicon M258 logic controller or Modicon LMC058 motion controller) via the TM7 bus.
Each Modicon TM7 block has LEDs for:
- displaying the status of the TM7 bus, channels, and power supply
- quick, precise location of a detected fault

There are several levels of diagnostics:
- Channel diagnostics: state of inputs and outputs
- Expansion block diagnostics:
  - Presence of sensor/actuator power supply
  - Undervoltage fault detected on the I/O power supply
  - Analog input diagnostics
  - Short-circuit or overload on one or more digital outputs
- Communication bus diagnostics:
  - On CAN bus (CANopen interface block)
  - On TM7 expansion bus (CANopen interface block and I/O expansion blocks)
- Power supply diagnostics via the TM7 bus (expansion block only)

Modicon TM7

High-Performance and Safe IP67 Distributed I/O System

Digital I/O blocks

Description

Digital I/O expansion blocks

8-channel digital I/O expansion blocks have the following on the front panel:

1 A male M12 connector (bus IN) and a female M12 connector (bus OUT) for connecting the TM7 expansion bus
2 A slot for the expansion block label *(1)*
3 Two bus diagnostic LEDs
4 Eight female M8 connectors for connecting sensors and actuators with channel status LEDs
5 Two LEDs indicating the status of the 24 V ⎓ sensor and actuator power supplies
6 Two M8 connectors for connecting the 24 V ⎓ sensor and actuator power supplies (male for PWR IN, female for PWR OUT)
7 Mounting using two Ø 4 screws (not supplied) and connection of the functional ground when block is mounted on a metal support

16-channel digital I/O expansion blocks have the following on the front panel:

1 A male M12 connector (bus IN) and a female M12 connector (bus OUT) for connecting the TM7 expansion bus
2 A slot for the expansion block label *(1)*
3 Two bus diagnostic LEDs
4 Eight M12 connectors (2 channels per connector) or sixteen M8 connectors for connecting sensors and actuators with channel status LEDs
5 Two LEDs indicating the status of the 24 V ⎓ sensor and actuator power supplies
6 Two M8 connectors for connecting the 24 V ⎓ sensor and actuator power supplies (male for PWR IN, female for PWR OUT)
7 Mounting using two Ø 4 screws (not supplied) and connection of the functional ground when block is mounted on a metal support

Modicon TM7

High-Performance and Safe IP67 Distributed I/O System

Analog I/O blocks

Description

Analog I/O expansion blocks

Analog I/O expansion blocks have the following on the front panel:

1. A male M12 connector (bus IN) and a female M12 connector (bus OUT) for connecting the TM7 expansion bus
2. A slot for the expansion block label *(1)*
3. Two bus diagnostic LEDs
4. Four female M12 connectors for connecting sensors and/or actuators with channel status LEDs
5. Two LEDs indicating the status of the 24 V ⎓ sensor and actuator power supplies
6. Two M8 connectors for connecting the 24 V ⎓ sensor and actuator power supplies (male for PWR IN, female for PWR OUT)
7. Mounting using two Ø 4 screws (not supplied) and connection of the functional ground when block is mounted on a metal support

(1) Label-holder supplied with IP67 block

Safety I/O blocks compatibility	
	TM7SDI8DFS, TM7SDM12DTFS
Local and remote I/O	–
Distributed I/O	With TM5 Sercos interface block - PacDrive LMC Eco/Pro/Pro2 motion controllers - Modicon M262 logic/motion controller

Modicon TM7 safety I/O blocks are IP67 I/O dedicated to safety-related applications.
Two versions are available:
- One with 8 safety digital (sink) inputs and 2 non-safety digital inputs
- One with 8 safety digital (sink) inputs and 4 safety digital outputs

Modicon TM7 safety I/O expansion blocks use a power bus and a data bus to operate:
- The TM7 power bus distributes power to supply the electronic components of the TM7 safety I/O blocks. It is powered by the Modicon TM5SBET7 transmitter module.
- The TM7 data bus transmits data between the Sercos bus interface and the TM7 expansion modules.

Modicon TM7

High-Performance and Safe IP67 Distributed I/O System

CANopen interface blocks

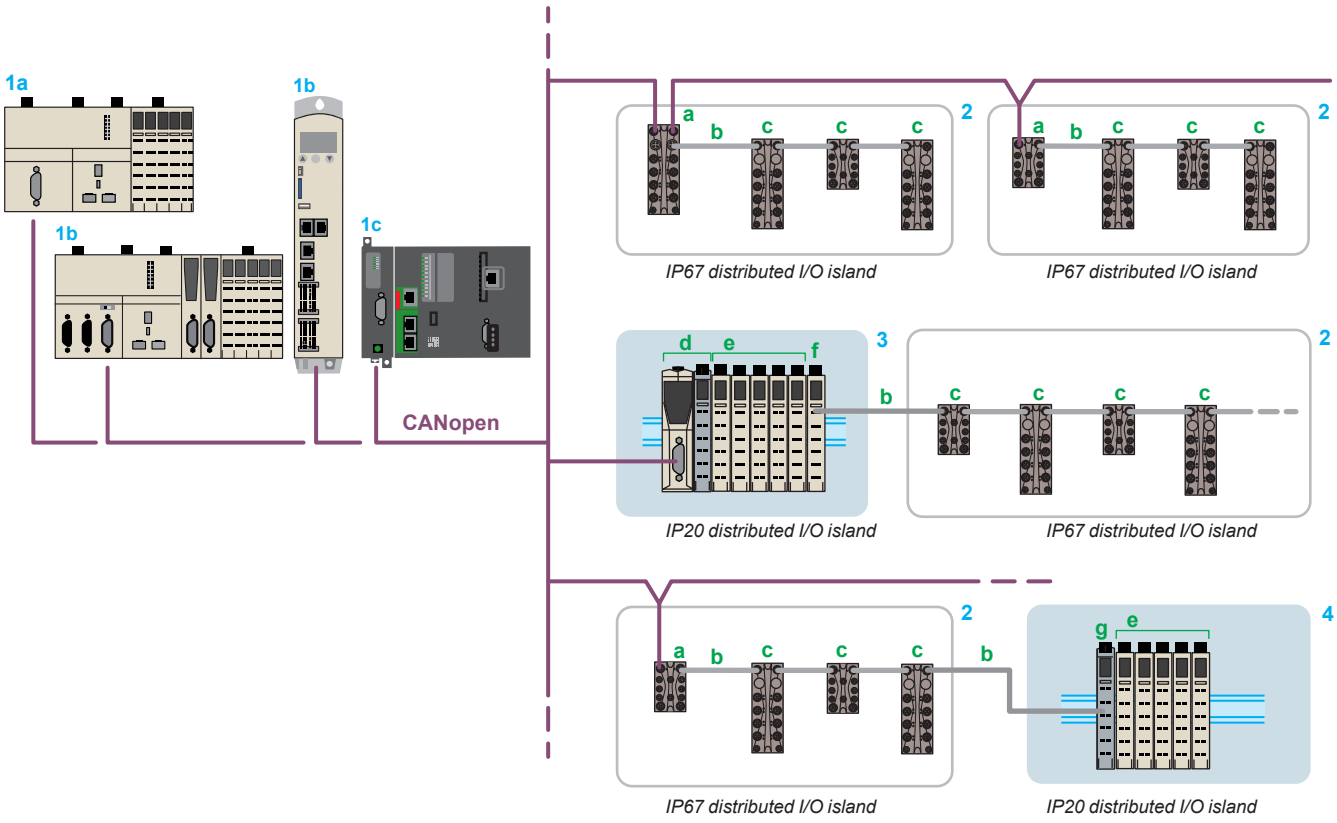
Presentation

The Modicon TM7 CANopen interface blocks enable sensors and actuators distributed over machines to be connected via the CANopen fieldbus. These interface blocks communicate on the bus. They have one part for connecting sensors and actuators using M8 or M12 connectors and one part for connections to the CANopen fieldbus.
IP67 protection means that these blocks can be used within processes or machines in harsh environments (where there is a risk of splashing water, oil, or dust, etc.).
They have the following characteristics:
- Ingress protection
- Ruggedness and compactness
- Rapid wiring, economical use

The offer comprises:
■ A CANopen interface block with 8 configurable I/O for connection via M8 connector
■ Two Modicon TM7 CANopen interface blocks with 16 configurable I/O

The following components complete the offer:
- digital I/O expansion blocks
- analog input expansion blocks
- power distribution block
- connection accessories



1 **a** Modicon M258 logic controller **b** Modicon LMC058 or Modicon LMC078 motion controller **c** TMSCO1 communication module on Modicon M262 logic/motion controller: CANopen bus masters

Modicon TM7

High-Performance and Safe IP67 Distributed I/O System

CANopen interface blocks

Diagnostic functions

The diagnostics for monitoring detected faults are indicated by LEDs on the Modicon TM7 CANopen interface blocks and inform the control system (Modicon M258 logic controller or Modicon LMC058 motion controller) via the TM7 bus.
Each Modicon TM7 interface block has LEDs for:

- displaying the status of the TM7 bus, channels, and power supply
- quick, precise location of a detected fault

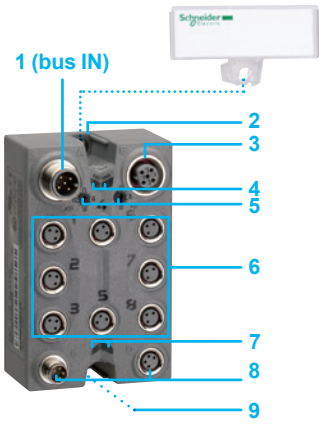
Diagnostics are performed at the following levels:

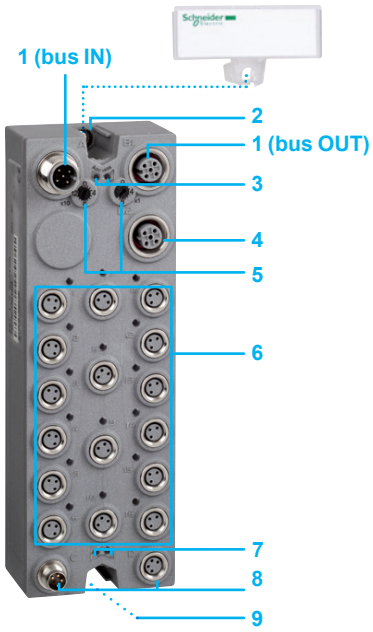
- Channel diagnostics:
  - State of inputs
  - State of outputs
- Communication bus diagnostics:
  - On CAN bus (CANopen interface block)
  - On TM7 expansion bus (CANopen interface block and I/O expansion blocks)

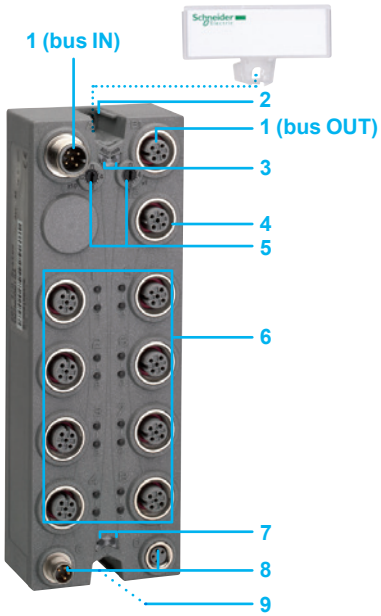
Modicon TM7

High-Performance and Safe IP67 Distributed I/O System

CANopen interface blocks







Description

Modicon TM7 CANopen interface blocks

Modicon TM7 **8-channel** CANopen interface blocks have the following on the front panel:

1 A male M12 connector (bus IN) for connecting the CANopen bus
2 A slot for the interface block label *(1)*
3 A female M12 connector for connecting the TM7 expansion bus
4 Two bus diagnostic LEDs
5 Thumbwheels for addressing on CANopen bus
6 Eight female M8 connectors for connecting sensors and actuators with eight channel status LEDs
7 Two LEDs indicating the status of the 24 V ⎓ sensor and actuator power supplies
8 Two M8 connectors for connecting the 24 V ⎓ sensor and actuator power supplies (male for PWR IN, female for PWR OUT)
9 Mounting using two Ø 4 screws (not supplied) and connection of the functional ground when block is mounted on a metal support

Modicon TM7 **16-channel** CANopen interface blocks have the following on the front panel:

1 A male M12 connector (bus IN) and a female M12 connector (bus OUT) for connecting the CANopen bus
2 A slot for the interface block label *(1)*
3 Two bus diagnostic LEDs
4 A female M12 connector for connecting the TM7 expansion bus
5 Thumbwheels for addressing on CANopen bus
6 Eight M12 connectors (2 channels per connector) or sixteen M8 connectors for connecting sensors and actuators with channel status LEDs
7 Two LEDs indicating the status of the 24 V ⎓ sensor and actuator power supplies
8 Two M8 connectors for connecting the 24 V ⎓ sensor and actuator power supplies (male for PWR IN, female for PWR OUT)
9 Mounting using two Ø 4 screws (not supplied) and connection of the functional ground when block is mounted on a metal support

Modicon TM7

High-Performance and Safe IP67 Distributed I/O System

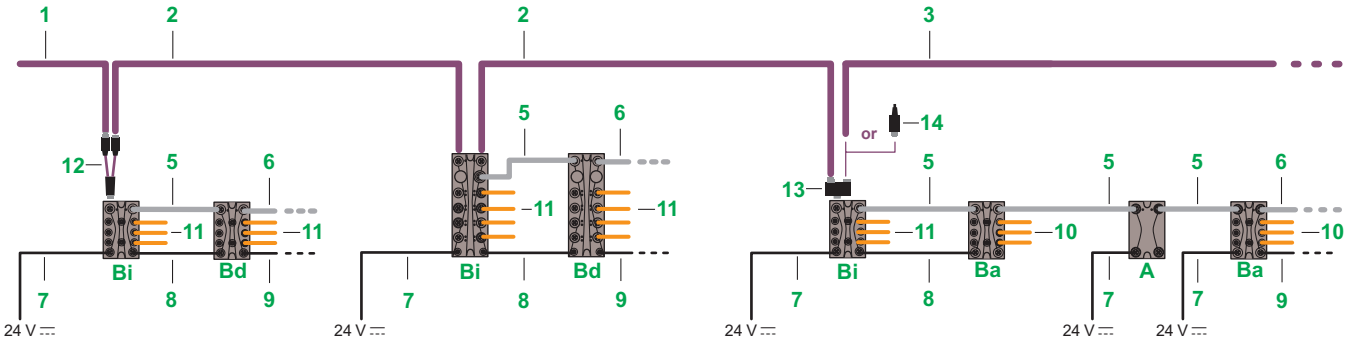
Connection components: CANopen and TM7 bus architecture

CANopen architecture



TM7 bus architecture

TM5NCO1 + TM5SBET7

A	Power distribution block
Ba	Analog I/O expansion block
Bd	Digital I/O expansion block
Bi	CANopen interface block

TCSXCNEXNX●●V

TCSXCN1M●●SA

Power distribution cables

Designation	Description	Item	Length m/*ft*	Reference	Weight kg/*lb*
Power OUT power distribution cables	Equipped with 1x 4-way angled male M8 connector at one end and flying leads at the other	9	1/*3.28*	TCSXCNEXNX1V	0.041/*0.090*
			3/*9.843*	TCSXCNEXNX3V	0.105/*0.231*

			25/*82.02*	TCSXCNDMNX25V	0.809/*1.784*

Cables for connecting analog sensors and actuators

Cables for connecting sensors and actuators	Equipped with 1 A-coded 5-way angled male M12 connector at one end and flying leads at the other	10	2/6.56	TCSXCN2M2SA	0.143/*0.315*
			5/*16.40*	TCSXCN2M5SA	0.258/*0.569*
			15/*49.21*	TCSXCN2M15SA	0.546/*1.204*
	Equipped with one A-coded 5-way straight male M12 connector at one end and flying leads at the other	10	2/6.56	TCSXCN1M2SA	0.143/*0.315*
			5/*16.40*	TCSXCN1M5SA	0.258/*0.569*
			15/*49.21*	TCSXCN1M15SA	0.546/*1.204*

Cables for connecting digital sensors and actuators

Please refer to the "Detection for OsiSense automation solutions" catalog, ref. MKTED210041EN — Item 11

Accessories

TM7ACYCJ

TM7ACTHA

TM7ACYC

Designation	Composition	Item	Reference	Weight kg/*lb*
CAN bus Y cable	Equipped with 2x 5-way M12 connectors, 1 male and 1 female at one end and 1x 5-way male M12 connector at the other end	12	TM7ACYCJ	0.031/*0.068*
CAN Y connector	For connecting 2x M12 connectors, 1 male and 1 female, to a male M12 connector on the expansion block	13	TM7ACYC	0.100/*0.220*
Line terminator (for end of bus)	Equipped with 1x 5-way male M12 connector	14	TM7ACTLA	0.023/*0.051*
Connector with temperature probe for measurement by thermocouple *(1)*	Equipped with 1x 5-way male M12 connector	–	TM7ACTHA	0.100/*0.220*

(1) For use with the **TM7BAI4PLA** *expansion block for measuring the temperature of the connector with compensation*

Modicon TM7

High-Performance and Safe IP67 Distributed I/O System

Separate parts

TM7ACMP

Separate parts			
Description	**Composition**	**Unit reference**	**Weight kg/*lb***
Sealing plugs *(1)*	For M8 connector on Modicon TM7 blocks **Pack of 50**	**TM7ACCB**	0.100/*0.220*
	For M12 connector on Modicon TM7 blocks **Pack of 50**	**TM7ACCA**	0.100/*0.220*
Plate for mounting on symmetrical DIN rail ⊥	For Modicon TM7 blocks	**TM7ACMP**	0.020/*0.044*
	For Modicon TM7 blocks **Pack of 10**	**TM7ACMP10**	0.200/*0.441*
Screwdrivers	For tightening the rings on M8 and M12 connectors to the correct torque **Pack of 2**	**TM7ACTW**	0.198/*0.437*

(1) The use of sealing plugs ensures that unused connectors on Modicon TM7 IP67 blocks have IP67 protection.

Modicon TM7

High-Performance and Safe IP67 Distributed I/O System
