

ø32, ø40, ø50, ø63, ø80, ø100, ø125

Space-saving auto switch mounting

Space is saved by setting switches into grooves

provided on 4 surfaces. This is also effective to prevent loosening and damage, etc.

Port

aperture

Increased kinetic energy absorption

The absorption of kinetic energy has been increased by nearly 30% compared to the CA1 series, through increased cushion volume and the use of a new cushion seal. In addition, the life of the cushion seal is approximately 5 times longer.

Improved cushion capacity

Piston rod lurching, due to cracking pressure at start up, has been eliminated by means of a floating seal mechanism.

Compact and lightweight

The height and width of the covers has been reduced by nearly 10%, and in addition, die-cast covers yield 10 to 25% weight reduction over the CA1 series.

Improved workpiece mounting accuracy

High precision has been achieved in the cylinder unit and the mounting brackets. Improved mounting accuracy simplifies the mounting process and also extends cylinder life.

Easy cushion valve adjustment

Adjustment of the cushion valve is made with a hexagon wrench key allowing for easy fine adjustment.

Furthermore, the cushion valve has been recessed so that it does not protrud from the cover.

Appearance improved by enclosing the tie-rods

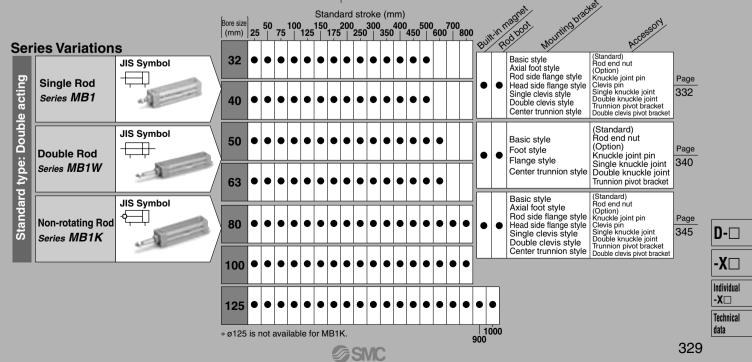

Employs a square tube with enclosed tie-rods which is integrated with both covers to achieve an attractive, unified appearance.

Dust accumulation can be prevented with fastener strips

Auto switch mounting grooves can be covered with resin fastener strips, which adhere tightly to the tube (option) to prevent the entry and accumulation of dirt.

Piston rod sagging reduced

Sagging of the piston rod has been reduced by increasing the precision of the bushing and piston rod, and reducing their clearances.

 Additional mass.....0.16/50 mm stroke Cylinder stroke100 mm stroke

 $0.53 + 0.16 \times 100/50 = 0.85 \text{ kg}$

Consideration of the Cushion

For details about the kinetic energy absorbable by the cushion mechanism and w/ air cushion, refer to page 1571.

Kinetic Energy Absorbable by the Cushion Mechanism

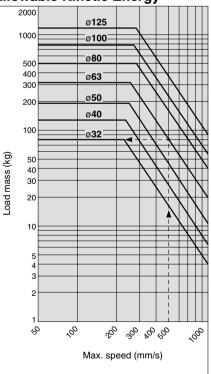

Bore size (mm)	Effective cushion length (mm)	Kinetic energy absorbable (J)				
32	18.8	2.2				
40	18.8	3.4				
50	21.3	5.9				
63	21.3	11				
80	30.3	20				
100	29.3	29				
125	Rod side 31.4 Head side 29.4	43				

At the stroke end, when stopping a large amount of

kinetic energy generated by a large load and high speed operation, compression of air is used to

absorb the impact without transmitting vibration to

Allowable Kinetic Energy

Example) Load limit at rod end when the air cylinder ø63 is actuated with max. speed of 500 mm/s.

Extend upward from 500 mm/s on the horizontal axis of the graph to the intersection point with the line for a tube bore of 63 mm, and then extend leftward from this point to find the load of 80 kg.

the surroundings. The purpose of an air cushion is not to reduce the speed of a piston as it nears the

With Air Cushion

stroke end. The kinetic energy of load can be found using the following formula.

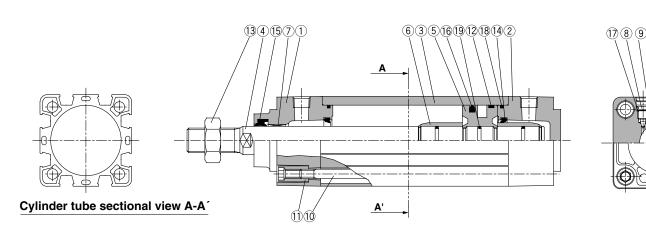

M : Mass of load (kg)

υ: Piston speed (m/s)

If the kinetic energy obtained is no greater than the absorbable kinetic energy shown in the table above, the life of the cushion seal will be 10 million cycles or more.

Construction

Component Parts

No.	Description	Material	Note						
1	Rod cover	Aluminum die-casted	Metallic painted						
2	Head cover	Head cover Aluminum die-casted

* Seal kit includes 14 to 16. 18. Order the seal kit, based on each bore size.

* Seal kit includes a grease pack (ø32 to 50 : 10 g, ø63, 80 : 20 g, ø100 : 30g). Order with the following part number when only the grease pack is needed.

Grease pack part number : GR-S-010 (10g), GR-S-020 (20g)

Water Resistant Air Cylinders

As compared to the standard cylinder, anti-coolant performance has been improved, and suitable for using under the atmosphere having coolant in the machine tools. Improved water resistant air cylinder, Series MB is also available, which is compliant for the environment having water splashed on the food machinery, or car washing machine, etc. Refer to page 899 for details.

Copper/Fluorine-free

Copper/Fluorine-free

The type which prevents copper based ions from generating by changing the copper based materials into non-copper materials in order to eliminate the effects by copper based ions or fluororesins over the color cathode ray tube.

Specifications

Action	Double acting, Single rod
Bore size (mm)	ø32, ø40, ø50, ø63, ø80, ø100
Max. operating pressure	1.0 MPa
Min. operating pressure	0.05 MPa
Cushion	Air cushion*
Piping	Screw-in type
Piston speed	50 to 1000 mm/s

Basic mass	Foot style	0.71	0.96	1.61	2.0	3.72	4.93	8.76
	Flange style	0.88	1.19	1.84	2.51	4.67	7.58	10.86
Additional mass per each 50 mm of stroke	All mounting brackets	0.20	0.29	0.41	0.45	0.75	1.0	1.25
	Single knuckle	0.15	0.23	0.26	0.26	0.60	0.83	1.10
Accessory bracket	Double knuckle (With pin)	0.22	0.37	0.43	0.43	0.87	1.27	0.91

Calculation:

(Example) MB1WB32-100 (Basic style/ø32, 100 st)

Basic mass-----0.59 kg

Additional mass.....0.20/50 stroke

Cylinder stroke-----100 stroke

0.59 + 0.20 x 100/50 = 0.99 kg

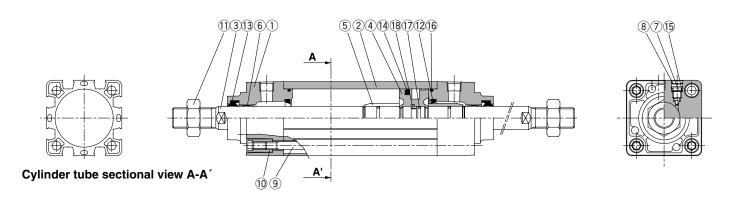

MB

Series MB1W

Construction

Component Parts

No.	Description	Material	Note
1	Rod cover	Aluminum die-casted	Metallic painted
2	Cylinder tube	Aluminum alloy	Hard anodized
3	Piston rod	Carbon steel	Hard chrome plated
4	Piston	Aluminum alloy	Chromated
5	Cushion ring	Aluminum alloy	Anodized
6	Bushing	Lead-bronze casted	
7	Cushion valve	Steel wire	Nickel plated
8	Retaining ring	Spring steel	ø40 to ø100
9	Tie-rod	Carbon steel	Zinc chromated
10	Tie-rod nut	Carbon steel	Nickel plated
11	Rod end nut	Carbon steel	Nickel plated

Replacement Parts/Seal Kit

Bore size (mm)	Kit no.	Contents			
32	MBW32-PS				
40	MBW40-PS				
50	MBW50-PS	Set of the above nos.			
63	MBW63–PS	12, 13, 14, 16			
80	MBW80-PS				
100	MBW100-PS				

* Seal kit includes (2 to (4), (6). Order the seal kit, based on each bore size.
* Seal kit includes a grease pack (ø32 to 50: 10 g, ø63, 80: 20 g, ø100: 30 g). Order with the following part number when only the grease pack is needed. Grease pack part number: GR-S-010 (10 g), GR-S-020 (20 g)

Copper/Fluorine-free

20-MB1W Mounting style	Bore size	Port thread type	Stroke	Suffix	
------------------------	-----------	------------------	--------	--------	--

Copper/fluorine-free

The type which prevents copper based ions from generating by changing the copper based materials into non-copper materials in order to eliminate the effects by copper based ions or fluororesins over the color cathode ray tube.

Specifications

Action	Double acting, Double rod
Bore size	ø32, ø40, ø50, ø63, ø80, ø100
Max. operating pressure	1.0 MPa
Min. operating pressure	0.05 MPa
Cushion	Air cushion *
Piping	Screw-in type
Piston speed	50 to 1000 mm/s
	Basic style, Axial foot style, Rod side flange style
Mounting	Head side flange style, Single clevis style
	Double clevis style, Center trunnion style

* Auto switch can be mounted.

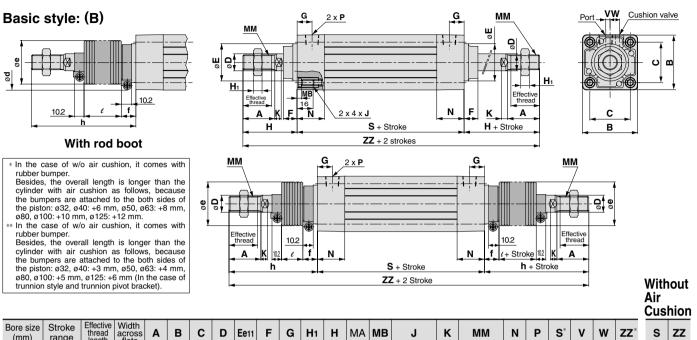

* Use within the energy absorption. (Refer to page 334.)

* When there is no air cushion, the unit is equipped with rubber bumpers.

Water Resistant Air Cylinders

As compared to the standard cylinder, anti-coolant performance has been improved, and suitable for using under the atmosphere having coolant in the machine tools. Improved water resistant air cylinder, Series MB is also available, which is compliant for the environment having water splashed on the food machinery, or car washing machine, etc. Refer to page 899 for details.

100	25, 50, 75, 100, 125, 150, 175, 200, 250, 300, 350, 400, 450, 500, 600, 700, 800

Intermediate strokes are available, too. (Spacer is not used.)

Rod Boot Material

Symbol	Rod boot material	Max. ambient temperature		
J	Nylon tarpaulin	70°C		
К	Heat resistant tarpaulin	110°C*		

* Maximum ambient temperature for the rod boot itself.

Theoretical Output

OUT side is the same value as double acting, single rod. But, IN side is different. For IN side, refer to the table below.

Bore size (mm)	Piston area (mm ²)	Bore size (mm)	Piston area (mm²)	
32	675	63	2804	
40	1082	80	4568	
50	1651	100	7223	

Theoretical output (N) = Pressure (MPa) x Piston area (mm²)

Square Tube Type Air Cylinder: Non-rotating Rod Type Double Acting, Single Rod Series MB1K

Mass	Mass (kg							
Bore s	Bore size (mm)			50	63	80	100	
	Basic style	0.53	0.69	1.26	1.58	2.69	3.86	
	Foot style	0.65	0.83	1.48	1.86	3.19	4.52	
Basic mass	Flange style	0.82	1.06	1.69	2.37	4.14	7.17	
	Single clevis style	0.78	0.92	1.60	2.21	3.8	7.03	
	Double clevis style	0.79	0.96	1.69	2.37	4.09	7.55	
Additional mass per each 50 mm of stroke	All mounting brackets	0.16	0.21	0.33	0.37	0.56	0.72	
Accessory brooket	Single knuckle	0.15	0.23	0.26	0.26	0.60	0.83	
Accessory bracket	Double knuckle (With pin)	0.22	0.37	0.43	0.43	0.87	1.27	

Calculation:

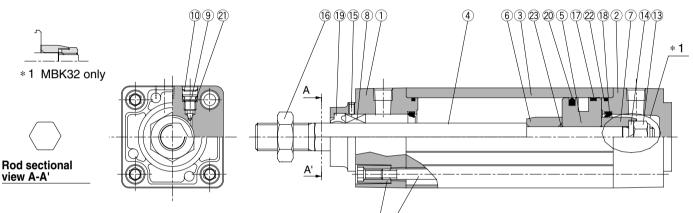

(Example) MB1K32-100 (Basic style/ø32, 100 st)

• Basic mass.....0.53 kg

Additional mass-----0.16/50 stroke

 $0.53 \pm 0.16 \times 100/50 = 0.85 \text{ K}$

80	MBK80 – PS	
100	MBK100 - PS]

* Seal kit includes 18 to 20, 22. Order the seal kit, based on each bore size.

* Seal kit includes a grease pack (ø32 to 50 : 10 g, ø63, 80 : 20 g, ø100 : 30 g). Order with the following part number when only the grease pack is needed.

Grease pack part number : GR-S-010 (10 g), GR-S-020 (20 g)

 \ast In the case of w/o air cushion, it comes with rubber bumper.

Besides, the overall length is longer than the cylinder with air cushion as follows, because the bumpers are attached to the both sides of the piston: ø32, ø40: +6 mm, ø50, ø63: +8 mm, ø80, ø100: +10 mm.

Series MB1 Specific Product Precautions

Be sure to read before handling.

Refer to front matters 54 and 55 for Safety Instructions and pages 3 to 11 for Actuator and Auto Switch Precautions.

Adjustment

MWarning

1. Do not open the cushion valve beyond the stopper.

Crimping (Ø32) or a snap ring (Ø40 to Ø100) is provided to prevent the accidental removal of the cushion valve. Do not open the valve beyond the mechanism.

If not operated in accordance with the above precautions, the cushion valve may be ejected from the cover when air pressure is supplied.

Bore size (mm)	Cushion valve width across flats	Hexagon wrench
32, 40	2.5	JIS 4648 Hexagon wrench key 2.5
50, 63	3	JIS 4648 Hexagon wrench key 3
80, 100	4	JIS 4648 Hexagon wrench key 4
125	4	JIS 4648 Hexagon wrench key 4

2. Use the air cushion at the end of cylinder stroke.

When it is intended to use the cushion valve in the fully open position, select the type with damper. If this is not done, the tie-rods or piston rod assembly will be damaged.

3. When replacing mounting bracket, use a hexagon wrench.

Bore s	size (mm)	Bolt	Width across flats	Tightening torque (N·m)
32	2, 40	MB-32-48-C1247	4	5.1
50), 63	MB-50-48-C1249	5	11
80,	Foot	MB-80-48AC1251	C	05
100	Others	MB-80-48BC1251	6	25
125	Foot	M12 x 1.75 x 25L	0	20.1
125	Others	M12 x 1.75 x 28L	8	30.1

4. When replacing a bracket, tie-rod nuts on the cylinder body may become loosened.

After retightening the tie-rod nuts with the proper tightening torque (Refer to Adjustment 3.), mount a mounting bracket.

Non-rotating rod type (Double acting, Single rod)

Operating Precautions

▲ Caution

1. Avoid using the air cylinder in such a way that more than allowable rotational torque would be applied to the piston rod.

If rotational torque is applied, the non-rotating guide will deform, thus affecting the non-rotating accuracy. This may cause damage to machinery.

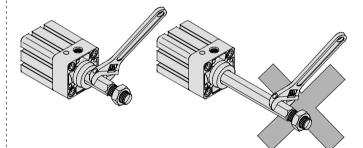

Mounting/Piping

▲ Caution

1. Mounting a workpiece on rod end

To screw a bracket or a nut onto the threaded portion at the tip of the piston rod, make sure to retract the piston rod entirely, and place a wrench over the flat portion of the rod that protrudes.

Tighten it by giving consideration to prevent the tightening torque from being applied to the non-rotating guide.
