3 Port Solenoid Valve/Direct Operated

V100 Series

Rubber Seal

Note) DC type only

Specifications

Fluid	Air
Ambient and fluid temperature (°C)	-10 to 50 (No freezing)
Response time (DC) (ms) ^{Note 1)}	ON: 5 or less OFF: 4 or less
Max. operating frequency (Hz)	20
Manual override	Non-locking push, Locking slotted
Lubrication	Not required
Mounting position	Unrestricted
Impact/Vibration resistance (m/s ²) ^{Note 2)}	150/30
Enclosure	Dust proof

Note 1) Based on dynamic performance test JIS B8419: 2010 (standard type: at coil temperature of 20°C, with rated voltage, without surge voltage suppressor)

Note 2) Impact resistance: No malfunction resulted in an impact test using a drop impact tester. The test was performed one time each in the axial and right angle directions of the main valve and armature, for both energized and de-energized states. (Value in the initial stage)

Vibration resistance: No malfunction resulted in 45 to 2000 Hz, a one-sweep test performed in the axial and right angle directions of the main valve and armature for both energized and de-energized states. (Value in the initial stage)

Solenoid Specifications

Symbol

V114(A)

V124(A)

Series		V114/V124	V114A/V124A	
Electrical entry		Grommet (G)/(H), L plug connector(L) M plug connector (M)		
Coil rated voltage (V)	DC	24, 12, 6, 5, 3		
	AC ^{50/60} Hz	100, 110, 200, 220	—	
Allowable voltage fluctuation		-10 to 10% *		
Power consumption (W)	DC	Standard: 0.35 (with light: 0.4) With power saving circuit 0.1 ^{Note)} [Starting 0.4, Holding 0.1]	1 W (with light: 1.1)	
Apparent power (VA)	AC	100 V	0.78 (with light: 0.81)	—
		110 V	0.86 (with light: 0.89)	—
		[115 V]	[0.94 (with light: 0.97)]	—
		200 V	1.18 (with light: 1.22)	—
		220 V	1.30 (with light: 1.34)	—
		[230 V]	[1.42 (with light: 1.46)]	—
Surge voltage suppressor		Refer to page 1367.		
Indicator light		LED		

* Can be used for 110 VAC and 115 VAC, 220 VAC and 230 VAC in common.

* For 115 VAC and 230 VAC, the allowable voltage fluctuation will be -15% to 5% of the coil rated voltage.

* The voltage drop will occur due to the internal circuit of S, Z and T types (with energy saving circuits).

Allowable voltage fluctuations should be within the range below.

S and Z types 24 VDC: -7% to +10%

12 VDC: -4% to +10%

T type 24 VDC: -8% to +10%

12 VDC: -6% to +10%

* Select the DC standard type or the power saving circuit type when the valve is continuously energized for long periods of time.

Note) Refer to page 1367 for details.

Specifications

Valve model	Type of actuation	Model	Operating pressure range (MPa) ^{Note 1)}	Vacuum specification (MPa) ^{Note 4)}		Port size		Weight (g) ^{Note 2)}

V100 Series

Specific Product Precautions 1

Be sure to read this before handling the products.

Refer to back page 50 for Safety Instructions and pages 3 to 9 for 3/4/5 Port Solenoid Valve Precautions.

⚠ Warning

Manual Override Operation

Since connected equipment will be actuated when the manual override is operated, first confirm that conditions are safe.

■ Non-locking push type [Standard type]

Press in the direction of the arrow

■ Locking slotted type [B type]

Turn in the direction of arrow.

⚠ Caution

When operating with a screw driver, turn it gently using a watchmakers' screw driver. [Torque: less than 0.1Nm]

⚠ Caution

How to Use of Plug Connector

1. Attaching and detaching connectors

- To attach a connector, hold the lever and connector unit between your fingers and insert straight onto the pins of the solenoid valve so that the lever's pawl is pushed into the groove and locks.
- To detach a connector, remove the pawl from the groove by pushing the lever downward with your thumb, and pull the connector straight out.

2. Crimping of lead wires and sockets

Strip 3.2 to 3.7 mm at the end of the lead wires, insert the ends of the core wires evenly into the sockets, and then crimp with a crimping tool. When this is done, take care that the coverings of the lead wires do not enter the core wire crimping area.

Use special tool when crimping. (Consult with SMC for the crimping tool.)

⚠ Caution

How to Use a Plug Connector

3. Attaching and detaching lead wires with sockets

● Attaching

Insert the sockets into the square holes of the connector (⊕, ⊖ indication), and continue to push the sockets all the way in until they lock by hooking into the seats in the connector. (When they are pushed in, their hooks open and they are locked automatically.) Then confirm that they are locked by pulling lightly on the lead wires.

● Detaching

To detach a socket from a connector, pull out the lead wire while pressing the socket's hook with a stick having a thin tip (about 1 mm). If the socket will be used again, first spread the hook outward.

Plug Connector Lead Wire Length

Standard length is 300 mm, but the following length is also available.

How to Order Connector Assembly

For DC: **SY100-30-4A-**

For 100 VAC: **SY100-30-1A-**

For 200 VAC: **SY100-30-2A-**

For other voltages of AC: **SY100-30-3A-**

Without lead wire: **SY100-30-A**

(with connector and 2 sockets)

How to Order

To order a valve with lead wire length of other than 300 mm, indicate part numbers of the valve without connector and the required connector assembly separately.

<Example> Lead wire length 2000 mm

For DC

V114-SLO

SY100-30-4A-20

For AC

V114A-1LO

SY100-30-1A-20

● Lead wire length

Nil	300 mm
6	600 mm
10	1000 mm
15	1500 mm
20	2000 mm
25	2500 mm
30	3000 mm
50	5000 mm

SMC's Lead Wire Specifications

Cover diameter: 1.55 mm

Conductor area: 0.3 mm² (AWG22 equivalent)

V100 Series

Specific Product Precautions 2

Be sure to read this before handling the products.

Refer to back page 50 for Safety Instructions and pages 3 to 9 for 3/4/5 Port Solenoid Valve Precautions.

Surge Voltage Suppressor

<For DC>

Grommet, L and M Plug Connector

■ Standard type (with polarity) With surge voltage suppressor (□S)

With light/surge voltage suppressor (□Z)

■ Non-polar type With surge voltage suppressor (□R)

With light/surge voltage suppressor (□U)

- Please connect correctly the lead wires to + (positive) and - (negative) indications on the connector.
- For DC voltages other than 12, 24 VDC, incorrect wiring will cause damage to the surge voltage suppressor circuit since a diode to prevent reverse current is not provided. (Wrong polarity will cause trouble.)
- Solenoids, whose lead wires have been pre-wired: positive side red and negative side black.

■ With power saving circuit

Power consumption is reduced by approximately 75% compared with the standard product by eliminating the need for electrical current for holding. (Effective after more than 62 ms energized and 24 VDC rated voltage applied.)

Electric circuit (with power saving circuit) For Single Solenoid

Operating Principle

The electrical circuit as shown above, allows reduced holding current consumption and measures power saving. Refer to the electric waveform on the right.

- Please be careful not to reverse the polarity, since a diode to prevent the reversed current is not provided for the power saving circuit.

<For AC>

Grommet, L and M Plug Connector

With light (□Z)

Caution

In the case of varistor surge voltage suppressor, note the surge voltage to be suppressed at controller side as there will be a residual voltage according to the protective element and rated voltage.

Moreover, the residual voltage of the diode is approximately 1 V.

Connector Assembly with Cover

Connector assembly with protective cover enhances dust protection

- Effective in preventing possible short circuit problems due to contaminants in contact with connector section.
- Chloroprene rubber for electrical use, which provides outstanding weather resistance and electrical insulation, is used for the cover material. However, be careful not to allow contact with cutting oil, etc.
- Round cord provides neat appearance.

How to Order
