CUSTOMIZED ENCLOSURES RIGHT TO YOUR DOORSTEP RELIABLE. FLEXIBLE. FAST.

GET THE INDUSTRY'S LEADING HMI ENCLOSURES, BUILT TO YOUR SPECIFICATIONS IN AS LITTLE AS 2 WEEKS

Here are two new programs that put you in control. Rittal lets you choose the most popular components of our VIP and Optipanel HMI enclosure systems. Then we ship them to you in just 2 weeks from receipt of your purchase order. If you require more customization, such as non-standard sizes and accessories, or even your own front panel design, we can handle that too. We'll ship your completed, customized system in just 4 weeks.

2 Week Program

Simply choose the part number of the VIP or Optipanel from the selection charts. You can also indicate which standard pushbutton cutouts you require. That's it. Within just 2 weeks of receipt of your PO, your complete system is on its way.

4 Week Program

This option lets you choose the VIP or Optipanel components that fit your requirements from any of those listed in the appropriate selection charts. This means you can select from a broader range of enclosure dimensions and accessories for even greater flexibility. Plus, with this option you can submit your own front panel design.

TRIM COLORS TO ORDER
COVER TRIM, END TRIM
AND SPACER TRIM ARE
AVAILABLE IN FIVE
COLORS. THE ENCLOSURE
CORNER PROTECTORS
ARE LIKEWISE PRODUCED
IN THE CHOSEN TRIM
COLOR. CUSTOMIZED
COLORS CAN ALSO BE
PRODUCED FOR
LARGER ORDERS.

No one knows more about HMI cabinets than Rittal. As the world's leading enclosure manufacturer with over 13,000 products, Rittal combines pleasing aesthetics with carefully crafted functionality and exceptional value. Whether you need OptiPanel or VIP cabinets, Rittal has the resources to get them to you in record time.

WHICH SYSTEM IS RIGHT FOR YOU?

OPTIPANEL

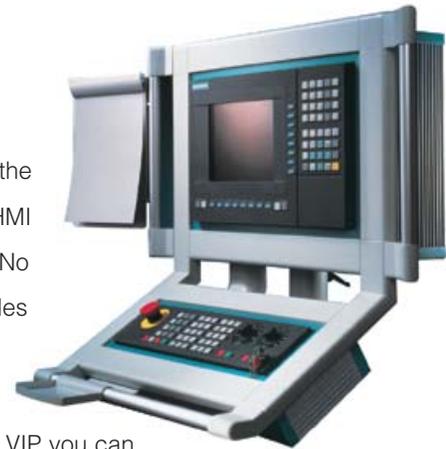

The ideal combination of form, function and economy for smaller panels, Optipanel has a slender, sleek, flat design. The standard enclosure fits many commonly used front panels, and the system can be customized to your exact requirements.

- Standard version provides 3.9" installation depth for typical front panels 7U H x 19" (482.5 mm) W
- Other available installation depths: 1.97" (50 mm), 3.97" (100 mm), and 5.90" (150 mm)
- Can be configured to your precise requirements with housing, mullion, rear wall and keyboard housing
- Operator housing can be subdivided to accept multiple panels
- Pendant arm supports available
- UL/cUL Type 12/IP 55
UL File Number: E76083

VIP

Rittal's VIP operator interface system is the industry's premier HMI enclosure solution. No other system provides this range of sizes, accessories and customization. With VIP you can integrate your own control panel into an ergonomically designed enclosure precisely crafted for your application. VIP offers the option of a keyboard tray or housing, and an extensive list of accessories including pendant arm supports. Key system features include:

- Wide, narrow and combination frames to precisely match your application
- Installation depths from 6.10" (155 mm) through 17.28" (438 mm) for greater flexibility
- Keyboard housings that easily connect to the operator housing
- Available with or without heat dissipating cooling fins
- Operator housing can be subdivided to accept multiple panels
- UL/cUL Type 12/IP 55
UL File Number: E76083

RITTALXPRESS 2-WEEK OPTIPANEL PROGRAM

Rittal Xpress offers a comprehensive selection of enclosures and fully-assembled HMI enclosures in just two weeks from receipt of your order. Use the product selection guides on the following pages to create the code for your ideal HMI enclosure. A fax order form for enclosures with two-week availability is located on the next page of this brochure.

OPTIPANEL — CODE BOX 1 — SELECT YOUR HMI ENCLOSURE SIZE

RITTALXPRESS 4-WEEK OPTIPANEL PROGRAM

Rittal Xpress is the easy way to create your ideal HMI with infinite configuration opportunities and have it delivered to your doorstep in just four weeks. Log onto www.rittal-corp.com/rittalxpress/HMI to fill out our real-time HMI configurator or work through pages 8 and 9 of this brochure to determine the dimensions and code configuration for your ideal Optipanel enclosure.

4-WEEK ORDERING IS THIS EASY!

Follow the steps below. **Step 1**-fill in the dimensions of your panel in inches. **Step 2**-choose your Design Options. **Step 3**-Build your customized part number, by inserting the product code numbers in the appropriate box. **Step 4**-Upload your drawings to our website.

STEP 1 - Panel Dimensions Required Fill in specific size in inches

_____ **H** x _____ **W** x _____ **D**

STEP 2 - Design Options

A Installation Depth

Choose the depth you want and place its code number in the build your enclosure chart in the space labeled A.

1

50 mm (1.97")

2

100 mm (3.94")

3

150 mm (5.91")

B Operator Housing

Choose the operator housing you want and enter its code number in the build your own enclosure chart in the space labeled B.

1

Without cross member

2

With cross member

C Rear Wall

Choose the rear wall you want and enter its code number in the build your own enclosure chart in the space labeled C.

1

Rear panel screw fastened

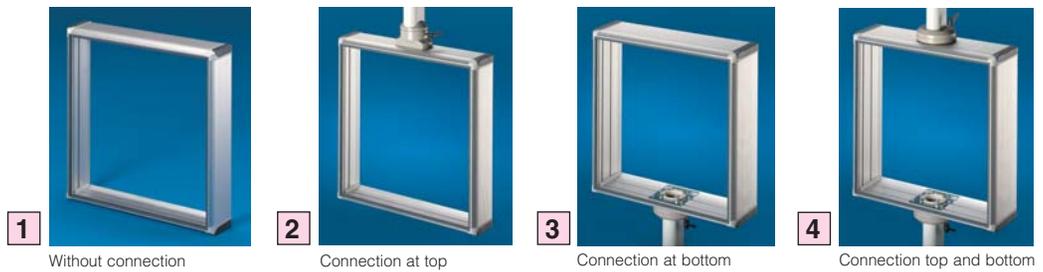

2

Rear panel hinged on the longest edge.

D Support Arm Connection

Choose the support arm connection you prefer and enter its code number in the build your own enclosure chart in the space labeled D.

1-4: CP-L, round
 Use with:
 Enclosure Coupling: 6525.0X0
 Enclosure Attachment: 6525.5X0
 Angle Coupling: 6526.0X0

5-7: CP-L, rectangular
 Use with:
 Enclosure Coupling: 6525.1X0
 Enclosure Attachment: 6525.6X0

E Keyboard Housing

Choose the keyboard housing connection you prefer and enter its code number in the build your own enclosure chart in the space labeled E.

Step 3, simply take the corresponding product code number by each of your selections in **Step 2** and place the numbers in the chart below. **Step 5**, fax the product code that you created by your selections in steps 2-4 along with your drawings to **1-800-477-4003**. Download our drawings from www.rittal-corp.com/rittalxpress/hmi and complete the drawings with your requirements. Submit the completed drawings along with your RFQ either online at www.rittal-corp.com/rittalxpress/hmi or fax to **1-800-477-4003**. Rittal will send a quote for your enclosure.

Step 3 - BUILD YOUR ENCLOSURE CODE

04	Height _____ x Width _____ x Depth _____	A	B	C	D	E
	Panel Dimension in inches					

STEP 4 - Cut Out Specs

Download our drawings from www.rittal-corp.com/rittalxpress/hmi and complete the drawings with your requirements. Submit the completed drawings along with your RFQ either online at www.rittal-corp.com/rittalxpress/hmi or fax to **1-800-477-4003**.

RITTALXPRESS 4 - WEEK VIP PROGRAM

Rittal Xpress is the easy way to create your ideal HMI with infinite configuration opportunities and have it delivered to your doorstep in just four weeks. Log onto www.rittal-corp.com/rittalxpress/HMI to fill out our real-time HMI configurator or work through pages 10 – 13 of this brochure.

4-WEEK ORDERING IS THIS EASY!

Follow the steps below. **Step 1**-fill in the dimensions of your panel in inches. **Step 2**-choose your basic features. **Step 3**-select your Operator Housing. **Step 4**-select your Keyboard Housing. **Step 5**-fill in your build your enclosure code. **Step 6**-Upload your drawings to our website: www.rittal-corp.com/rittalxpress/HMI

STEP 1 - Panel Dimensions Required Fill in specific size in inches

_____ **H** x _____ **W** x _____ **D**

STEP 2 - Basic Features

A Frame Style

Choose the frame style you want and place its code number in the build your enclosure chart in the space labeled A.

1

Wide Frame (.009)

2

Combined Frame (.109)

3

Narrow Frame (.209)

STEP 3 - Operator Housing

B Installation Depth

Choose the depth you want and place its code number in the build your enclosure chart in the space labeled B.

Material:

Enclosure:
Extruded aluminum section
Corner protectors:
Plastic, self-extinguishing

Finish:

Enclosure: Natural anodized

Screw
Fastened
1

Installation depth:
6.10" (155 mm)

Screw
Fastened
2
Hinged
3

Installation depth:
7.28" (185 mm)

Screw
Fastened
4
Hinged
5

Installation depth:
11.61" (295 mm)

Screw

8
Hinged
9

Installation depth:
17.24" (438 mm)

STEP 3 - Operator Housing

C Front Design

Choose the front design you prefer and enter its code number in the build your own enclosure chart in the space labeled C.

Cross member

For horizontal and/or vertical division.

Material:

Extruded aluminum section, RAL 7035.

Sealing bar

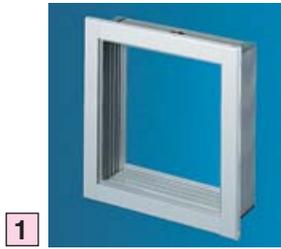

For horizontal and/or vertical division. The "slot-free" division produces a height gain of 1.10" (28 mm).

Material:

Extruded aluminum section 8 x 0.79" (20 mm), natural anodized

Adaptor plate

Material thickness:
0.12" (3 mm) aluminum, natural anodized.

1 Without cross member

2 With one cross member

3 With two cross members

4 With hinged front panel

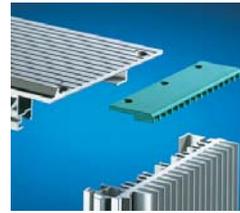

D Cooling Fins

Choose the cooling fins you prefer and enter its code number in the build your own enclosure chart in the space labeled D.

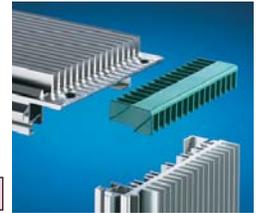

Enclosures with an installation depth of 185 mm (7.28") and 328 mm (12.91") do not have any fins immediately behind the front frame at a depth of 44 mm (1.73"). The color of the corner protectors matches the trim color selected under **section F**.

1 No fins

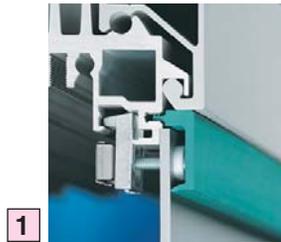

2 Fins at sides

3 Continuous fins

E Trim Types

Choose the trim types you prefer and enter its code number in the build your own enclosure chart in the space labeled E.

1 Cover trim
To conceal the front panel assembly screws. For front panel thickness up to 3.5 mm (0.14").

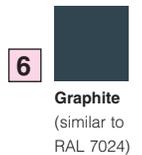

2 End trim
Attractively finishes off the space between the front panel and the frame section. For all front panel thicknesses.

3 Spacer trim
For installed equipment flush with the frame section. For front panel thickness up to approx. 3.5 mm (0.14").

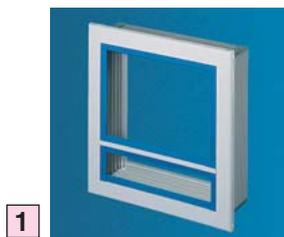

F Trim Colors

Choose the trim color you prefer and enter its code number in the build your own enclosure chart in the space labeled F.

Note: Enclosure corner protectors are also supplied in the chosen color.

G Support Arm Connection – Choose the support arm connection you prefer and enter its code number in the build your own enclosure chart in the space labeled G.

1 Without connection

2 Connection, bottom

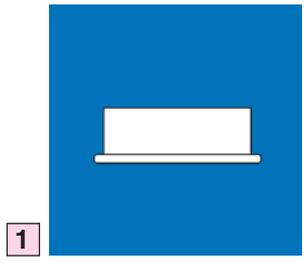

3 Connection, top

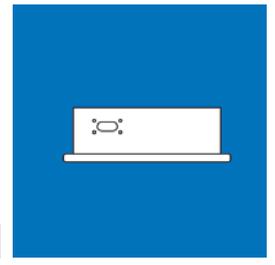

4 Connection, top and bottom, one cover plate included

H Mounting for Keyboard Housing

Choose the keyboard mounting you prefer and enter its code number in the build your own enclosure chart in the space labeled H.

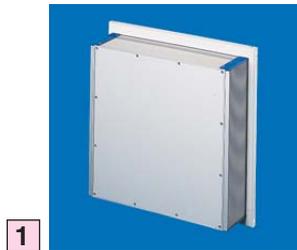

1
Without connection to the keyboard housing

2
Connection to frame connector either fixed or adjustable

I Rear Panel

Choose the rear panel you prefer and enter its code number in the build your own enclosure chart in the space labeled I.

1
Screw fastened
Material:
Aluminum, natural anodized.

2
Hinged
For rapid service access
Material:
Aluminum, natural anodized.

J Keyboard Depth

Choose the keyboard depth you prefer and enter its code number in the build your own enclosure chart in the space labeled J.

Without fins.
For installing or positioning keyboards on top (with a depth of 1.06" (27 mm).
All keyboard housings are custom-produced to your dimensions. When selecting the wide front frame, the width of the keyboard housing depends on the operating housing.

Material:
Extruded aluminum section

1
Installation depth 1.73" (44 mm) for built-in keyboards

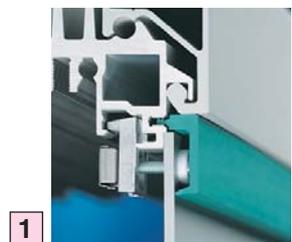

2
Installation depth 4.13" (105 mm) for built-in keyboards

K Trim Types

Choose the trim type you prefer and enter its code number in the build your own enclosure chart in the space labeled K.

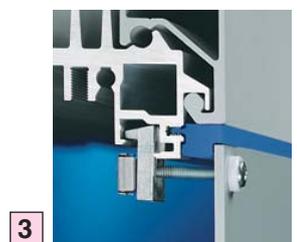

Cannot be selected with keyboard housing depth 1.06" (27 mm) or support for keyboards.

1
Cover trim
To conceal the front panel assembly screws. For front panel thickness up to 0.14" (3.5 mm).

2
End trim
Attractively finishes off the space between the front panel and the frame section. For all front panel thicknesses.

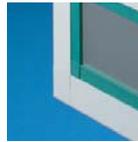

3
Spacer trim
For installed equipment flush with the frame section. For front panel thickness up to approx. 0.14" (3.5 mm).

STEP 4 - Keyboard Housing

L Trim Colors

Choose the trim color you prefer and enter its code number in the build your own enclosure chart in the space labeled L.

Note: Enclosure corner protectors are also supplied in the chosen color.

1

Turquoise
(similar to RAL 5018)

2

Bright blue
(similar to RAL 5005)

3

Bright red
(similar to RAL 3001)

5

Pebble grey
(similar to RAL 7030)

6

Graphite
(similar to RAL 7024)

M Keyboard Connector

Choose the keyboard connector you prefer and enter its code number in the build your own enclosure chart in the space labeled M.

Supplied loose with the keyboard housing for connecting operating housings and keyboard housings.

Material:
Die-cast zinc, RAL 7035

1

Frame connector, (fixed)

2

Frame connector, (adjustable)

N Cable Tube

Choose the cable tube you prefer and enter its code number in the build your own enclosure chart in the space labeled N.

Supplied loose with the keyboard housing for connecting operating housings and keyboard housings.

Material:
Die-cast zinc, RAL 7035

1

Without cable tube

2

Cable tube, rigid

3

Cable tube, flexible

Step 5, simply take the corresponding product code number by each of your selections in **Steps 3 & 4** and place the numbers in the chart below. **Step 6:** Log onto www.rittal-corp.com/rittalxpress/hmi to download our drawings. Make your changes to our drawings and submit the complete drawings along with your RFQ either online at www.rittal-corp.com/rittalxpress/hmi or fax to **1-800-477-4003**. Rittal will send a quote for your enclosure. Rittal will send a quote for your enclosure.

Step 5 - BUILD YOUR ENCLOSURE CODE

Height _____ x Width _____ x Depth _____
Panel Dimension in inches

STEP 6 - Cut Out Specs

Log onto www.rittal-corp.com/rittalxpress/hmi to download our drawings. Make your changes to our drawings and submit the complete drawings along with your RFQ either online at www.rittal-corp.com/rittalxpress/hmi or fax to **1-800-477-4003**. Rittal will send a quote for your enclosure.
