

Planning and marking software, MARKING system app, and customer-specific printing service

The PROJECT complete software is the most innovative solution to date, allowing you to plan your terminal strip with ease. Direct data exchange with all conventional CAE software solutions, along with the creation of all project documentation, make this software unique.

The high-performance marking tool optimally supports all output devices and marking materials. Design your own print files quickly and easily with a large selection of different templates, symbols, and formats.

Which marking suits your requirements? Find out with the MARKING system app.

Quickly and easily find the right solution with either the structured search assistant or the integrated bar code scanner. More than 3000 marking solutions, 11 different printing systems, and three marking technologies. You are certain to find the right marking option for your application.

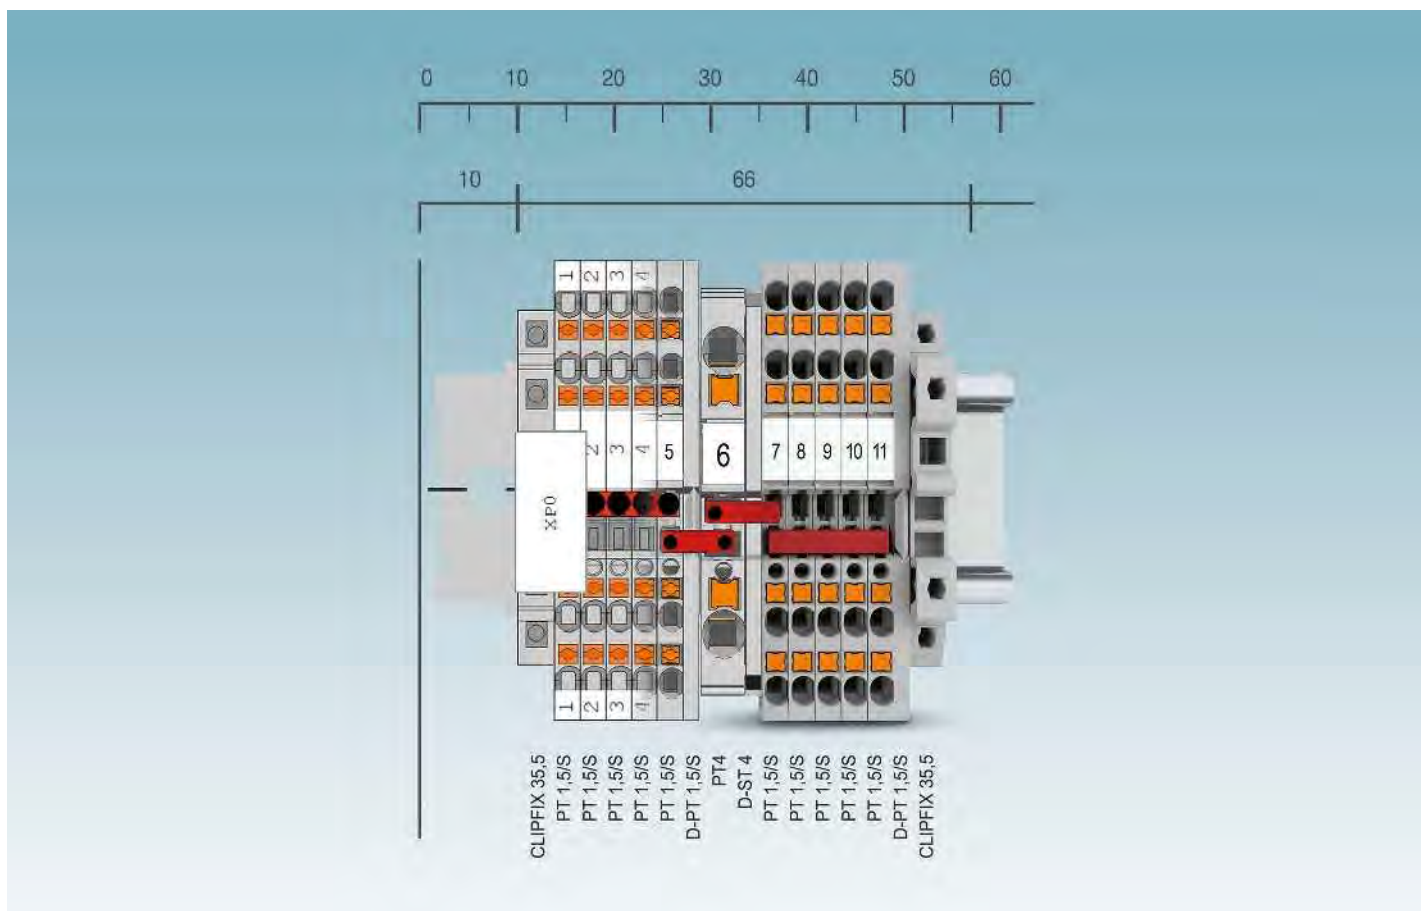

With the Marking Editor, you can also create the required markings directly in the application environment.

All marking materials in the portfolio can also be ordered as customer-specific printed versions. Within no time at all, you will receive high-quality marking solutions, printed according to your individual requirements.

Marking and labeling – MARKING system

Planning and marking software, MARKING system app, and customer-specific printing service

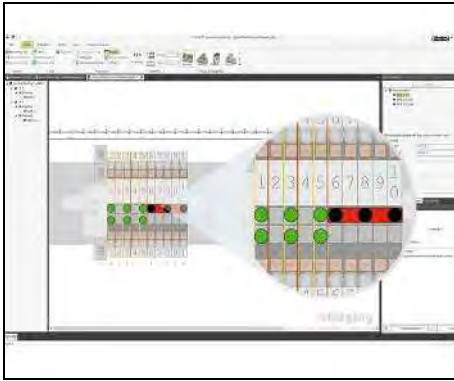

The PROJECT complete planning and marking software supports the entire control cabinet manufacturing process. The program features an intuitive user interface and enables the individual planning, automatic checking, and direct ordering of terminal strips, as well as the easy creation of corresponding markings.

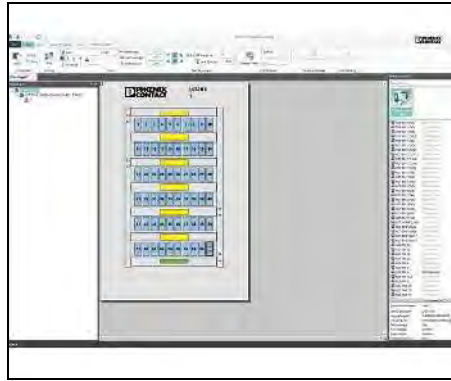

The intuitive functions make PROJECT complete very easy to use. Customize the menu bars according to your individual needs.

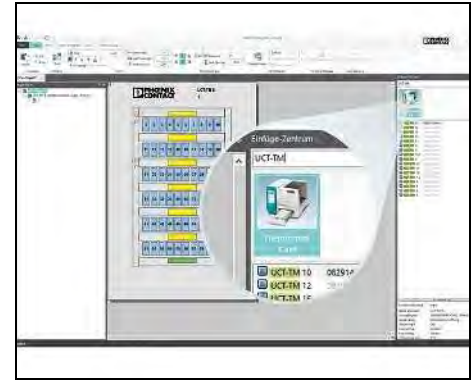

Import projects directly from electrical plans. PROJECT complete includes interfaces to all conventional CAE programs.

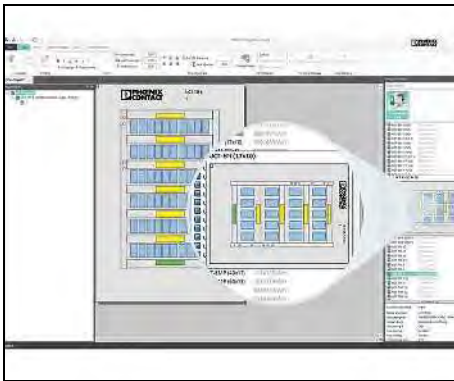

PROJECT complete automates many steps and reduces the effort involved. Manually bridging or planning individual markings is no longer necessary.

Create the right markings for your projects with PROJECT complete. The software controls all marking systems from Phoenix Contact.

The intelligent search function in PROJECT complete selects the appropriate material using filters, reliably directing you to the perfect solution for your application.

In the template preview, you can see the breakdown of a material immediately and thus find the right product for your application faster.

Marking and labeling – MARKING system

Planning and marking software, MARKING system app, and customer-specific printing service

MARKING system app

The MARKING system app spearheads the digital transformation in industrial identification. It creates real added value for the user. The app features a unique, mobile interface for the smart, networked selection and creation of marking solutions in Industrie 4.0. Conveniently find the right solution using either the structured search assistant or integrated bar code scanner. Among the 3000 marking solutions and eleven different printing systems (subdivided into three marking technologies), almost all users will find the right marking solution for their application. The app is clearly structured and intuitive to use, and also includes a search assistant for marking materials. In addition, the integrated MARKING Application Guide enables the specific selection of marking materials based on the application and environmental requirements. Through specific querying of the desired parameters and control via a user-friendly menu, the Application Guide quickly and intuitively directs you to the perfect marking solution for your application.

The app can also be used offline on mobile end devices. It is therefore available at all times, anywhere in the world. Thanks to the intuitive menu navigation, the app is easy to use and does not require specialist knowledge. The MARKING system app is available for iOS and Android operating systems. The app can be downloaded free of charge from the appropriate app store.

Marking Editor

Thanks to the Marking Editor, you can create the required markings directly in the application environment via tablet PC or smartphone.

Bar code scanner

With the bar code scanner, you can quickly and easily access the technical data for marking material. You can also perform marking directly via the Marking Editor.

Search assistant

With the search assistant, you can carry out a structured, targeted search for suitable marking materials, even without knowledge of this field.

Application Guide

The Application Guide queries the environmental conditions that the marking must be able to withstand. Based on this, it directs you to the appropriate material for your marking requirements
