

Diaphragm Valve for Ultra High Purity

Manually operated type
(For high pressure and high flow)

Series AP3100

- Suitable for UHP gas supply line
- Body material: 316L SS secondary remelt
- High pressure type: 20.7 MPa and 9 MPa
- Designed for bulk specialty gas (BSGS) delivery
- LOTO standard with AP3157, optional AP3125

How to Order

AP31 00 S 2PW MV8 MV8

Code	Maximum operating pressure	Cv	Knob
00	3000 psig (20.7 MPa) *1)	0.7	Multi turn round knob
02	1300 psig (9.0 MPa)	1.3	
25	3000 psig (20.7 MPa) *1)	1.0	
50	1300 psig (9.0 MPa)	1.0	
57	1300 psig (9.0 MPa)	1.0	Pull twist knob with LOTO

*1) 2400 psig (16.5 MPa) for connection size 3/4 inch.

Material

Code	Body material
S	316L SS secondary remelt
H	Ni-Cr-Mo alloy *2)

*2) Special export controls apply to Ni-Cr-Mo alloy body with 1/2 inch or greater size connection.

LOTO Options for Diaphragm Valves

* Made to order specifications

Lockout Device/For Air Operated Valve (Order Separately)

Product number: AP PL210

Feature

- Lockable by installing the AP PL210 to the actuation port of air operated valve (only available for N.C. with actuation port connection NPT 1/8 inch)
- Prevent accidental valve opening by manually shutting off actuation pressure
- Lockable only in the closed position
- Accept standard pad lock with 1/4 inch shackle
- Actuation port connection: 10-32 UNF thread
- Actuation port pressure rating: Maximum 150 psig (1.0 MPa)

Operation

Push top button down and twist to close the valve. This feature allows the valve to stay in closed position even if actuation pressure is supplied into an actuation port. Valve opens by repositioning the button, then pressurizing the actuation port.

Series

AP3000, AP3113, AP3130, AP3540, AP4540, AP3200

Lockout Device/For Manually Operated Valve (Order Separately)

Product number: AP PL225

Feature

- Lockable by installing the AP PL225 to the manually operated valve (only available for lever knob)
- Lockable in the closed position
- Accept standard pad lock with 1/4 inch shackle.

Series

AP3125, AP3625, AP4625

Hook for Operational Safety Device (OSD) (Order Separately)

Product number: AP PL227

Feature

- Secure valve in the closed position by installing the AP PL227 to the top of the handle.
- Prevents accidental opening of the valve.

Series

AP3125, AP3625, AP4625

Port Specifications

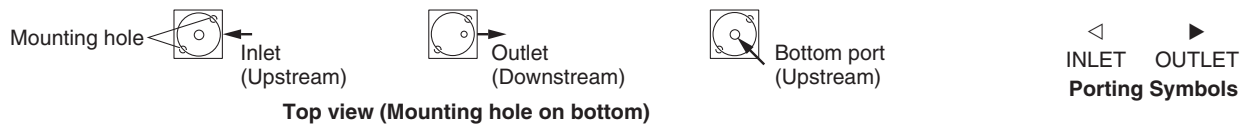

Valves are illustrated top view looking down through the valve.

The traditional flow direction is INLET to OUTLET, but AP Tech valves may be employed in either flow direction.

Port locations are indicated by numbers.

INLET (Upstream) is defined as a port connected to the region below the valve seat. It is illustrated with an arrow pointing towards the valve body or an "empty" triangle on the schematic.

OUTLET (Downstream) is defined as a port connected to the region above the seat and below the diaphragm. It is illustrated with an arrow pointing away from the valve body or a "filled" triangle on the schematic.

Process Gas Equipment / Diaphragm Valve Specific Product Precautions

Be sure to read before handling. Refer to back cover for Safety Instructions and P. 145 and 146 and the "Operation Manual" for common precautions. Operation manual is available from the SMC web site. <http://www.smcworld.com>

Selection

Warning

1. Confirm the specifications.

This product is used in gas delivery systems to shutoff gas flow. When selecting the product, confirm the operating conditions, such as type of gas, operating pressure (inlet and outlet), flow rate, actuating pressure, operating temperature etc., and use within the operating range specified in the catalog. The product may not be suitable for use with specific gases and applications/environments. Check the compatibility of the product materials with the process gas. Design the equipment and select the product by understanding the characteristics of gas.

Mounting

Warning

1. Confirm the mounting direction of the product.

Inlet ports are labeled with an "IN" mark. The outlet ports are usually not labeled but may be labeled with an "OUT" mark. Orient the valve as specified by the system designer.

2. Connect actuation pressure to the valve actuator connection. (Air operated type)

Use nitrogen or clean dry air for actuation pressure. The connection may be a 1/8 inch NPT female thread or 10-32 female thread or M5 depending on the valve model.

3. After installation, check internal leakage (leakage across seat) with inert gases.

Perform a helium leak test depending on applications.

Maintenance

Warning

1. If a valve requires repair, contact SMC.

Operation (Air operate type)

Warning

1. Use nitrogen or clean dry air as actuation pressure.

2. Confirm the valve type (N.C. or N.O.).

In the case of N.C. (Normally Closed), valve will open when applying actuation pressure to the valve actuator connection and valve will close when actuation pressure is vented to atmospheric pressure. In the case of N.O. (Normally Open), its actuation mechanism is opposite to the N.C. type. Valve will close when applying actuation pressure to the valve actuator connection.

3. Apply actuation pressure within the range of specifications.

Operation (Manually operated type)

Warning

4. When closing the valve, rotate the handle clockwise until it completely stops.

There is the internal stop in the handle or in the valve body. Rotate the handle clockwise until the internal stop is reached and it completely stops.

5. When closing the valve with LOTO feature, rotate the handle fully clockwise until the stop.

(AP3657, AP4657, AP3157, AP3900)

When the handle is fully clockwise, the indicator plate roller is aligned with a vertical slot in the handle allowing the handle to drop downward. This feature prevents the valve from being accidentally opened.

6. When opening the valve, rotate the handle counterclockwise until it completely stops.

There is the internal stop in the handle. Rotate the handle counterclockwise until the internal stop is reached and it completely stops.

7. When opening the valve with LOTO feature, the handle must first be lifted up, away from the valve body, and rotated counterclockwise until it completely stops.

(AP3657, AP4657, AP3157, AP3900)

When valve is closed, handle will not rotate as the fixed indicator plate roller is positioned within the vertical slot in the handle. The handle must first be lifted up away from the valve body and rotated counterclockwise until it completely stops.

8. Do not use a tool when rotating the handle.

When the handle is rotated with a tool, it may apply excessive torque to the handle or inside the valve body and it may cause damage. Rotate the handle by hand.

9. When locking the valve with LOTO feature in the closed position, use safety lockout hasp. (AP3657, AP4657, AP3157, AP3900)

The valve with LOTO feature has a built in LOTO capability. When using LOTO feature, rotate the handle clockwise and insert safety lockout hasp into lock stem slot.

Diaphragm Valve for Ultra High Purity

Manually operated type
(For high flow)

Series AP3800 & 3900

- Suitable for UHP gas supply line
- Body material: 316L SS secondary remelt
- Purge ports and monoblock configurations available
- LOTO available (AP3900)

How to Order

AP **3800** **S** **M** **MV8** **MV8** **00**

(Inlet) (Outlet)

Code	Knob
3800	Round knob with open/close indication window
3900	Pull twist knob with LOTO

Code	Body material
S	316L SS secondary remelt

Code	Surface finish
No code	Surface finish Ra max 15 min. (0.4mm) Standard
M	10 μ in. (0.25 μ m)
V	7 μ in. (0.18 μ m)
X	5 μ in. (0.13 μ m)

Porting Configuration

Connections (Inlet^①, Outlet^②)

Code	Connections
TW6	3/8 inch tube weld
FV8	1/2 inch face seal (Female)
MV8	1/2 inch face seal (Male)
TW8	1/2 inch tube weld
FV12	3/4 inch face seal (Female)
MV12	3/4 inch face seal (Male)
TW12	3/4 inch tube weld

Purge port option

Code	Specification
No code	—
C	Capped purge port

Seat material

Code	Material
No code	PCTFE (Standard)
VS	Vespel®

Purge port *1)

Code	Inlet ^③	Outlet ^④
00	None	None
M0	Available	None
0B	None	Available
MB	Available	Available

*1) 1/4 inch face seal (Male) as standard.

Specifications

Operating Parameters		AP3800	AP3900
Gas		Select compatible materials of construction for the gas	
Operating pressure		Vacuum to 250 psig (1.7 MPa)	
Proof pressure		500 psig (3.4 MPa)	
Burst pressure		1000 psig (6.9 MPa)	
Ambient and operating temperature		-40 to 160°F (-40 to 71°C) (No freezing) *1)	
Cv		2.8	
Leak rate	Inboard leakage	2 x 10 ⁻¹¹ Pa·m ³ /sec	
	Outboard leakage	2 x 10 ⁻¹⁰ Pa·m ³ /sec *2)	
Across the seat leak		4 x 10 ⁻⁹ Pa·m ³ /sec *2)	
Surface finish		Ra max 15 μ in. (0.4 μ m) Option: 10 μ in.(0.25 μ m), 7 μ in.(0.18 μ m), 5 μ in.(0.13 μ m)	
Connections		Face seal, Tube weld	
Installation		Bottom mount	
Internal volume		0.76 in ³ (12.52 cm ³)	
Mass		3 lbs (1.36 kg) *3)	3.20 lbs (1.45 kg) *3)
Knob		Round knob with open/close indication window	Pull twist knob *4)
LOTO (Lockout)		N/A	Standard

*1) 14 to 194°F (-10 to 90°C) for Vespel® seat.

*2) Tested with Helium gas inlet pressure 125 psig (0.9 MPa).

*3) Mass, including individual boxed weight, may vary depending on connections or options.

*4) Handle must be pulled to turn open from closed.

Wetted Parts Material

Wetted Parts	S
Body	316L SS secondary remelt
Surface finish	Electropolish + Passivation
Diaphragm	316L SS
Seat	PCTFE (Option: Vespel®)

Vespel® is a registered trademark of DuPont.
