

# T35 DIN Rail Interface Modules

*Don't Limit Yourself to a Terminal Block Connector on Your DIN Rail*

RJ45 & RJ12 | D-Sub | Ribbon Cable | Terminal Block

Mencom's expandable T35 series of Din Rail modules allows you the convenience of mounting a wide variety of connectors to your DIN rail. Also known as "break-out boards", these modules allow the end user to take a pre-wired connection, like a ribbon cable or D-Sub, and easily break it out to individual terminal points. This is all done while taking up minimal space on the DIN rail. Custom interface modules, which may require special circuits or components, can be engineered with quick turnaround from design to delivery, or order the housing components and add your own PCB.

## DIN Rail Interface Modules

Mencom offers a broad range of DIN Rail mount modules which provide a wiring transition from a variety of connectors to either fixed wiring or terminal block.

- Interface modules feature a cable locking mechanism
- Many of the printed circuit boards feature additional component holes for the easy addition of LEDs, resistors or other electronic components.
- Marker end caps are available for all interface modules

## Ribbon Cable Interface Modules

### Ribbon Cable to Fixed Screw Cable Terminal Block

- Provides a transition from Ribbon cable to terminal blocks
- Multi-tiered terminal blocks for quick wiring
- Retention clips ensure a solid connection

## RJ45 & R12 Interface Modules

### RJ45 or RJ12 to Fixed Screw Terminal Block

- Provides a transition from RJ45 to terminal blocks
- Multi-tiered terminal blocks for quick wiring

### Interconnected RJ45 Cat5 Ethernet Connectors

- Allows for cross wired connectors

## D-Sub Interface Modules

D-sub interface modules, made with male & female connections.

### D-Sub to Fixed Screw Connection Terminal Block

- Provides a transition from D-sub to terminal block
- Multi-tiered terminal block for quick wiring

### Interconnected D-sub connectors

- One male and one female per interface module
