

ICF12, ICF18 and ICF30

Full metal inductive proximity sensors with IO-Link communication

Description

ICF series is a complete family inductive sensors with full stainless steel housing. It is available in three diameters: M12, M18 and M30 with a sensing distance up to 22 mm.

On-board IO-Link communication opens up many possibilities, such as easy configuration and set-up of the devices and advanced parameter setting. Moreover, specific cyclic process data are available to monitor the quality of the detection, allowing timely and predictable scheduling of maintenance to prevent machine downtime.

Benefits

- **A complete family.** Available in M12, M18 and M30 robust stainless steel housings with an operating distance up to 22 mm.
- **Less machine downtime.** Lower risk of mechanical damage thanks to the extended operating distance and thanks to the full metal face resistant up to 260 bar pressure for M12, 200 bar for M18 and 100 bar for M30.
- **Easy to install.** ICF sensors have a long thread length. The user can choose between 2 m PUR cable and M12-disconnect plug versions.
- **High precision.** The onboard advanced microcontroller ensures better stability with respect to environmental influences, with highly reliable repeatable measurements between -40 and +85°C.
- **Easy customization to specific OEM requests:** different cable lengths and materials, special labelling, customized pig-tail solutions with special cables and connectors are possible on request.
- **The output** can be operated either as a switching output or in IO-Link mode.
- **Fully configurable via IO-Link v1.1.** Electrical outputs can be configured as PNP/NPN/Push-pull, normally open or normally closed.
- **Timer functions** can be set, such as switch-on and switch-off delay
- **Adjustable sensing distance and hysteresis:** sensing distance can be set to 33%, 50%, 75% or 100% of the maximum sensing distance
- **Temperature monitoring:** over or under-run temperature alarms can be set
- **Target position monitoring:** low margin alarm (target between 81% and 100% of sensing distance), proximity alarm (target too close to the sensor face) and activation level (analogue value of the target distance).
- **Find my sensor function:** to easily identify and locate the sensor on the machine.

Applications

- Non contact detection of metal objects in general position-sensing and presence-sensing in industrial applications
- Machine Tool, Food & Beverage, Agriculture, Metal working and Pharmaceutical
- Particularly suitable in applications where high mechanical resistance to impact and resistance to aggressive cleaning processes using chemical agents are required

Main functions

- Integrated diagnostic function with flashing LED in the event of a short circuit or overload.
- The devices can be operated in IO-Link mode once connected to an IO-Link master, or in standard I/O mode.
- In IO-Link mode the switching signals of the sensor are made available in the process data via the IO-Link interface.
- Several sensor functions can be set via the IO-Link interface:
 - ▶ Adjustable switching distance: 33%, 50%, 75% or 100% of the maximum switching distance.
 - ▶ Adjustable hysteresis: standard or increased value.
 - ▶ Divider function: the sensor gives a signal after a specified number of actuation pulses has been reached.
 - ▶ Switch-on delay: the switching pulse is generated after the sensor actuation.
 - ▶ Switch-off delay: the generation of the switch signal is delayed by the set time after sensor actuation.
 - ▶ Temperature error: temperature is out of specifications.
 - ▶ Temperature over-run and under-run: temperature is out of the limits defined by the user.
 - ▶ Find my sensor function: when this function is activated, the Yellow and Green LEDs flash asynchronously until the function is disabled.
- Machine condition monitoring thanks to the following process data:
 - ▶ Activation Level: analogue value (0-20 range) that gives a rough indication of the target position.
 - ▶ Low Margin Alarm: indicates when the target is detected by the sensor beyond the recommended working range, so between 81% and 100% of the nominal sensing range.
 - ▶ Proximity Alarm: indicates when the target is too close to the sensing face.

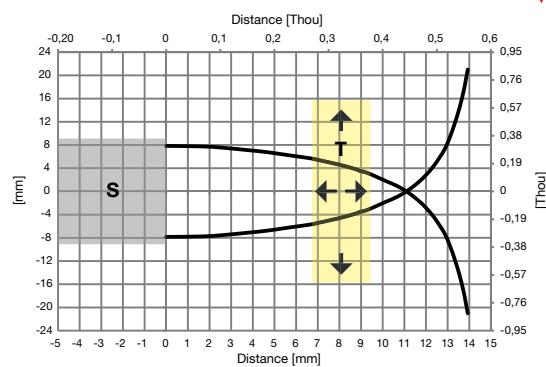

Fig. 4 M18 Non-flush

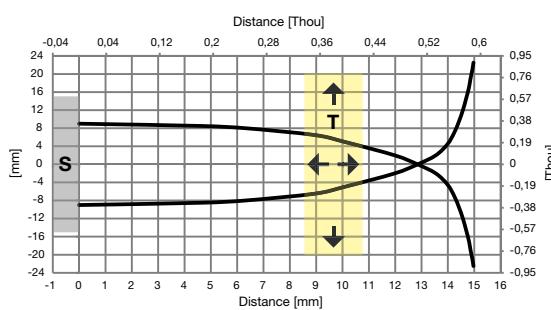

Fig. 5 M30 Flush

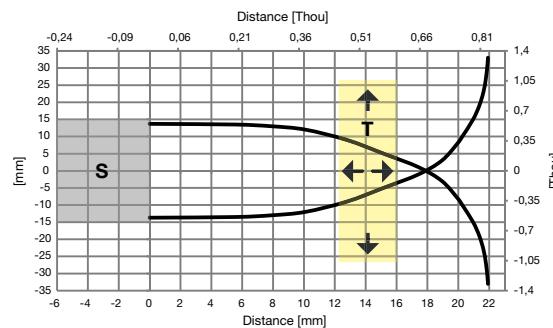

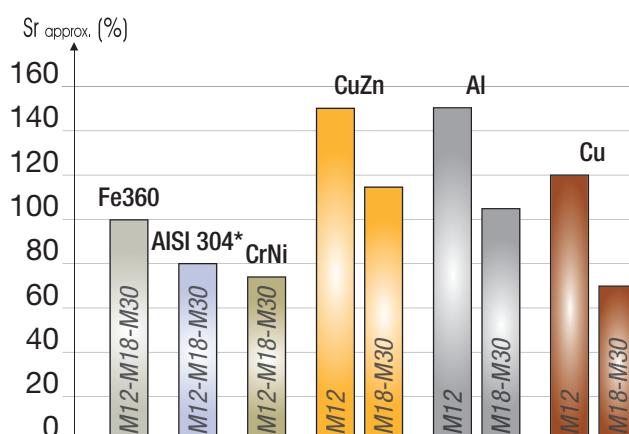

Fig. 6 M30 Non-flush

Correction factors

The specific operating distance S_n refers to defined measuring conditions. The following data have to be considered as general guidelines.

Fe360 : Steel
 AISI 304 : Stainless steel
 CrNi : Chrome(20%)-nickel(80%)
 CuZn : Brass
 Al : Aluminium
 Cu : Copper
 S_r : Effective operating distance

Fig. 7 The rated operating distance is modified by the use of metals and alloys other than Fe360. The most important correction factors for inductive proximity sensors are shown in the figure.

*For Stainless steel the S_r depends on target thickness:

| Sensor | Target thickness | S_r (%) |
|------------------------|-------------------------|-----------------------------|
| ICF12 Flush | 1mm | 75 |
| | 2mm | 105 |
| ICF12 Non-flush | 1mm | 10 |
| | 2mm | 60 |
| ICF18 Flush | 1mm | 80 |
| | 2mm | 100 |
| ICF18 Non-flush | 1mm | 60 |
| | 2mm | 90 |
| ICF30 Flush | 1mm | 50 |
| | 2mm | 70 |
| ICF30 Non-flush | 1mm | 30 |
| | 2mm | 50 |

► Accuracy

| | |
|--------------------------|------------|
| Repeatability (R) | $\leq 5\%$ |
|--------------------------|------------|

Features

▶ Power Supply

| | |
|-----------------------------------------------------|--------------------------------|
| Rated operational voltage (U_b) | 10 to 30 VDC (ripple included) |
| Ripple (U_{rpp}) | $\leq 10\%$ |
| No load supply current (I_b) | ≤ 29 mA |
| Power ON delay (t_v) | ≤ 50 ms |

▶ Outputs

| | |
|------------------------------------------------------------------------------|-------------------------------------------------|
| Output functions | Configurable via IO-Link: PNP, NPN or push-pull |
| Output configuration | Configurable via IO-Link: N.O. or N.C. |
| Output current (I_o) | ≤ 200 mA |
| OFF-state current (I_r) (only for PNP or NPN output) | ≤ 100 μ A |
| Voltage drop (U_d) | Max. 2.5 VDC @ 200 mA |
| Protection | Short-circuit, reverse polarity and transients |
| Voltage transient | 1 kV/0.5 J |

▶ Response times

| | | |
|--------------------------------|---------------|-------|
| Operating frequency (f) | ≤ 500 Hz | ICF12 |
| | ≤ 300 Hz | ICF18 |
| | ≤ 150 Hz | ICF30 |

▶ Indication

SIO mode:

| Green LED | Yellow LED | Output | Description |
|-----------|------------|--------|---------------------------------------------------------------------------|
| ON | OFF | OFF | N.O. output, target not present N.C. output, target present (Sn: <81%) |
| ON | ON | ON | N.O. output, target present (Sn: <81%) N.C. output, target not present |
| OFF | OFF | OFF | N.C. output, target present (Sn: 81%-100%) |
| OFF | ON | ON | N.O. output, target present (Sn: 81%-100%) |
| - | Blinking | f: 2Hz | Short-circuit or overload |
| Blinking | - | f: 5Hz | Temperature alarm (if enabled) |
| Blinking | Blinking | f: 2Hz | Asynchronously flashing, "find my sensor" is enabled |

**IO-Link mode:**

| Green LED | Mode | Description | |
|------------------|----------------|-----------------------------------------------------------|--|
| Blinking | ON for 0.75s | IO-Link communication established with the IO-Link master | |
| | OFF for 0.075s | | |

| Green LED | Yellow LED | Output | Description |
|--------------------------------|-------------------|---------------|----------------------------------------------------------------|
| ON for 0.75s OFF for 0.075s | OFF | OFF | N.O. output, target not present N.C. output, target present |
| | ON | ON | N.O. output, target present N.C. output, target not present |
| - | Blinking | f: 2Hz | Short-circuit or overload |
| Blinking | - | f: 5Hz | Temperature alarm (if enabled) |
| Blinking | Blinking | f: 2Hz | Asynchronously flashing, "find my sensor" is enabled |

Possibility to disable the LED

► Environmental

| | | |
|------------------------------------|------------------------------------------------------------------------------------|-----------------------|
| Ambient temperature | Operating: -40° to +85°C (-40° to 185°F) Storage: -40° to +85°C (-40° to 185°F) | |
| Impact resistance | 1 J | EN 60068-2-75 Ehc |
| Vibration | 25 g (10...3000 Hz) / 50 sweep cycles per frequency; 1 octave per minute in 3 axes | EN 60068-2-6 Fc |
| Shock | 100 g 11 ms half-sine; 3 shocks each in every direction of the 3 coordinate axes | EN 60068-2-27 Ea |
| Continuous shock resistance | 40 g 6 ms; 4000 shocks each in every direction of the 3 coordinate axes | EN 60068-2-27 |
| Degree of protection | IP67, IP68 (5 m submersion for 1 month), IP69K | IEC 60529; EN 60947-1 |
| Mechanical shock resistance | IK10 | EN 50102 |

► Compatibility and conformity

ICF - Full metal inductive sensors

Sensors

ICF

Full metal inductive sensor

The ICF inductive sensors family is a robust solution for daily indoor and outdoor operations to ensure accurate and reliable detection of metal object even in harsh conditions.

Thanks to the one-piece stainless-steel housing, is particularly suitable in applications where high mechanical resistance to impacts, vibrations and resistance to aggressive cleaning processes using chemical agents are required.

The on-board IO-Link communication offers many output combinations such as customized sensing distance and advanced sensing modes. Moreover, provides specific cyclic process data to monitor the quality of the detection, allowing timely and predictable scheduling of maintenance to prevent machine downtime.

The highest impact resistance

Main features

- M12, M18 and M30 rugged one-piece stainless-steel AISI 304 housings available with 2m high-grade PUR cable or M12-plug
- Maximum electrical and mechanical flexibility with flush or non-flush versions and configurable output: PNP, NPN, Push-Pull, NO, NC
- High switching distances from 4 to 22 mm to allow a safe installation on the machine

Predictable maintenance:

- Proximity alarm, when the target is too close to the sensing face
- Low margin alarm, when the target is between 81% and 100% of the sensing distance
- Activation level, gives a rough indication of the target position
- Temperature monitoring, setting over or under-run temperature alarms

Extreme performance

- Full metal face resistant up to 260 bar pressure for M12, 200 bar for M18 and 100 bar for M30
- IK10 mechanical shock resistance (EN 50102), 1 J impact resistance (EN 60068-2-75)
- 25 g vibration resistance, 100 g shock resistance and 40 g continuous shock resistance
- Extended operating temperature range from -40°C to +85°C; Resistant up to 100°C for 15' cleaning process
- IP67, IP68 and IP69K protection degree to avoid any water and moisture penetration during high pressure and high temperature washing cycles

LEDs function

- The visual adjustment indicator helps to ensure a safe detection of the target during the installation on the machine
- "Find my sensor" can be activated via IO-Link, to easily identify and locate the sensor
