- Selection Guide

Cloud Integration Architecture of LoRaWAN

About LoRaWAN

Advantech LoRaWAN solutions provide a device-to-cloud solution by simply sending collected data through the LoRa gateway to the cloud. With Edgelink inside the gateway, users simply plug-and-play without worrying about data parsing processes.

ESRP-ACT-UN02484

EVA-2310

EVA-2311

EVA-2510

EVA-2210

EVA-2210

3-Phase Current Meter with 3 x 75A Clamp-On CT

- 3 x 75A Clamp-On CT
- · Battery life up till 3.5 years@25 °C, 60mins interval setting

EVA-2510

Water Leakage Sensor

- · 3.5mm water line diameter
- Battery life up till 5 years@25 °C, 15mins interval setting

EVA-2310

Temperature and Humidity Sensor

- -20 °C to 55 °C temperature detection range
- 0%RH to 100%RH humidity detection range
- Battery life up till 5 years@25 °C, 15mins interval setting

EVA-2311

Temperature PT1000 Round Head Probe Sensor

- -70°C to 200°C temperature detection range
- IP67 for PT1000 Round Head Probe Sensor
- Battery life up till 5 years@25°C, 15mins interval setting

LoRaWAN

WISE-6610

ESRP-ACT-UN02484

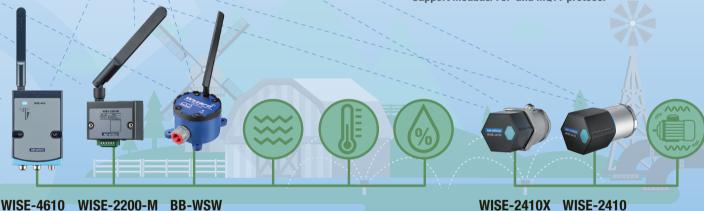

Intelligent Platform with ThingPark Enterprise

- Supports 2000 LoRaWAN device connections
- · Build a multi-gateway, geo-redundant, high-availability LoRaWAN® network with a user-friendly interface and real-time monitoring
- . Extend cloud intelligence and analytics to edge devices, with end-to-end infrastructure security, trusted by major telecommunication operators
- Enjoy carrier-grade support and maintenance including 24/7 monitoring of smart IoT platforms
- Seamless inter-operability among smart things

WISE-6610

LoRaWAN Gateway

- LoRaWAN protocol for private and public system applications
- Enhanced memory and build-in Node-Red for hosting custom software applications
- Ethernet and I/O connections for wide array of field assets
- Support Modbus/TCP and MQTT protocol

WISE-2410 Vibration Sensor

- Built-in 3-axis accelerometer and temperature sensor
- Total 8 vibration characteristic values on board
- Compliant with ISO 10816

WISE-4610 1/0 Module

- Supports LoRaWAN wireless frequency with external detachable antenna
- Application-ready I/O communication with optional M12 connectors, IP65

BB-WSW I/O Node

- Rugged, IP66-rated, fiber-reinforced polyester PBT enclosure
- · Provides connectivity to industry-standard analog or digital sensors
- · Support 2AI, 2DI, 1D0 channels

WISE-2410X Explosion Proof Vibration Sensor

- IECEx Zone 2, Zone 21, ATEX2 certified
- Built-in 3-axis accelerometer and temperature sensor
- · Total 8 vibration characteristic values on board

WISE-2200-M I/O Module

- · Less interference with high penetration capability
- Supports Modbus/RTU communication protocol
- · Supports max. 128 address and 30 rule settings

Factory Industrial IoT

In Factory Industrial IoT, the core objective is deploying diverse sensors to gather extensive data for analysis at a control center. Users set system thresholds and receive timely alerts for safety and productivity. The Advantech WISE-4610 LoRa/LoRaWAN I/O node, along with WISE-2410 vibration sensors, ensures strong signal penetration without complex wiring. Integrating the EVA-2311 LoRaWAN Temperature PT1000 Round Head Probe Sensor enhances this network. Together, they monitor warehouses using vibration, humidity, and temperature sensors, providing an efficient alternative to manual inspections. With WISE-2410 vibration sensor, EVA-2000 PT1000 sensor, and other sensors paired with a WISE-4610 analog input I/O board, alerts can be triggered when pressure levels (water pressure, oil pressure, gas pressures etc.) are abnormal. This increases safety and improves production quality by controlling resources in the manufacturing process.

- Higher Penetration
- Lower Power Consumption
- No Wiring Needed
- Increased Productivity
- Enhances Factory Safety
- Control Factory Resources
- Automatic Alerts

Oil & Gas

Oil refineries are very large industrial complexes that involve many different processing units and auxiliary facilities. These facilities are dispersed over a vast industrial complex, and some of them are in hazardous environments or nearly inaccessible locations, making maintenance extremely difficult. The WISE-2410X, an ATEX2 and IECEx (Zone 2 and Zone 21) certified vibration and temperature sensor, can be installed in hazardous environments to monitor the conditions of rotating equipment like fans and pumps. By integrating with Actility's ThingPark Enterprise IoT platform and AWS IoT SiteWise, Advantech's LoRaWAN vibration sensing device can automatically and remotely monitor systems. making them a perfect facility monitoring solution for refining systems.

- **Explosion proof certified to withstand harsh environments**
- Long distance transmission and low power consumption
- Allows remote inspection and predictive maintenance
 - Improve productivity
 - Enhance safety

Advantech LoRaWAN solution enables smart campus energy management, which collects energy data and monitors power consumption in real-time. The LoRaWAN technology not only provides long-range wireless communication but also provides deep indoor coverage to easily cover multi-floor buildings. Advantech builds the LoRaWAN network with its EVA-2210 3-phase current meter with 3 x 75A clamp-on CT, WISE-2200-M I/O modules and WISE-6610 LoRaWAN gateways to transmit the data from power meters to the cloud. EVA-2210 measures diverse equipment currents like pumps, compressors, and more. WISE-2200-M is a LoRaWAN Modbus read/write communication device, which supports a maximum 128 addresses and a 30 rule setting and can easily connect to Modbus sensors and meters for different kinds of applications. Because of its plug-and-play functionality, EVA-2210 and WISE-2200-M can be quickly and flexibly installed to facilitate network construction.

- Plug-and-play applications
- Less interference with high penetration
- Network can be quickly deployed with fewer gateways
- No wiring required
- Save energy costs
