Chapter 1 Features

- Efficiently control motor driven rollers from a PLC using Modbus communication
- Simplify installation of multiple R50Cs on a conveyor using M12 connectors and motor power connections in series
- Compact bimodal to Modbus® device converter that reports and controls two channels of discrete inputs/outputs, and an analog output voltage value (0 V DC to 18 V DC) via register settings on a Modbus RTU server
- Enabled Delay Modes: ON/OFF Delay, ON/OFF One-shot, ON/OFF/ Retriggerable One-shot, ON/OFF Pulse-stretcher and Totalizer
- Measurement Metrics: Count, Counts Per Minute (CPM), and Duration
- Discrete Mirroring: Discrete signals (In/Out) from a channel can be mirrored to the other channel's output
- Discrete input/output can be independently configured as NPN or PNP
- L-Code power pass-through
- Rugged over-molded design meets IP65, IP67, and IP68
- Connects directly to a sensor or anywhere in-line for ease of use
- R50C hubs are a quick, easy, and economical way to integrate non-Modbus devices into a Modbus system

Model

Model Name	Function	Control	Connectors
R50C-L-B22AOU-MQ	L-Code ports with bimodal function: 2 inputs, 2 outputs, and an analog voltage output	Modbus®	(1) Pair of integral 5-pin M12 A-Code male/female quick-disconnect connectors and (1) Pair of integral 5-pin M12 L-Code male/female quick-disconnect connectors

Overview

The R50C-L-B22AOU-MQ Motor Driven Roller Controller allows for the connection to two discrete Input/Output channels, and also provides an analog voltage output control from 0 V DC to 18 V DC. This hub also supports L-Code power input/ output.

With two discrete channels that can be configured as inputs or outputs, the R50C allows for precise control over start/stop functions, direction, and error conditions. The 0–18 volt analog output ensures accurate speed control for both standard and high-speed motor driven roller systems. LED indicators provide clear status monitoring and facilitate troubleshooting, ensuring smooth and efficient operation.

The use of compact sealed M12 connectors and motor power connections in series simplifies the installation process, making it easy to set up multiple R50Cs on a conveyor. The M12 L-coded connections support higher current demands and share up to 16 amps of power, delivering more power while occupying less space than traditional connectors.

The IP67-rated fully-sealed housing and -40° C to 70° C operating range make the R50C suitable for use in challenging environments without the need for additional protective enclosures. This robustness ensures reliability and longevity in harsh conditions.

Compatible Motor Driven Rollers

The R50C is compatible with the following motor driven rollers:

- Itoh Denki PM- XE, XP
- Itoh Denki PM- XC
- Interroll EC310
- Interroll EC5000
- PulseRoller Senergy IDC
- Lenze MDR o450
- Rulmeca BL3

Chapter 2 Configuration Instructions

SNAP SIGNAL® Configuration Software

The SNAP SIGNAL® Configuration Software offers an easy way to manage converter Modbus® settings, retrieve data, and visually show converter data. The SNAP SIGNAL Configuration Software runs on any Windows machine and uses an adapter cable (BWA-UCT-900, p/n 19970) to connect the converter to the computer.

Download the most recent version of the SNAP SIGNAL Configuration Software from the Banner Engineering website:
<https://www.bannerengineering.com/sg/en/products/software/snap-signal-configuration-software.html>.

Wiring 9

Chapter 3 Mechanical Installation

Install the R50C to allow access for functional checks, maintenance, and service or replacement. Do not install the R50C in such a way to allow for intentional defeat.

Fasteners must be of sufficient strength to guard against breakage. The use of permanent fasteners or locking hardware is recommended to prevent the loosening or displacement of the device. The mounting hole (4.5 mm) in the R50C accepts M4 (#8) hardware.

See the figure below to help in determining the minimum screw length.

CAUTION: Do not overtighten the R50C's mounting screw during installation. Overtightening can affect the performance of the R50C.

Wiring

A-Code Male and Female Pinouts

Modbus - Male	Pin	Signal Description
	1	12 V DC to 30 V DC
	2	RS485/D1/B+
	3	GND
	4	RS485/D0/A-
	5	BannerBus

Motor Driven Roller (MDR) - Female	Pin	Signal Description
	1	12 V DC to 30 V DC
	2	Channel 2
	3	GND
	4	Channel 1
	5	Analog Out

L-Code Male and Female Pinouts (16A)

Male Pinout	Female Pinout	Pin	Wire Color	Signal Description
		1	Brown	+24 V DC
		2	White	GND
		3	Blue	GND
		4	Black	+24 V DC
		5	Gray	FE

Chapter 4 Status Indicators

The R50C has matching LED indicators on both sides of the converter to allow for installation needs, while still providing adequate indication visibility.

There are two pairs of green LEDs:

- PWR: A-Code power indication
- APwr: L-Code power indication

Additionally, there are four pairs of amber LEDs:

- C: Modbus communications
- AO: Analog Out
- D1: Discrete Channel 1 (Pin 4)
- D2: Discrete Channel 2 (Pin 2)

A-Code Power Indicator Green LEDs

Indication	Status
Off	Power off
Solid Green	Power on

L-Code Power Indicator Green LEDs

Indication	Status
Off	L-Code power is off or not attached
Solid Green	L-Code power is on or active

Modbus Communications Amber LEDs

Indication	Status
Off	Modbus communications are not present
Flashing Amber (4 Hz)	Modbus communications are active
Solid Amber for 2 seconds, then off	Modbus communications are lost after connection
Solid Amber for 2 seconds, then to flashing amber (4 Hz)	Modbus communications are momentarily lost, but then communication is reestablished

Analog Out Amber LEDs

Indication	Status
Off	Analog output value is outside the allowable output range (0 V DC to 18 V DC)
Solid Amber	Analog output value is inside the allowable output range (0 V DC to 18 V DC)

Discrete Channel 1 and Discrete Channel 2 Amber LEDs

Indication	Status
Off	Discrete is inactive
Solid Amber	Discrete is active

Connections

- (1) Integral 5-pin M12 A-Code female quick-disconnect connector
- (1) Integral 5-pin M12 A-Code male quick-disconnect connector
- (1) Integral 5-pin M12 L-Code female quick-disconnect connector
- (1) Integral 5-pin M12 L-Code male quick-disconnect connector

Construction

Coupling Material: Nickel-plated brass

Connector Body: PVC translucent black

Vibration and Mechanical Shock

Meets IEC 60068-2-6 requirements (Vibration: 10 Hz to 55 Hz, 0.5 mm amplitude, 5 minutes sweep, 30 minutes dwell)

Meets IEC 60068-2-27 requirements (Shock: 15G 11 ms duration, half sine wave)

FCC Part 15 Class B for Unintentional Radiators

(Part 15.105(b)) This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

(Part 15.21) Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

Industry Canada ICES-003(B)

This device complies with CAN ICES-3 (B)/NMB-3(B). Operation is subject to the following two conditions: 1) This device may not cause harmful interference; and 2) This device must accept any interference received, including interference that may cause undesired operation.

Cet appareil est conforme à la norme NMB-3(B). Le fonctionnement est soumis aux deux conditions suivantes : (1) ce dispositif ne peut pas occasionner d'interférences, et (2) il doit tolérer toute interférence, y compris celles susceptibles de provoquer un fonctionnement non souhaité du dispositif.

Dimensions

All measurements are listed in millimeters [inches], unless noted otherwise. The measurements provided are subject to change.

Banner Engineering Corp Limited Warranty

Banner Engineering Corp. warrants its products to be free from defects in material and workmanship for one year following the date of shipment. Banner Engineering Corp. will repair or replace, free of charge, any product of its manufacture which, at the time it is returned to the factory, is found to have been defective during the warranty period. This warranty does not cover damage or liability for misuse, abuse, or the improper application or installation of the Banner product.

THIS LIMITED WARRANTY IS EXCLUSIVE AND IN LIEU OF ALL OTHER WARRANTIES WHETHER EXPRESS OR IMPLIED (INCLUDING, WITHOUT LIMITATION, ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE), AND WHETHER ARISING UNDER COURSE OF PERFORMANCE, COURSE OF DEALING OR TRADE USAGE.

This Warranty is exclusive and limited to repair or, at the discretion of Banner Engineering Corp., replacement. **IN NO EVENT SHALL BANNER ENGINEERING CORP. BE LIABLE TO BUYER OR ANY OTHER PERSON OR ENTITY FOR ANY EXTRA COSTS, EXPENSES, LOSSES, LOSS OF PROFITS, OR ANY INCIDENTAL, CONSEQUENTIAL OR SPECIAL DAMAGES RESULTING FROM ANY PRODUCT DEFECT OR FROM THE USE OR INABILITY TO USE THE PRODUCT, WHETHER ARISING IN CONTRACT OR WARRANTY, STATUTE, TORT, STRICT LIABILITY, NEGLIGENCE, OR OTHERWISE.**

Banner Engineering Corp. reserves the right to change, modify or improve the design of the product without assuming any obligations or liabilities relating to any product previously manufactured by Banner Engineering Corp. Any misuse, abuse, or improper application or installation of this product or use of the product for personal protection applications when the product is identified as not intended for such purposes will void the product warranty. Any modifications to this product without prior express approval by Banner Engineering Corp will void the product warranties. All specifications published in this document are subject to change; Banner reserves the right to modify product specifications or update documentation at any time. Specifications and product information in English supersede that which is provided in any other language. For the most recent version of any documentation, refer to: www.bannerengineering.com.

For patent information, see www.bannerengineering.com/patents.
